DO STUDENTS WANT SPRING ATHLETICS?

SUCCESS OF CANVASS DECIDES THE MATTER

Can you? Every Student Contributes $2.50 to Spring Athletics when he is Given so Much in Return?—The Scholastic

400 Tickets are Sold

Have you subscribed yet? If you have agreed to purchase a season ticket to the baseball games for $2.50, you have made an arrangement that not only affords you a great deal of pleasure from the sense that you are helping university athletics, but you have before you the prospect of a great deal of wholesome enjoyment that is worth many times the $2.50 which you will pay for it some time next term.

$2 for 14 games—that's the proposition.

If you haven't subscribed, you are of course ready to do so as soon as a subscription paper reaches you. The Iowan athletic editor, who headed the original paper for two tickets some months ago, and the office holders are ready to receive orders from subscribers and to write to you for any number of tickets you may wish to obtain. If you buy two tickets you will receive a great bargain—14 games for $2.50.

The basketball season this spring begins April 17 and ends May 31, which means that you have one day of Commencement week. Fourteen fine games will be played. The team will be away from Iowa City. The purchase of season tickets to the basketball games makes it possible the trips which the team will take, playing Minnesota, Little Rock, and other great college teams. Unless 400 season tickets are sold to the students, there will be no trips, no home games, no anything in the basketball line. There will be only the dual meet with Minnesota at Iowa field for excitement in the athletic line all spring. It is very probable that the board of control will conclude that if the students didn't care enough about athletics to invest in a proposition like that presented in the basketball ticket at $2.50, it would alone be inadequate to hold any interest. That would enable the students to save not only the $2.50 for the baseball season but the quarter or half dollar which will be charged for the truck meet. No athletics at all and yet some students are buying as much as $2.25. How many students would like to purchase a season ticket to the basketball games and would spend $2.50 for the privilege of seeing the basketball games?

A student who is ready to buy a ticket at $2.50, will be glad to meet you, either at your rooms or the office.

CERCLE FRANCAIS

New French Society of University Now Well On Its Feet and Assured a Rapid Growth

Professor Van Steenderen, of the French department, has recently started a new society related to but not recently organized by the students and instructors of French in the university. It has fifteen members now enrolled, and quite a number more have expressed their desire to join the organization.

The members are enthusiastic in their work, and are doing everything in their power to arouse interest in the Department of French.

Through the endeavor of Professor Van Steenderen, negotiations are pending to establish a local organization with the Alliance Francaise of Paris. This latter society is a power in French literature of the present day and exerts a strong influence throughout France and her colonies as well as in the principal institutions of learning, in the United States, and in Europe.

Iowa's departments are always advancing to higher standards, and the French department is proving itself no exception.

The second meeting of the society will be held this evening in room 119. A paper on Alphonse Daudet will be read by Professor Van Steenderen, after which the evening will be spent in social games conducted in French.

SCHOOLS CLASSIFIED

Much Hard and Earnest Work Being Done in Bring About Uniformity Throughout the State

Dr. Brown, state inspector of schools, has urged all schools to work all the year upon the task of bringing about a standard uniformity in the conduct of the high schools of the state, and his endeavors are everywhere being met with approval.

When it is considered that there are at the present time over two hundred accredited schools in the state, while there are but nine months school to the year and about one-third of this time must be spent in the office, one gets something of an idea of the amount of time demanded for the work.

To bring about the desired ends, Dr. Brown has issued, quite recently, three bulletins, the first upon entrance requirements in English, another over secondary schools, and the last on the four-year high school.

Salute the Freshmen

The freshmen have taken the initiative in class organization by calling a meeting of all their men interested in athletics for tomorrow at 7:15 in the auditorium. After the successful scraps the freshmen put up last fall, it is probable that they will receive a warm greeting from their president to a man. Now that the ice is broken, it's about time for the sophomores and juniors to take the opportunity of getting the ball and getting those freshmen off the team.

Dr. F. P. Fitzpatrick, 'M.1, who is in charge of the physical education class, has been working with the freshmen with excellent success at Dubuque during the past year, and will continue his work with the freshmen this year.

Professor Currier—The Only One in Existence

Professor Currier has only the one copy of the collection of the student publications of the university that he has carefully guarded and preserved. In them are recorded the history and record of the progress of the university, and as each issue of the Iowan comes out he files it away to be bound at the end of the year and added to his collection.

In his way of thinking, all of these books can be had they will be placed in the Dean's office, and no student will be looked over by the students.

Besides these publications Professor Currier has almost a collection of all of the old publications which were issued at Dartmouth during his days there. These, he says, are prized very highly by him, reminding them over and over again of the happy college events of long ago.

Dr. Brown, in sending these books to all students and especially to the freshman as he sees the interest which the freshman can save so much in Return—The Scholastic.

You will never be sorry for it and in after life they will be among your most prized treasures.

Phi Delta Phi Banquet

The Blackstones of Phi Delta Phi are to meet at the Berkeley Imperial last evening, and a pleasant time is reported.

The society is in a position to invite a number of invited guests. L. E. Kenyon set the date of the banquet with high style last evening, and toasts full of wit and wisdom were given by R. J. Jackson, "The Fraternity," C. M. Dutsch, "The Alumni," Dean C. N. Gregory, "School and Gentlemen;": Judge H. E. Deemer, "Before and After;" Judge R. W. Sarty, "The Law School and the Law Office."

Middletonian Program

The Middletonian society will hold their last open meeting of the year this evening. Eighteen seniors will graduate from the society this year, which is an excellent record for a short time they have been organizing.

The program consists of an instrumental solo by W. E. Bushnell, installation of officers, one reading by Mr. Biering, a response by T. H. Baer, and music by the Medical Students' Band.
It seems already to be past the time when the bees are humming. Our experience thus far has been that one must either stay away from them altogether, or else wade his appetite for the sweets and prepare a flux seed posset for emergencies.

And it's about time for that end-of-the-term editorial, stating (for the information of freshmen and others) that military duties are suspended on the bulletin board till after the death of his lordship, Sir Cramming-for-Zains.

Here's to many long years of pleasant and profitable co-operation between Northwestern University and her newly elected president, Dr. Edmund J. James.

The junior debate will be held either on April 7th or 8th.

Delta Tau Delta will give an informal dancing party at their chapter house tomorrow evening.

Dr. Brown, state inspector of high schools is at Fort Dodge and Webster City this week on business pertaining to his office.

Gus, Middleton, '91, who is practising medicine at Davenport, has recently been appointed local surgeon of C. R. I. & P. R. R. at that place.

Dr. Biering will read a paper on "The Relation of Tabercolosis in Man to that in the Lower Animals," before the Baconian society tomorrow evening.

Professor Wilcox leaves tomorrow for Mason City, where he will deliver the fourth of a series of university extension lectures. He will deliver an address on "Modern Europe."

Prof. Gordon goes to Wapello tomorrow to act as a judge there in a public speaking contest between the high schools of Wapello, Columbus Junction and morning Sun.

If morals are a question of diet

As is urged by some who have made a study of the subject then it is evident that the greedy, tunrant occupies a position of no small responsibility, for you depend more upon your judgment and conscience of your good taste for the selection of the food which you consume.

Barth, the Grocer takes particular pride in selecting for his trade the cleanest and most wholesome foods to be found anywhere on the market.

If you want a potato, call at 111 East College Street.
Professor Calvin Returns

Professor Calvin takes charge of his geology classes this morning and gives a very interesting account of his geological expedition to the Fraser river region, British Columbia. He was to have been back several days ago, but his train met with severe delays on account of the heavy snow storms on the route. He told of many interesting geological facts about the geology of the Fraser region, which is one with a strange history.

In crossing the border between Canada and the United States the on the Catering Pacific R. R. Dr. Calvin observed that on the United States side was a region covered with prosperous towns and villages, while on the Canadian side, although the soil and climate were practically the same, yet there was scarcely a human habitation within sight. The reason for this is that there are markets for the produce on the American side, while that on the Canadian side had no outlet for produce within paying distance.

A. HUSA, Fashionable Tailor.

Professor Calvin

Hope they are not worrying you. No man can develop the better part of his nature while his feet ache. Aside from making himself disagreeable to others he loses considerably of life's sunshine. It gets right by him—he is busy thinking about those feet. Its good business to buy shoes intelligently. The Walk-Over Shoe is the smartest shoe for men on the market. They wear longest and look best and they feel broken in from the start. They cost $3.00 and $4.00 and are for sale here—it can't get them anywhere else in town—come and see them.

Freshman Debate

The Freshman debaters have finally obtained a satisfactory question and are now preparing for the final effort. The following question was submitted by the Zetagathians: "Resolved, that our laws should provide for the compulsory adjustment of labor disputes between railway and mining corporations and their employers." The Irving debaters chose the negative. Irving will be represented by Diamond and Allen; Zetagathian by P. T. Rinker and Ray Files. The debate will take place rather late in the spring term, owing to the unusual delay in securing a desirable question. It will, however, be up to the standard as the men chosen to represent the societies are men of unusual ability along debating lines.

Captain Storey Resigns

Leslie Story, C'02, has handed in his resignation as captain of the baseball team. He gives as his reason too heavy school work. It is believed that the captain of the new team will be S. Lihri.
