Field Day.
The Field Day committee has made the following appointments for officers of the day, Saturday May 7th:

Major G. W. Read, Chief Marshal;
Professor Andrews, S. E. Ure, L. '93;
O. W. Anthony, Judges at Finish;
Chancellor McClain, F. Woolston, '94;
F. Faribiah, '93, Field Judges;
Professor Veblen, Weld, Jameson and Hayes, Time Keepers;
H. F. Kallenberger, Starter; H. Myers, '93, Clerk of Court;
C. D. Reimers, '94, Scorer;

The Field Day meet will be held at the Fair Grounds. This is a change which is to be commended. The expense will be more, but the advantages of a good track and properly measured distances will more than compensate for the extra expense by the satisfaction of knowing that the records made are right. Twenty five cents admission fee will be charged and ten cents additional for a seat in the grand stand. All entries must be made by Thursday noon. Names may be handed to Feller, Gillette, Larrabee or Sollenbarger.

Field Day Entries.
At ten o'clock to-day the following entries for Field Day contests had been left with the committee:

100-yard dash—Crum, Clemens, Blair, Clark, Grulwll, McCluskey, Neal, Park, Sindlinger, Robinson, Rowell, L. '90, Hammon, L. '93, Virtue, L. '96.

220-yard dash—Clemens, Rowell, Crum, Clark, Grulwll, McCluskey, Powell, L. '95, Park, Robinson, Crum.

440-yard dash—Clark, Grulwll, Robinson.

100-yard hurdle—McClusky, Doty, L. '93, Gillette, L. '93.

220-yard hurdle—Doty, Gillette.

Standing broad jump—Grulwll, Ferren, Park, Gonzales, '93.

Mile walk—McCarron, '95, Robinson, L. '93, Powell.

Pole vault—Burnham, L. '92, Ferren, '92.

Running high jump—Ferren.

Hop, step and jump—Ferren, Doty, Dawson, L. '90, Virtue.

Hitch kick—Doty.

Putting shot—Ure, L. '93.

Throwing hammer—Ure, Sanford, '93, Ferren.

Tennis doubles—Neal and Morse, L. '93; Anthony and Lomaz, '94.

Tennis singles—Morse, Neal, Gillette.

Running broad jump—Dawson, Ferren, Doty.

Standing high jump—Ferren.

All-around—Doty, '94, Park, Ferren, Ure.

Half mile run—Blakeley, Beard, Cochran, Hammon, Wilson, Robinson, White, Thompson.

The entries will close Thursday, promptly at twelve o'clock, noon. There are yet a great many who are intending to enter who have not done so. All entries must be made by members of the association. It costs $1 to join. Several events have as yet not been entered for. The committee on entries is Larrabee, '93, Sollenbarger, '92, and field captains Fuller and Gillette. Hand in your entries at your first opportunity.

Inter-Class Base Ball League.

To the Executive Board:

Your committee having been requested to decide the recent game between '93 and '94 submit the following report:

It is unanimously agreed that said game belongs to '94, for the following main reasons: viz.

There was no official time for the calling of the game, the testimony of both classes showing that the notice of time was posted by but one member of the Governing Board, without consulting the other members, and hence the umpire would have no authority to declare the game forfeited on account of time.

As a secondary reason; The constitution provides that "Each class shall play with every other class according to the schedule arranged by the Board, with the consent of the managers." (Art. 6).

The evidence presented, showed that the managers of '94 did not consent to the game above required until after reaching the grounds.

Nevertheless, the committee believes that the question of time alone, is sufficient to decide the game without the above question.

O. W. Anthony, FRANK RUSSELL.

There are 330 women in the University of Michigan.

'95 0 0 0 0.000

Iowa League Games.
The first game of the Iowa Inter-Collegiate Base Ball League, was played at Marshalltown on Saturday, between Iowa Agricultural College and Iowa College. In spite of rain and muddy grounds the game is said to have been a fairly good one. The Agricultural College won, score 8 to 6. Batteries, for I. C. Zaut and Strong; for S. U. I. Reimers and King.

S. U. I should have played Cornell here on the same day, but rain prevented. The remaining games of the schedule, which we printed in full some six weeks ago, will be as follows:

May 15, S. U. I. vs. Drake, at Iowa City.

May 14, Drake vs. I. C. at Grinnell.

May 21, S. U. I. vs. I. C. at Grinnell.

May 21, Drake vs. I. C. at Ames.

The Game With Cornell.
Rain prevented the Cornell-S. U. I. game scheduled for last Saturday. The Cornell team and contingents began to arrive in the city about noon. Fears of rain were at that time entertained, and about one o'clock the rain began to pour and continued so to do for several hours. Most of the Cornell players and noen went home via Cedar Rapids. The next game with them is scheduled for Saturday, May 14th, at Mt. Vernon.

Notice.
Applications for Tennis courts have been made by the following parties in the order here shown:

The above parties please call at Professor Weld's office and make selection from plot of campus at an early date.

Unreasonable delay on the part of those standing first in the above list cannot be tolerated. By order of Athletic Committee of Faculty.

Thurston of Omaha, Hon. M. M. Estes of California, General Alger of Michigan, all of whom have accepted the invitations sent them by the club of the University of Michigan. It is to be hoped the S. U. I. club will hold a meeting at once and elect one or more men who are interested in active politics in the Republican party to go to Ann Arbor at this time.

Erodelphian

On account of the bad weather the audience which gathered at Erodelphian Hall Saturday evening, was not as large as usual, although the program was an excellent one.

The Erodelphian chorus opened the program by a spirited rendering of 'Mush, Mush,' which was heartily encoraged. A dialogue, 'A Woman's Description of a Play,' was well given by Norma Garwood and Mary McGuire, after which Frances Rogers read the third chapter of the Erodelphian serial 'The Story of Hilderbrand.' Considerable ingenuity was shown in ex­tricating the heroine from a peculiar situation and the dialogue was good.

Master Schindhelm captivated everyone by an accoordion solo. The debate on the question, Resolved, That the State University of Iowa should have a Musical Department, was decided in the affirmative, Geneva Borne and Louise Alford affirming, Helen Bruce and Rose Henderson denying. An oration on 'Shylock' by Grace Burke, was given in a clear voice and with energy. It was followed by a declamation, 'Jepthah's Daughter,' by Bessee Bowman. The selection was a beautiful one and was spoken distinctly and well.

A comb chorus by the society closed the program.

Local and Personal.

Lieut. Read has returned from St. Louis.

T. Gunnison, ’96, visited in Tipton Friday and Saturday.

Rev. Dow, of the Christian church, conducted chapel this week.

Mary C. Holt, ’94, has secured a position in the Tipton Schools.

The campus was moved yesterday for the first time this season.

The W. F. Main Co. offers a gold watch to the winner in the mile run Saturday.

C. M. Mitchell, L. ’93, was called to Cedar Rapids Sunday, by the death of his sister.

Miss Theresa Peet, ’96, was initiated into the Kappa Kappa Gamma, last Friday evening.

W. M. Davis, ’96, has been elected President of the Alumni Association of the Iowa City Academy.

C. D. Reimers, of the VIDEETTE, went to Rock Island Sunday night to be gone three or four days.

After the Erodelphian program closed Saturday evening, the members adjourned to Fred’s for a Dutch treat.

Prof. Nutting delivered his second lecture last evening, in which he spoke especially concerning the geographical distribution of animals.

About twenty new books have been received at the library, among which are Burke’s Peerage, Abbott’s History of Greece, from the Jordan Revolt to the Thirty Years Peace, Dictionary of the Orders Religious, Zeller’s Socrates and the Socratic Schools.

The Geographical Distribution of Animals.

Professor Nutting delivered his second lecture last evening, in which he spoke especially concerning the geographical distribution of animals.

Wherever we go we find the world peopled by animals, of different kinds in different localities, but always of such kinds as are furnished means of life by their surroundings. It is not long since this distribution was regarded by even the most intelligent people as a provision of the creator, concerning which men have no right to inquire. Or if this distribution was at all studied it was supposed to be based on the variations of climate. When we consider, however, that in the region of Lake Winnipeg one thousand miles north of Iowa City, and possessing a climate very much colder than this, ninety per cent of the birds found are of exactly the same species as make their homes here, and in the country round about Reno, Nevada, where the climatic conditions are essentially identical with ours, the birds that are common are entirely at variance with ours; and when we note the quite different kinds of animals which flourished in the north and in the south Temperate Zones, we see that some other cause must be at work to produce this distribution.

Darwin and Wallace struck a truer key-note when they, each unconscious of the workings of the other’s mind, announced, at almost the same time, that this distribution is the result of the development of all the ages, from the time when life was not, until now. Wallace’s two laws, which he deduced after much study, that classes and orders are widely distributed over the earth’s surface, and that species and genera are embraced in much narrower limits, cast much light upon this subject.

These two men may be called the pioneers of scientific induction, generous tailors, who, instead of being jealous of each other, have held up one another’s hands.

The different species existing at present may be compared to the topmost branches of a tree, which are all from one trunk below. Here and there may be a view which at first blush cannot be accounted for, as the eponymum for example. This individual, however, by the aid of geologic investigations, is found to be a survivor of one of the oldest families. All his cousins have perished from this continent, they still exist in the Eastern Hemisphere, but he remains among us. Other animals which exist with apparently no allied species, have found their homes in particular localities on account of the migration of their ancestors centuries before.

Again, the transporting may be done without the animal’s volition, as by the wind and the tides of ocean.

The long flights of birds are nearly always assisted by strong winds, and many more animals are borne by the ocean than would be imagined. After a long period of separation these animals take on different characteristics, and thus arises a new species.

A sad thing to think of is the reducing of animal life so prevalent now. Unless this wholesale destruction be soon checked, man will soon be absolutely alone, the sole mammal in the world.

The Geographical Distribution of Animals.

LATEST STYLE HATS AND FURNISHING GOODS AT BLOOM & MAYER'S.
The sad news reached us this morning that Maggie Fouke, who died at her home, Agency, Iowa, Sunday morning May 1st. Miss Fouke entered the University last fall. She was taken sick in February and was compelled to go home. Since then she has not been able to leave the house, but her many friends still entertained the hope that she would recover. The sad intelligence of her death is a shock to her many friends and classmates at the University, all of whom extend to the bereaved parents heartfelt sympathy in this their hour of deep sorrow.

Saturday's Games.
