A STUDENT RIOT.

A snow-ball contest between the opponents at the University of Nebraska; and perhap the police tried to interfere in the building began to pelt the panel which the entire required to be the end of the order were. At the end of the field medicine and the police were the number of policemen den~.

The outcome of the contest over the student's western intercollegiate, came out of the meatless with no building. Mr. L. H. Harnett, class of 98, is bound to have a law.

There will be a meeting of the American Whist Society, Friday evening. The original program is planned.

Mccarty, class of 98, was called home on account of the illness of his mother. We hope the boy may soon be home, to his own familiar.

The Honorable M. J. Wade addresses the Johnson County Homœopathic Medical Society, Wednesday. The subject of his address was "Medical Evidence."

We noticed some typographical errors in the wording of one part of the clinical report published last week, which may make it appear that there were 377 surgical cases treated in the hospital since the first of the year. These figures are the total number of cases, surgical and otherwise, that have been treated in the hospital since the beginning of the college year.

No Degrees for Women.

The American Whist Society and the Student Union has been the subject of much attention in the past few weeks. Professor Nutting is delivering a short course of lectures on Comparative Ophthalmology to the Seniors and Juniors this week.

Dr. DePuy delivered the last of the lectures in special pathology, Tuesday. From now on the time will be taken up with review work.

The Boston Dental Society will hold its thirty-seventh annual meeting Thursday evening, Feb. 18th. A very interesting program has been arranged.

We understand that the date for graduation has been changed from March 28th to March 25th.

The change was noticed with much favor by all the Seniors.

S. U. I. TO DEBATE NEBRASKA.

The Forum and Debating League have agreed upon conditions relative to the contest with Nebraska, and the debate which the event now rests on, the completion of the arrangements between S. U. I. and Nebraska University.

This marks a new epoch in our debating history, and an important advance in debating interests. No definite place of holding the contest has as yet been agreed upon, but in all probability it will be at Omaha.

The Forum is a strong society; and we need not fear but its representatives will not uphold the previous debate record of S. U. I.

Resolutions of Sympathy.

Whereas, it has pleased the all-wise Father to remove from our midst our esteemed friend and classmate, J. B. Bideson, and Whereas, we appreciate the fact that in this sad bereavement we have retained a love that can never be replaced: therefore, be Resolved, that we extend to our fellow-member the sympathy which is our bounden duty, and the love that is our due.

No doubt the family, the friends, of the deceased, and the members of the class, will be comforted by the memory of the brave and noble student who has gone home for a few days' visit.

We, the under signed, believe that the freshman class has had a very happy and useful term, and have expressed the hope that the men will be happy and useful in the years to come.

The "Law of Whisk" as adopted by the American Whist Society.

FRESHMAN SOCIETIES.

The following resolution, as printed in the Pennsylvania Gazette, shows to some extent the manner in which class spirit is carried on in the eastern colleges.

At "a meeting of the Student Committee, held last Monday, the question of the Freshman class and the Freshman class and the Freshman class and the Freshman class, was taken up, and the following plan was drawn up to be suggested to the four classes:

"That since the Freshmen have not acted without precedent in this matter, and since they have already started their class pipes, and in order to prevent any disturbance of the Freshmen, a contract must be established as a university custom which shall in this case be decided by the right of Freshmen to smoke class pipes.

"The contest suggested by the committee is essentially a jog of war, forty men to be on each side, and the contest to last for fifteen minutes, the details thereof to be left to the two lower classes. It is also suggested that if the Freshmen win they have a large pipe about two feet long, made and present it to the present class day to the best athlete in the class. If this plan be followed the Freshman pipe committee will not deliver the pipes to any Freshmen but keep them till the Sophomore year. The name of the pipe "sage" was suggested for this contest.

We, the undersigned members of the Athletic Union, hereby present the nomination of W. J. McKeon, for the office of Treasurer of said Union for the ensuing year.

The amount of money offered to the students of Chicago University in promotion of the games of the season.

Events Wren, an old Harvard ath­lete, now of Chicago, has made a statement in which he says he would be the most important in the attempt to change the foot ball rules without consulting the players, and that he would not agree with Wren, and as deeply does he oppose the changes proposed that he has prepared an answer to the charge, as his brother P. Wren, to bring to the committee the rules made in the rules.

The amount of money offered to the students of Chicago University in promotion of the games of the season.
THE VIDETTE-REPORTER.

It is perhaps some consolation by
the punished ones to know that they
have the sympathy of the student
body, as testified by the presented
petition, and the majority of the resi-
dents of Iowa City, to know that peo-
ple who have a chance to be informed
on such matters, and whose judgment
certainly could be relied upon, are
firmly convinced of the fact that the
punishment was too severe; to reflect
on the other hand, that subsequently
the action was taken largely to paci-
cate an outside world, people who were
informed largely by false reports,
and since they had no means of ascer-
taining the facts, became conse-
quently very alarmed.

To reflect upon this may afford
much consolation but no remedy.

To see students in this University
repeatedly and constantly indulge in
practices and conduct amply deserving
outright expulsion, and yet go unac-
knowledged and unpunished by autori-
tative action, and then to remember the
slight participation by some of the
most upright, industrious and straight-
forward students, who have, in an af-
fair which custom had maintained for
sixty years, and which was practically
upheld by the Faculty only last year,
causes an indelible stigmatising of
this and think of the blasted hopes in
young breasts that never dreamed of
wrong, is indeed gratifying to any ob-
server, but the laces have proclaimed
and now, only the memory of the un-
fortunate circumstance remains, and
where might be right and a misinform-
ed public must be appeased, nothing
is left to do but abide by the decision
—and think.

Beware of Quants for Catarrh
That Contain Mercury.

It is most important to de-
ceive that “cure” is universally
condemned, not only as energy
wasted in regard to the bettering of
the mind, but as being an actual
injury to future study. If a student
is so far held in any noisy that he can
not stand at least a fair examination
at any time, it is sufficient proof that
his work is too heavy. It ideas can
not be retained throughout a term
what possibility is there of retaining
them through life.

First. If mercury will surely destroy
the sense of smell and completely
deface the whole system when entering
it through the mucous surfaces. Such
articles should never be used except
on prescriptions from reputable phy-
sicians, as the damage they will
tend to the good you can possibly
drive from them. Hall’s catarrh
true and is internally, acting
cure, being made by T. J. Cheeney &
Cous, contains no mer-
cury, and it is internally, acting
directly upon the blood and mucous
surfaces of the System. In taking
Hall’s catarrh cure be sure you get the
genuine. It is taken internally and
is made in Toledio, Ohio, by T. J.
Cheeney & Co. Testimonials free.

A Striking Contrast

In observance of the Cash Coupon System in the
Laundry Business and the Old Credit System.

By paying for your book in advance you re-
cive a liberal discount and you know that your
Laundry will be called for and delivered without
the least chance of any error being made in
charging up the account as in the old system.

Our aim is not to do the cheapest work, but the
best work possible, at a reasonable profit.

You must pay for the work some time.

Why not in advance if it will save you money?

Three caramels are made from the finest clove smoke, ground and mixed with the finest tobacco from Virginia. They are then put into an exclusive blend of Virginia and Kildare tobacco, and are packed into the finest Private Stock pipes, and are put in the hands of the best cigar store man in the world.

Notice to Athletic Union.

By reason of the fact that only two nominations have as yet been made for the several offices to be filled at the coming election of officers called for Tuesday, Feb. 10th, as provided for by the Constitution, this election is hereby necessarily postponed, and will occur Saturday evening, February 26th, at 7 o'clock. At this meeting all officers of the Union for the current year 1886-87, including the managers of the track and base ball teams, are to be elected. The Union is currently solicited to see that competition for these offices is aroused, as this is the only means possible to create and insure a healthy athletic and literary spirit and sentiment in S. U. L. Nominations must be published in the University paper or before Saturday, Feb. 19.

J. B. FAILEY,
President, A. B. Degree.

Cornell's A. B. Degree.
Many people have heard the phrase of the A. B. degree at Cornell would decline and decay on account of the changes that were made in lowering the importance of Latin and Greek as entrance requirements. Those people will be surprised to read that out of one hundred and thirty-Freshmen (September 9th) in arts, one hundred and twenty-eight offered Latin for entrance, while only nine availed themselves of the permission to substitute a combination of advanced French, advanced German, and the higher mathematics. Of those who studied Latin, eightytwo combined a modern language with it, and forty-seven combined it with Greek. Those who offered Latin, with a mod- lem language chose German, in fifty-four instances, and French in twenty-seven.
