Two More of Its Scheduled Games

Last Saturday two of the games were played which are to decide the championship of the Southwest, in football, for the season of 1901. One was played by the teams of Kansas and Nebraska at Lincoln and resulted in a victory for the Jay Hawks, the score being 18-6.

The other game and the one in which our readers were most interested was between the teams of Missouri and Iowa on our own ball yard in Columbia, Mo.

Missouri has a fine team this year and one of the very scientific game of Rugby. Moreover every man on her team is a thorough gentleman and more likely to win than lose. The game of Rugby as it is played at S. U. I. have we so closely contested a game in which the good nature of every one was so marked.

The kicking and squall and all the decisions of umpire and referee and the consequent engendering of bad blood which often consumes so much time and wear out the patience of the spectators was almost totally absent and this is the highest compliment which we could pay not only to the players but also to the gentlemen who act as umpire and as referee.

As far as our own team although it was made up of as original a and substantially the same men who played in the game of the previous week, no one can say that they bore any hard feelings toward the others. Every man played with spirit and with a decided determination and there seemed to be a certain amount of hard sparring at times but not so much as to distinguish himself by some brilliant play. The team work too was far better than the week before and at the same time the blocking was simply perfect. Missouri's best gains were made by Young and Anderson on the ends and the interference for these runners was on the other hand exceptionally good. All schools the teams lined up as published in Saturday's paper except that Little was at left end instead of White.

At Tom Martin, of Kansas City, acting as umpire and Capt. Elihu, of Marshalltown, as referee.

S. U. I had the ball and M. S. U., took the west goal.

The Cornell start off with the ball in Myer's hands gained 20 yards and when linemen did not block he came in and got 5 yards, then on his third attempt the ball was fumbled and Cornell got it. Captain Elliott now played a few yards and one of which resulted in gain of from 2 to 10 yards and thus the teams moved down the field until Hess took the ball and then ran over for the first touch down. Rogers kicked the goal. Score, 6-0.

Missouri started with a Delandeyer V. M. S. U. on a fumble after a gain of 7 yards.

Collins, Aldrich, and Tyrell each got 15 yards and the line and then Hess made the finest run of his football career carrying the pig skin across 8 of the white lines and placing it 42 yards nearer the goal line.

Two lines played followed and Aldrich was pushed over the line for the second touch down. The goal was a very difficult one and Rogers missed his mark. Score 10-0.

M. S. U. next tried a wedge and gained 15 yards. Capt. Tyrell took the line admirably for 5 and then for 6 yards. He then tried the center but without gaining anything Anderson was given the ball and protected by some hard play and managed by up to his head round the end for a gain of 11 yards. This encouraged M. S. U. and by hard play they found the line men could not stop the advance. M. S. U. then ran the ball down 5, and 7 yards and over for their first touch down. Anderson easily kicked the goal.

Again the Cornell V. gains 25 yards for Iowa and Elliott got possession of the ball for Cornell, but Williams was given the ball and protected by some hard play and downed in the end for a gain of 11 yards. This encouraged M. S. U. and by hard play they found the line men could not stop the advance. M. S. U. again took the ball and sent him to play around the line. Anderson easily kicked the goal.

The ball became very slippery just before the interval and one who saw it on both occasions will fail to see what we mean when we say that it was impossible to gain any yardage.

Every man played with spirit and with a decided determination and there seemed to be a certain amount of hard sparring at times but not so much as to distinguish himself by some brilliant play. The team work too was far better than the week before and at the same time the blocking was simply perfect. Missouri's best gains were made by Young and Anderson on the ends and the interference for these runners was on the other hand exceptionally good. All schools the teams lined up as published in Saturday's paper except that Little was at left end instead of White.

The Cornell start off with the ball in Myer's hands gained 20 yards and then followed several line squall smash which gained from 3 to 7 yards until the ball was fumbled and went to M. S. U. Missouri then tried to kick out and linemen were not in position and such attempts the ball was fumbled and Collins got it. Captain Elliott now played several yards and one of which resulted in gain of from 2 to 10 yards and thus the teams moved down the field until Hess took the ball and then ran over for the first touch down. Rogers kicked the goal. Score, 6-0.

A Great Day for the Western Interm­ State Football Association.

Foot-Ball Notes.

The attendance at the Andover­ Easter games was 4,000.

The Cambridge University eleven of England, has won five successive games in foot-ball this season, scoring 8 points to their opponents 17.

Oberlin has not been defeated this season.

Ladies are admitted free to the foot-ball games at Michigan.

The Thanksgiving game between Cornell and Missouri college has been canceled. The cause seems to be in Cornell's inability of holding the big game. All the student body are urging the team to go and they have been forced to train after this week.

Up in the Clouds.

This marvelous day, which has just established the highest meteorological station in the world, according to the Cambridge from Professor S. S. Bailey, who is in charge of the meteorological station at Arequipa, Peru. The new station is on the top of the El Mist, a nearly extinct volcano of the Cordilleras, 19,300 feet high, or almost 8,000 feet higher than the station of the French Academy on Mont Blanc. The station was established with great difficulty, the adjustment of the clock-work instruments being done by self-recording, the temperature causing pen to go up and down, leaving the records of the variations on the bands of paper. The volcano will hereafter be climbed once a month, and the station visited, a bit having been built but a short distance down the kicked gable edge, should they be overtaken by storm or darkness - U. of M. Daily.

A Challenge.

The physical chemistry of the Ottoman Y. M. C. A. challenges any American college team in the State for a game.
In Thursday's issue we printed the announcement of the prize offered by Professor Perkins, of the department of History. We hope the efforts thus made to encourage historical study will meet with proper appreciation. There are many reasons which should induce students to compete for this prize. Chief among these reasons is that it will lead students to make independent historical researches along some definite line.—Continuing the study of history to classwork as it is so often done has a tendency to make students dependent not only in gathering facts but also in drawing conclusions. It must be admitted that a knowledge of history without the ability to draw conclusions from it is absolutely worthless. The seminarists which obtain this certain degree but in the work now proposed the student will be thrown more directly upon his own ability to make historical researches. The prize work as so often done has a tendency to make students dependent not only in gathering facts but also in drawing conclusions. It must be admitted that a knowledge of history without the ability to draw conclusions from it is absolutely worthless. The seminarists which obtain this certain degree but in the work now proposed the student will be thrown more directly upon his own ability to make historical researches. The prize work as so often done has a tendency to make students dependent not only in gathering facts but also in drawing conclusions.

The statement was made by one of the professors the other day in class, that he hoped our University would see the day when the students would have French and German tables at the different boarding places. This certainly was a valuable suggestion and while it has been carried on to a limited extent, it is certain of our students yet we believe that if more was done in this line a great amount of practical good could be derived from it. It is impossible for a student to become proficient in French or German conversation with the small amount of practical instruction which he receives in the regular class work. Such stu-

blic should be formed with a limited number of students at each table. One person should be chosen to see that the conversation did not drag, and to observe all errors which might be made. To make such an undertaking successful it would, of course, be necessary to absolutely prohibit the use of English words and to criticize the speaker so closely that he would use every care and diligence to perfect the language. In this way we believe the student would not only increase his vocabulary, but would gain a fluency in speaking foreign languages which could acquire by hours of persistent toll over books.

Notice.
The 16-pound Hammer Throw will take place at Bell Park, at 3:30 p.m., today.—Today. Contestants and judges please take notice.
