Base Ball.
The first match game of base ball will be played at the ball park next Saturday afternoon with Cornell as our opponent. We understand Cornell will put a strong team in the field and S. U. I. should lose no opportunity of practice the remainder of this week.

Chess Games.
The additional moves made in the Minnesota—S. U. I. games since our last issue are:

<table>
<thead>
<tr>
<th>Game No.</th>
<th>S. U. I.</th>
</tr>
</thead>
<tbody>
<tr>
<td>K B to K 3</td>
<td>Q to Q 4</td>
</tr>
</tbody>
</table>

at the University, both faculty and students, as well as by many friends in Iowa City and the State in general, with great pleasure, as Major Read is one of the most popular members of the Faculty.

No. 83.

Spectacles, etc., a Specialty.

100 Washington St. - Iowa City

We Are Sole Agents for the new Dunlap hat.

Also Latest Styles in the Celebrated Knox.

Coast & Easley

Call on Bloom & Mayer for clothing and hats.
An object of this lecture was to trace the geological succession of animals. A striking homology exists between the bones of a bat's wing and the human arm; all the bones of the one are found in the other, the one differing from the other only in relative proportions. This together with many instances of a similar nature goes to prove the close relationship which exists between various classes of animal. Zoologists today recognize about nine sub kingdoms, 8 of which are vertebrates and the ninth composed of vertebrates. The vertebrates are again divided into five classes, fishes, amphibians, reptiles, birds, mammals. Of these, fishes form the lowest, mammals the highest class, i.e. they show the most highly developed organisms. When life began is still a mystery which science is unable to reveal. Zoology, however, teaches that there was a time when no life in any form existed and how from the earliest archaic age living things of various form and figure have either become extinct or have through successive changes and modifications passed gradually into the creatures that we see about us to-day. The lecturer showed by means of the animal family the successive stages of development. First come fishes, then amphibians, fishes and reptiles, next birds and reptile-like mammals, and finally the tree divides into two distinct branches giving us birds and mammals. Man stands as the grand culminating figure in nature's magnificent scheme.

Livery.

If you want anything in the livery line call on Foster & Leuz. They keep everything new and stylish. Stables opposite City Hall. Students' trade solicited.
