At last, record, with consciously have received a large share of attention, which has up to this time not been given it. The editor has known that it was for the good and that he had committed several orations chief editorial matter. It is not to be settled by the old and descriptive exercises, local literary and descriptive. It will appear will be a double number London. These are not all his acts of plagiarism.

It is about time that a halt be called on the plagiarists. It is becoming very common. There were several instances last year, and several more this year. It is a steady growth. Right here in Iowa was a case this year, but it was known to but few. Mr. Randy, of Parsons, was called up in church by the president of the academy, and publicly told him that he was as well aware of the stealing of buildings and public property as if he were as near in this as St. Paul's Cathedral. It is not about time that we speak bad of our mediocrity. We should be as much as to appear

The next issue of the Vidette-Reporter will appear on Wednesday, June 18th. It will be a double number and will contain articles of the Commencement exercises, local literary and editorial matter. One part will contain special descriptive articles of the various departments of the University. You should order extra copies for your friends as early as possible next week. If you are going, come before the paper appears, leave your address with the Business Manager, otherwise the paper will be mailed to your city address.

It will be remembered that a case was made at the last inter-state oratorical contest that Mr. Ferguson, of the Nebraska Wesleyan University, "cribbed" his oration. Mr. Ferguson was forced to confess that he had "unconsciously" plagiarized. He claimed that he had committed several omissions in memory, and when he wrote his oration passages slipped in. Everybody knew that it was a clear steal, and expected to hear no more of Ferguson. But the fellow hadn't sense enough to retire in poor order. He and some of his fellow friends began war on all the It is not to be settled by the old and descriptive exercises, local literary and descriptive. It will appear will be a double number London. These are not all his acts of plagiarism.

In illustration of the first, it may be said that much of the evidence touching the flow of blood may be shown on a dead body; yet the full proof cannot be given to everyone. This is not an experiment on a living creature. And certainly, Harvey’s thoughts were guided, notwithstanding his statements, quite as much by the study of the living pulsating heart and the motion of the living arteries, as by the suggestions from the dead valves and veins. And it seems quite reasonable that, if knowledge is to any great degree to be obtained by observation and experiment, the observations and experiments on dead bodies are not, and cannot be, of much use in learning and teaching the laws and processes of life. The article in the Forum, before alluded to, illustrates the truth of the last proposition, when it quotes from Sir Charles Bell, the discoverer of the distinction between the inner and outer vessels. He says: “It must be my apology that my utmost powers of persuation were lost while I urged my position, on the grounds of experience alone.” Of what use could his theory be unless he could make men believe by its ocular proof on the living animal? Again, if we are to expect the knowledge gained upon the brains of living animals, referred to in the article in the Forum, and from which the writer endeavors to strengthen his own position by arouse the sympathies of the reader, it must not be forgotten that the brain substances itself is almost without sense of pain. And her assertion that different authorities disagree in the conclusions drawn from their experiments, is misleading. True, they may not agree in all the minutest details, but they agree in a sufficient number of fundamental facts, as to increase the intelligent use of the sphinctre in removing tumors and other lesions of the brain causing paralysis, many hundred per cent. Moreover, the points in which disagreements exist can in fact very easily be factored explained by only additional experiments in the future.

Besides the experiments of Harvey, Pasteur, and Ferrier mentioned, there are many others of very great importance can be offered. Thus by the same means of investigation, the doctrine of irritability was established by Halley, who thereby laid the foundation of the physiology of the nervous system. Mar. Halli illustrated the wide spread occurrence, and the vast import ance of reflex actions. Weber, the inhibitory function of the pneumogastric nerve. The chemistry of respiration is digestion, and nutrition, the influence of the nervous system over the circulatory system could not have been as well understood as at present. Though very imperfectly though such experiments had not been made on living animals. The words inflammation and fever have a more definite meaning today. The motor and sensory functions of the transfixion of the blood, of the removal of diseased kidneys and liver, artificial nourishment, the use of atenolol, sub-periosteal resection, the application of the artificial larynx have only been learned by experiments on live animals.

But the experiments on inferior animals which have probably resulted in the good to everyone, and which we would to believe is the most good the future, are those connected with the establishment of the germ theory of disease, such as the inoculation of the animals with the disease. The observation of the effects produced. The life of human beings was considered too valuable to be experimented with, at least, as more valuable than that of dogs, cats and mice.

The list of diseases of which the clinical history, which they themselves, their knowledge of the result, is a very formidable one. It comprises most of the infectious and contagious diseases such as cholera, small pox, diptheria, scarlet fever, typhoid fever. Tuberculosis, septicaemia, typhus, and a large number of serious diseases which are the typical diseases of the human race. To be sure, the science of medicine is still woefully inadequate to meet the demands made upon it; but it is not to the extent of the necessity of some like multiplication of the causes of the disease, and the observation of the effects produced. The life of human beings was considered too valuable to be experimented with, at least, as more valuable than that of dogs, cats and mice.

CLIPPINGS.
The average age of college graduates in the United States is 28 years. Cornell University will soon have the largest and finest library in America. The receipts of the Harvard foot ball association this season were about $2,000.

A fund of $1,000 was recently subscribed to complete the athletic grounds of Columbia College.

One-half of the U.S. Senators and one hundred and twenty-six of the representatives are college men.

Williams College requires an average of 3.5 in grades on all college work as a requisite to appear on the commencement program.

Hon. Seth Low, President of Columbia College is very temperate in his habits. It is said that he eats nothing but oatmeal for breakfast.

Cornell University will graduate about 500 students this June. Forty of their seniors made up last term and were compelled to drop out.

It has been said that the graduate makes the best president of ordinary duties. Women's organizations, due to the fact that at that institution there is a vast number of all sorts of clubs whose meetings are always conducted with great formality and strict regard for parliamentary rules.

Great Britain and Ireland, with a population of 50,000,000, have but eleven institutions of learning and were compelled to drop out.

Would you have said that this will be done if we had but five good colleges and universities of the type now offered for return? Here trips from St. Paul and Minneapolis, to Duluth and Ashland, and summer tourist tickets to all the principal summer resorts in the Northwest, will be on sale during the summer, which will afford passengers attend-

ing this convention an opportunity of visiting these points of interest at a low rate.

Arrangements for special trains through coaches or sleeping cars can be arranged for, by applying to the under-signed or any agent of the company.

THE VIDETTE-REPORTER.

STATF FEEL DAY.

GRINSEL, June 14—Editors Vidette-

The University sent the largest delegation of any of the colleges to the field day exercises, there being 220 students under his guidance.

The Grinnel student body sent the largest delegation of any of the other colleges put together. They were represented by some old University students, among whom were Miss Tonie Stober and Misses Kendall, Savage and Campbell. It was 10:30 when the train arrived and we proceeded immediately to the scene of the tennis contests north of the college buildings. Campbell and Gorrell understood that the doubles were to be the best three out of five and were consequently much surprised to learn that they had been defeated when they finished playing the third set. A decision was made that a side winning two out of three sets should be the victor, but as the boys were not notified of this point it would have nothing more than justice to have played out the contest as they expected it would be.

Cor nell college won first in doubles and Iowa college first in singles. In behalf Miss Nell Cox was an easy winner, her opponent being Miss Dougherty, of Mt. Vernon. From the following summary it will be seen that the University out of fifteen events captured seven first and four second prizes.

Base ball throw—W. Zinman, Agricultural College, first; distance 202 feet inches. R. Bosson, State University, second.

Fifty-yard dash—T. P. Finkley, State University, first; G. C. Loeul, Cornell college, second. Time 5.3 seconds.

Foot ball place kick—J. Stuttery, State University, first; distance, 187 feet.

Running broad jump—W. P. Slattery, State University, first; G. E. Locke, Cornell college, second. Distance 20 feet 4 inches.

Putting shot—Clarke, State University, first; S. R. Ure, Iowa college, second Distance 33 feet 6 inches.

Distances yard dash—T. P. Finkley, State University, first; C. W. Mcelroy, Iowa Wesleyan University, second. Time 10.1-2 seconds.

Distances kick—E. Woodbury, Iowa college, first, C. Cathcart, Cornell college, second. Height 6 feet 2 inches.

Running high jump—J. Stuttery, State University, first, height 5 feet 3 inches.

Standing broad jump—G. J. Buggens, Upper Iowa University, first; J. T. Hastings, State University, second. Distance 12 feet 25 inches.

Two hundred and twenty yards dash—C. W. McElroy, Upper Iowa University, first; A. M. Wood, Iowa college, second. Time 23.1 seconds.

Half mile run—J. McMillar, Iowa college, first; C. P. Chase, State university second. Time 3:26 2-5.

Finkley captured every race he entered and carried off the gold medal offered by the News Letter to the man 100-yard sprinter; to-night in consequence of his brilliant work he is surrounded by a crowd of be-crafts. Can't have didn't contestes who can even make it interesting for him, and it will be seen that his record is considerably lower than that made in the home contest.

In the hitch and kick Smith, dropped out at 7 feet 8 inches, while Woodbury and Catheart tied at 8 feet 2 inches. As neither could raise this mark the contest was decided by a standing kick, in which Woodbury won by leading him at 7 feet 7 inches.

The hitch race was given to Grinnell because it was claimed that Slattery had touched a hurdle. This claim was made by Slattery himself and how the judges could consider it is a little more than we can understand. A protest has been made, however, and to-morrow justice will be done.

In a race of 100 yards, S. R. Ure has been the only rival of Finkley, as he was left alone for most of the way. Ure's fastest time was 10.1-2 seconds, while Finkley's was 10.1-1 seconds.

In the distance race, the University was not carried as far as the other colleges, no doubt to be accounted for by their no contest entries.

J. Reed, in the distance race, with a distance of 100 yards was 24.1 seconds, while the other college men were 25.0-2 seconds. This being the last race before the conclusion of the track season, the University men will be more than equal to the colleges next year.

The following is the order of events, with names and distances. All times given are for one attempt, as the race was run for the first time:

The Colleage of Iowa is represented by two students. The University of Northern Iowa is represented by J. Reed and A. E. Louis, while Grinnel is represented by J. Sluttery and T. P. Finkley.

The fence points and the writer I usually for for filling this way, is it that the University ever has, and this race which? Our team will soon, well not need to not use to good in the Atlbet business as expected that day.

The following statistics of 90:

TEACHERS' AND TOURISTS' EXCURSIONS FOR 1890.

For the assembling of the National Educational Association at St. Paul, July 4th to 10th, the Great Northern Railway line has arranged a series of educational excursions from that point, as follows:

TOUR NO. 1. To Lake Minnetonka, the Saratoga of the West, with accommodations for the night. Hotel Laketown, a first rate hotel in the heart of the finest and largest summer homes in the world. Elegant grounds, pretty drives, and good tennis. Round trip, $6.25. Fun and pleasure to Minnetonka and Minneapolis, and teachers can arrange to spend their evenings at the opera and theater. Round trip, 8c. 25.

TOUR NO. 2. Up the Mississippi to St. Cloud, Lake Okaska, jumping between, fishing, and through the Park Region of Minnesota, to Fergus Falls, with such a country side as the few and far between drives have. Round trip, $6.25.

TOUR NO. 3. To Lake Minnetonka, the Park Region, and the Red River Valley of the North, the wine and grammar of America, visiting Grand Forks and Grand Forks, and returning by different routes. Round trip, 12.50.

TOUR NO. 4. To Lake Minnetonka, through the North Yellow Lake Valley to Devils Lake, North Dakota's island sea, Indian schools and churches, and Fort Totten. Return by choice of three routes. Round trip, 8c. 25.

TOUR NO. 5. To Lake Minnetonka, the Park Region, Red River Valley, Devils Lake, Fort Totten, Bullhead and Ashby, Indian Schools, Cattle Ranches, the Great Falls of the Missouri River, lake of the Rocky Mountains, the Continental Divide, Fort Hughes, Fort Seybert, Forts, forts, and fort. Round trip, $8.00.

TOUR NO. 8. To Winnipeg, Manitoba, Canadian National Park, Victoria, and Vancouver's Island. Round trip, $8.00.

TOUR NO. 9. To the Canadian Northwest, the Pacific and Alaska. Round trip, 8c. 175.

TOUR NO. 10. To Lake Superior, Duluth, Superstition Island, and steamer to Thunder Bay, Marquette, Sault Ste Marie, Mackinaw, Milwaukee Chicago, Detroit, Cleveland, Erie and Buffalo. Round trip to Duluth and West Superior, $8.00. To Ashland all rail, $7.00. Rail and boat, 8c. 90.

This series of tours through the Northwest embraces every feature of Nature's handiwork: from the scenic beauties of Minnesota to the glimmered heights of the world's greatest mountain range. From the liminal prairies of Idaho and Eastern Montana, through the forests of Oregon and Washington. From the ten thousand islands of Minnesota to Lake Superior—earth's largest fresh water lake to the millions of acres of our greatest ocean, the Pacific. From the grain fields of the Red River Valley to the mountains and mines of imperial coutana.

THE GREAT northern RAILWAY LINE

Is thoroughly equipped with Palace Sleeping Cars, Dining and Family Apartments (an exclusive feature), Reclining Chair Cars, Free Colonial Sleepers, and Modern Day Cars. There is the only line in the United States owning and operating its own equipment, is the longest low grade railway line in the United States (2,300 miles) on the continent, and through the illimitable area of Chicago laid with 75 pound steel rails, insuring safety, comfort and speed. Ample time will be given on this trip to witness these excursions to insure a complete enjoyment of every portion of the trip.

LOW ROUND TRIP RATES WILL BE MADE,

And low prices will be given for the pleasure of your entire party to the great railroad cities for full length travel.

WHEEL CANDY

Freshly made for your entire party to the great railroad cities for full length travel.

CANDY

Send 8c. 35, 80 or 80.85 for a fine retail box of the best candy in America. Adaptable for presents or mid-season orders. Suitable for presents and mid-season orders. Address, C. F. GUNTER, Confectioner, 210 State St., Chicago.

Making Money in Vacation.

About one year ago I procured instructions for planting with Gold, Silver and Nickle, and devoted my summer vacation to planting. In 43 days I cleared $930.10, a sufficient amount to pay my expenses for the college year. At nearly every house I planted spoons, canisters or jewelry, and find it pleasant, instructive and profitable. My brother in 19 days cleared $612.40. Knowing that there are many desiring an education, who have not the necessary means, I trust that my experience will be to such, a joyful revelation. By sending 25 cents to The Zanesville Chemical Co., Zanesville, Ohio, you will receive directions for making Gold, Silver and Nickle solutions, with the necessary instructions for using them, and in one hour's practice you will be quite proficient. NELLIE B.

The University of Berlin has seven thousand, two hundred and eighty-six students matriculated this year. Of this number six hundred and thirty-two are foreigners, and 7,654 are German. It is estimated that during the past year the number of students in attendance at the German Universities has been more than doubled.—Ex.

PREMIERE QUALITE CIGARETTE.

A SURVEY ARTICLE.

As an appetizer before the main course, studies of the world's great cuisines are often accompanied by a similar examination of cigarette habits. For example, the Orientals and the Chinese have long been known for their regard of tobacco, which they often use in the form of a pipe or a pipe and a pipe and a pipe and a pipe... A few years ago, a study was undertaken to determine the true extent of the Orient's cigarette consumption. The results were staggering.

The Orient is the home of the finest tobaccos in the world. The Orientals have long been known for their efforts to cultivate the finest blends of tobacco, and their efforts have paid off handsomely. Today, the Orient's tobaccos are sought after by fanciers the world over.

In conclusion, the Orient is the home of the finest tobaccos in the world.
Iowa City will wait some time before it sees anything better in the way of amateur acting than was presented last Wednesday evening. The Hesperian, “School,” in four acts, with music by a fine orchestra, made a program of good length and excellent quality. The happy assignment of parts by Mr. Pendleton was the key to the success of the play, and the indomitable energy of Manager Prosty, was repaid by the manner in which each did his duty at the final rehearsal. The greatest surprise was the acting of Mr. Pow- ers, as Beau Fairintosh. It was quite professional. Miss Slaterbee showed much historic power and divided the honors as star with Miss Degan. Miss Stimmel and Carl Lighy won much applause. Mr. Keye made a fine villain.

Chaffee fulfilled all our expectations, and Prosty was “everybody’s darling” from the moment he appeared. All speak in the highest terms of the entertain- ment, and it is only to be regretted that the lateness of the season and the unsettled state of the weather prevented the large audience the performance merited.
