The Vidette-Reporter.

The steps taken by the class of '98 at its first meeting in regard to a class society is one deserving of commendation. The lack of proper social advantages is one which touches the interests of every student and for which there could be no possible excuse, and class societies are factors in the prevention of any such state of affairs. Too often the student pursues his college course to its end with scarcely a speaking acquaintance with those with whom he comes in daily contact. Good work is by all means desirable, but no one can afford to seclude himself entirely from his fellows. There is nothing incompatible in hard work and social culture. To be able to move freely and easily among his fellows is a part of the student's education which no other phase of his college training can supply. Let us then encourage all efforts looking toward better advantages in this respect and improved conditions for well rounded character.

It has always been the aim of the Vidette-Reporter to keep the student in close touch with the affairs of his college world—to serve as a chronicle of anything of interest in athletic, literary, and all other lines in which the student may take an interest, as well as giving information regarding our sister colleges. We thoroughly appreciate the support we have received in the past, and although it is not characteristic of us to complain we wish to be put in giving vent to one gentle moral. Briefly stated it is this—not by our college papers are receiving the support from the students which they deserve. The values of a college paper to the student is so well known that a detailed explanation of this important feature of our college life is unnecessary. Every progressive and legal student should be a subscriber to at least one of our college papers and we think would have no cause to regret the fact had he taken both. But if he feels that he cannot afford to take both, he should take one—if the Vidette-Reporter does not suit him let him take the Quill, for he can ill afford to be without one of our college journals.

Fall term will open September 9, I911. Do-

be followed. Each student will have to leave their addresses with Mr. John

fore the opening day.

"The medical department must be
free from "swaps" and other unseemly
disturbances," was the order that went
forth last year. Although the clause
was emphasized by a large number of sus-
picious cases, the men were not
thoroughly learned apparently. Three of the victims of the penalty of sus-
pension engaged in a too lively "swaps"
and was arranged before the Faculty as a
result. Wednesday they were
suspended for three weeks, and the punish-
ment will probably tend to prove
that the Faculty is in earnest too.—Republican.
