expedition to hawaii

professor nutting is going

doctor of geology invited to participate in deep sea dredging on government ship "leaves soon."

the university has granted prof. c. c. nutting a 3 months absence, payable at any time between december 1, 1901, and june 1, 1902. this is to allow him to accept a request from the united states government that he make one of a party of scientists who will take deep sea dredges in the pacific ocean, off the coast of hawaii. this invitation is the second extended to professors nutting of iowa and prof. nutting received the offer with this recognition.

the expedition will be sent out by the u. s. government and will consist of marine biologists and geologists. the trip will make its voyage on board the u. s. fish commission, director w. b. flemers. president jordan will act as commander and professor nutting as assistant to the commander on the part of the university. the party will make its voyage on board the u. s. steamship "la californian," which will sail from san francisco about december 1, 1901. nutting is advised to sail on this time, if possible, and if not, to take a mail steamer from portland on the same through a series of everything in the deep water to be dredged. of these, dr. jordan says: "the albatross will secure the necessary animals, which will be kept in the pacific, and the university of iowa will receive a share of the material."
