IOWA CITY, IOWA, SATURDAY, MARCH 20, 1897.

BACONIAN.

The paper of the evening given by Mr. Richardson.

Mr. Bowman delivered a paper on the "Wave Theory of Light."

It was his first brief with the subjects that have been held in the past and then discussed the modern theory, illustrating the lecture by many diagrams on the blackboard and by a number of experiments. He showed a case of simple diffraction by a knife edge; the spectrum by a diffraction grating; interference fringes of soap films; Newton's rings double refraction by a crystal of Iceland spar; and the effect of a beam of light in a uniaxial and biaxial crystal. This paper was discussed by Professor Patrick, Veicken and Andrews.

Upon a call for voluntary reports, Professor Magaw ane an account of a certain occurrence in the summer in the northeastern part of the county. About four weeks ago in the afternoon a farmer heard a violent report. While crossing a pasture about an hour later he noticed a fresh hole in the ground of irregular shape and about six inches in diameter. About a month later Professor Magaw ane investigated and found that the hole extended into the ground for a depth of twelve feet. At the bottom of the ground there was found a stone, which showed to the audience. The nature of the stone makes it impossible to say whether it is a meteorite, and yet how could the circumstances be explained satisfactorily? The matter was discussed last evening, but no conclusion was reached.

There will be no Barouche meeting next week.

The Athletic Situations.

It is so far as material and game schedules are concerned our prospects are very encouraging. There are thirty-four candidates for the base ball team and five of them pitchers. It is Captain Thomas intention to try for the second time active outdoor work at the opening of the spring term. The make up of the team will not be decided until three or four weeks later, and at that time will not be sure of holding his position on the team. A second team will be placed in the field. This will serve two purposes, I. In case of illness it is possible for more than one man to work on the team; this team will give more work to all the base ball players. It is not expected that the team will play more than four games, if we are not fortunate enough to have all the games of the spring. The game of the team will be decided on the third or fourth week, and at that time will not be sure of holding his position on the team. A second team will be placed in the field. This will serve two purposes, I. In case of illness it is possible for more than one man to work on the team; II. In case of illness it is possible for more than one man to work on the team; III. In case of illness it is possible for more than one man to work on the team; IV. In case of illness it is possible for more than one man to work on the team; V. In case of illness it is possible for more than one man to work on the team; VI. In case of illness it is possible for more than one man to work on the team; VII. In case of illness it is possible for more than one man to work on the team; VIII. In case of illness it is possible for more than one man to work on the team; IX. In case of illness it is possible for more than one man to work on the team; X. In case of illness it is possible for more than one man to work on the team; XI. In case of illness it is possible for more than one man to work on the team; XII. In case of illness it is possible for more than one man to work on the team; XIII. In case of illness it is possible for more than one man to work on the team; XXX. In case of illness it is possible for more than one man to work on the team.

At the University a large number of McClintock's Criminal Law was placed on the library on Wednesday. A glance through the excellent analysis of the book reveals the layout of subjects and the comprehensive treatment of the different branches of the law of crimes. The work must be revised before publication, and it may be in very useful in reviewing Professor Bluestone's lecture course on Corporation Law.

A member of McClintock's Criminal Law was placed in the library on Wednesday. A glance through the excellent analysis of the book reveals the layout of subjects and the comprehensive treatment of the different branches of the law of crimes. The work must be revised before publication, and it may be in very useful in reviewing Professor Bluestone's lecture course on Corporation Law.

Board of Regents' Actions.

The Board of Regents made the following appointments: granted leave of absence, and conducted the usual business during the week, as follows:

At the request of the Board, Professor McClain's new position at Marshall College in the spring term was ratified.

Mr. L. P. Andrews was voted $100 to purchase X-ray apparatus to be used in an exhibition before the medical society, at Marshall town, in the spring.

Dr. S. N. Watson was elected assistant professor of the Chair of Theory and Practice.

Dr. S. Calvin was given a leave of absence for two weeks in April and asked to attend a course of lectures to be given at Wabash, Ind. Three will be delivered at Marshall University, by Professor Gekkie, the famous English geologist.

The building committee was authorized to consult with the Collegiate Faculty in regard to rooms, space, and the buildings, and to decide whether the Regents have the power to dispose of any as the Board may see fit. An effort will be made to secure the proper rooms for the College, but also to secure $10,000 or more to be spent in needed improvements.

Law Department.

Examinations occur next Wednesday and Thursday.

Regent Swine gave the Seniors an entertaining talk Tuesday.

Wednesday morning the Seniors were met by a complimentary address by Mr. Gilbert M. N. of Greenfield, a member of the Board of Regents. Owing to the very bad weather, the Seniors have been confined to their home rooms and have received a notice of Friday was the last and only time they will be treated with the same honor.

Senior members adjourned for the March term on Tuesday. The Session will be closed next term.

The initial volume of McClintock's Criminal Law was placed in the library on Wednesday. A glance through the excellent analysis of the book reveals the layout of subjects and the comprehensive treatment of the different branches of the law of crimes. The work must be revised before publication, and it may be in very useful in reviewing Professor Bluestone's lecture course on Corporation Law.

Professor Seeds was called to Manderson Thursday on account of the death of his mother, Mr. Louis Paton, of this place.

The following is the new class yell adopted by the students for the new term:

Big Jim, big Jim, big Jim, big Jim, big Jim, big Jim, big Jim, big Jim.

Vanities Town, Iowa Law.
The Vidette - Reporter

The Reporter has recommended acquaintance to the University of Iowa.

President Schaeffer has recommended to the Board of Regents to erect a building, one should be erected which should cost not less than $100,000. This we think a splendid suggestion. It would of course absorb the entire building appropriation for the next three years, and thus it would seem that we could not see the plan realized at least obtain the money for it until the end of the fourth year, the appropriation being $50,000 per annum, and this year's appropriation being absorbed in building the new hospital. But our President has also suggested another very plausible plan by which we could see this handsome edifice erected upon our campus at the end of two years. The matter will come before the Board of Regents at their June session, and we hope to see some steps taken in accord with this plan. Our large building on the fine site that the campus offers would be far more imposing and impressive than a number of small buildings sprinkled about here and there, and we believe that the expense of preparing the sites and erecting several small buildings, would be far greater in proportion to the advantages gained therefrom than if they were all combined under one roof. It would be necessary to expend this sum to procure a building which would represent the outward symbol of the University being made, and the reputation she has been building for herself among sister institutions.

According to our custom, as the term's work ended yesterday, we close our work for the term with this issue. The vacation which will soon release us from our toils is indeed very short, but in those few days' respite from labor we hope to recuperate somewhat from the mental exertions of the term just closing, and also to prepare for the more exciting spring term. We sincerely hope that every one feels satisfied with the work they have done this term. If one is dissatisfied with the work done throughout the past two and a half months it is almost impossible to change it materially in the few days that remain.

We need now to store up energy in view of the approaching spring term, for just as spring and the beautiful May days come, there will come that inevitable "paralysis" -- the temptation to leave our studies and indulge in driving, boating, cycling, tennis, base ball, and a number of other spring sports and recreations. We do not advocate the plan of hiding away in the room and "pouring" unceasingly over texts and notes. The person who doesn't indulge in some of those life giving spring recreations is not getting out of life all there is in it.

It is seldom that the average man needs urging to get out of doors during this coming season of the year, but it would do well to consider the admonition to be moderate. In sympathy, Map out your work, give it its due to your studies each day the time necessary to master them. Then do not let temptations break in upon what you have planned to do.
