Harrow's Evaluation.

Harrow's form VIII, at the close of the season, occupied a position of some importance—a position in which it has succeeded all others,--a position which it now may be said to have maintained for some years,--and which would seem to satisfy the teaching authorities of the country,--in many respects. The school has always been noted for its high standards and the excellence of its teaching. The form VIII, in particular, has consistently shown a high level of performance, both in academic and extracurricular activities, which has earned it the admiration of the school's trustees and the respect of its peers.

The following comment, to make on their work, may be said to be the most significant aspect of the school's evaluation:

President Charles F. Thwing, of Western Reserve College, has an able article in the November North American on "Hustlers of the College in American Life." The American college is characterized as an "A mother of men rather than a nurse of scientists," for it has rendered a service of great value in training men thus in promoting scholarships. The ministry enrolls the largest proportion of college graduates. The large majority of the lawyers of the United States are not college-bound, but every Chief Justice of the United States except one has been a college graduate and more than two thirds of the associate judges of the Supreme Court, and about two thirds of the present Circuit Court judges have had the benefit derived from a collegiate course.

The Riverside Magazine has a very interesting four column article, enti­ tled “An Evening with Octave Thuet.” It is by Mrs. Leaders Baker of Iowa City, and generally describes the time she was given to Miss French for the benefit of the S. U. T. Athletic As­ sociation last year.
