GRINNELL GAME SATURDAY

WE MEET OUR OLD TIME RIVALS ON HOME GROUND.

After playing seven hard games, sufficient to themselves to constitute a schedule more than ordinarily severe, after shutting out the opposing team in all but one of the seven games; after out playing Chicago at every pitch of the game, and holding them to but one place-kick against our well trained backfield; after successfully defending our goal against the best line smashers and the relentless backs that ever played on western gridirons, with such an untarnished record, the University of Iowa football team are to play Grinnell with their old time worthy googins, the men from Iowa College.

“Hi-Ball! Hawk! Hi, Hi! Hawk! Hawk! Hawk!” is the slogan that will burst from the throats of hundreds of old gold admirers as the football team in the game of snap and vigor, served to the snuggle defective by a team of a brilliant victory. Grinnell is situated in the history of any former team in the state of Iowa.

Grinnell will play.

Grinnell will play.

Grinnell will play.

Grinnell will play.

Grinnell, Grinnell, Grinnell, will be the retort of the scarlet and black.

“Grinnell will play football, too. They will play football, too. They will play football, too. They will play football, too.”

When Grinnell defeated Western College 40 to 1 we nodded complacently and said that they were all that was required. Professor Stokol searched the Grinnell's key 5-6-5 in our minds dropped them from further consideration in connection with the championship. When the Normalities scored 4 in the 12 we knew they weren't in it. When the Owl Minnesots a week later, after the latter had beaten Ames we opened our eyes-wide, when they scored 6 and shut Ames out 40. Now that we've recovered we've gone to work in earnest and if the Grinnellites beat us they will play football.

When will Grinnell play football, too.

They always do when they play Iowa. They make it the battle of their football year. And Grinnell will make it a battle for an extra notch, clinch their hands, grit their teeth tighter than ever, and enlightened by the instruction wise Henry Brown has given after seeing contest against two games, they will give us the hardest battle of our career.

Whatsoever may be the score in the game, the men who will be present will see a game worthy seeing and bet anyone he may not get enough for his money, the men who admit to the Grinnell game will also admit to the Preliminary game which bears our excellent second eleven and the Coe College team.

The Coe boys will arrive about 6 o'clock on a special train from Cedar Rapids accompanied by 300 routees and citizens of Cedar Rapids. The Coe will be called at 12 o'clock and the Grinnell game at 3 o'clock.

“Cyclones” Defeated.

Week's real test was responsibility on our part in preparation for the game for a part of a large Ames aggregation at Des Moines yesterday afternoon. Although Grinnell had all the tools, went across the goal line for a touchdown, Grinnell allowed the ball to get so that five attempts at deep kicks from the field were tried, three of which were successful, scoring points for Grinnell, the only score done in the game.

The game served to show Grinnell's superiority in the kicking department. Fred out passed our opponent on every exchange, and the fast work and score including the ends prevented any return to the part of Ames. In fact, this superiority was so marked, that Grinnell frequently punished on the field, taking no other attempts to advance the ball, Ames on the other hand, executed in bucking, and made good gains through the line with an occasional spur around the end. Ames lack of concerted work both on attack and defense was very noticeable, and it is proper to give the men much hard work when the preliminaries were for the Iowa State game at Des Moines November 1st.

Chicago Loses Wellington.

By order of the Athletic Board of Chicago University—"Duke Wellington" is out of the game for good, unless he burns a little midnight oil getting up back work in his studies. His disqualification may be a good thing for the team, at least in its moral effect on the practice, for the continued working of the cup and hat has made the other players feel that unless they could do otherwise, they were being left behind. As a result, President Van Horne of Chicago announced that any other cutting practice will have to be discontinued.

Mass Meeting!

Preliminary to Grinnell Game

President Elliott of Harvard recommends that the following division for the day: two hours for study, eight hours for sleep, an hour for meals and social functions. —Ex.

IOWA'S DEBATES.

CONTENTS THIS YEAR WITH WISCONSIN AND MINNESOTA—MENTION OF IOWA'S DEBATES.

Iowa will hold debates this year with the Universities of Wisconsin and Minnesota.

The debates with these institutions last year resulted in a victory for Wisconsin over Iowa at Madison and a victory for Iowa over Minnesota at Iowa City.

The Wisconsin debates come to Iowa City this year and the Hawkeye debaters hope to show Wisconsin a close contest when deciding the home platform form.

The Minnesota debates occur this year at Minneapolis.

The debates on these topics are chosen by preliminary contests between chosen representatives of the two forensic societies, Irving Institute and the Zetagathion society. The society which wins the preliminary chairman two debates for the final contest and the losing society one. The preliminary for the Wisconsin debate will occur sometime this term and for the Minnesota debate early next term.

The debates on these preliminaries were chosen during the spring term of last year and have since been worked upon the questions the thoroughness that characterizes Iowa's successful debates. The preliminary debates are the picked men of the societies in debate and represent the oldest and smartest talent of each. With two exceptions all of the twelve men have been on previous pro's or counter-class debates and hence said to be the result of the evolution process of the survival of the fittest.

Irving Institute has elected M. M. Moulton, F. B. Merrick, and J. M. McCarty to the Wisconsin professors. Geo. Fletcher, Jas. H. Hurst, and H. A. McCollum from the south half will oppose them. The Minnesota preliminary debates will be conducted on the part of the Zetagathion by M. L. Foss, W. C. Young and A. P. Spreer, W. H. Chamberlain, J. E. Finkham, and L. R. Elliott of the followers of Irving will oppose them.

Three familiar undergraduate faces will be absent from the platform this year, those of R. G. Ogden, M. V. Bulkey and H. B. Noland. They are considered three of the best debaters in the University and had they been able to appear there would have strengthened the inter-state debates significantly.

Besides the preliminary debates the contentions for the inter-class debates have been chosen. The Sophomore debate takes place around the middle of the winter term and in it appear Merric Beck

B. C. Collins and then, Casey the Irving's and J. W. Morse, F. H. Randell and G. C. Goodwin for the Zetagathion.

Ray A. Church, W. F. Mose and C. C. Converse for the Zetagathion and F. C. Drake and C. C. Cox, with a college yet to be chosen, will debate on the Junior stage.

The following is the record of the large eastern colleges against their different opponents as for this year: Harvard 19, oppositions 15; Yale 115, oppositions 11; Princeton 98, opponents 11; Pennsylvania 110, opponents 17; Columbia 160, opponents 17;—Daily Cardinal.

BACONIAN.

VOLUNTARY REPORTS THE ORDER OF THE EVENING.

CONTINUED FROM TUESDAY.

This week a topic has been discussed "Slime Molds," exhibiting living specimens under the microscope. Slime molds have much the looks of animals. In early stages they resemble the Amoeba, while the mature slime molds are essentially like fungi, having cellular walls, but lacking hyphae to form threads. Slime molds vary much in size and color; may grow on decaying wood, or be found as a mold on the surface of a toadstool, preferring dark and moist soil and possessing limited powers of locomotion. At the present season the plasmodium of a slime mold may go forward, surrounded by cellular walls, and remains dormant for several months.

"The Behavior of Ice in Lakes of Northern Minnesota" was announced by Professor Calvin. The ice forms a considerable depth in winter. Ice has a large coefficient of expansion. The surface of the ice may be broken throughout the whole night. The rills fill with water and freeze again. Professor Calvin stated that he has undoubtedly repeated the experiment causes the crack that was generally upon the sloping shoring, pushing sand, gravel and boulders downward. When the ice melts in the spring, the ice breaks and goes off in sheets. These deposits for many years finally form a ridge or wall around the lake, as at Clear Lake, photographs of which were exhibited. A marsh is usually formed between the "wall" and the high shore. Wall lake is surrounded by a ridge of boulders. These "walled" lakes have formerly occupied areas had their banks constructed by the shorelines through their formation is now known to be due to perfectly natural causes. This is due to the plasmodium of the English physician and Dr. Murphy of Chicago in experiments on dogs, and more recently on human subjects, have succeeded in saturating large blood-vessels by the injection of a certain temperature, ensuring vitality of the parts before the injury.

""Brown's in Town."

This latest furious effusion comes to the opera house Tuesday night. "Brown's in Town" is about a young couple who are living in the country under an assumed name, so the father of the young man will not matter of the month. Incidentally every one they know, the father, the wife's sister, a girl friend, and everybody who is to be at home comes around to make things interesting. Of course it takes a deal of procrastination to straighten things out and before the audience knows it, the wife of the father is pretending to be her husband, and she is obliged to maintain the supposed relationship. The whole thing about the play is "go." Where "go" goes meaning nothing can stop it but "time to go home." Regular prices.
