Dr. Patrick on Football

A crucial event was attendance at the lecture Wednesday evening. The subject, "The Ice Age in Iowa," was developed by Prof. Calvin who has made it a special study. He took up in detail the five glacial periods of Iowa. The lecture was intensely interesting to geology students and although there was no attempt to make it a popular dis- cussion, its significance to the interest of others. A great number of views were thrown upon the subject by Prof. Howdell and illustrate the remarks of Prof. Calvin.
