Large Crowd Witness the First Line-up of the Season—Fast Snappy Ball Played

Yesterday, before a crowd of students which half filled the bleachers, the varsity tried its first work in defense, and it would not take any one who saw the work done, two guesses, to hit the fact that the men have had three weeks hard practice on offense but are just beginning to learn their defensive game now.

When the first team had the ball they gained at will on the scrubs, the guards opening up holes in the scrub line and Orchil breezed through for a score. Smashes off end seldom failed to net several yards and Durkee ran around the outside for good distances more than once. In about twenty minutes play the varsity pushed the pigskin over the opposite goal line three times.

The second team was, as was to be expected, a different one. The line men were slow to offer and the tackles did not get the jump on them. The first team men seemed too, to look so smooth and get well fixed to be pushed around. The scrubs were able to make short gains between end and tackle and gain

By the way seems equally at home at half back and McGowan at end and the s

GIVE AN ENTERTAINMENT FOR THE FRESHMEN

The Philomathian and Octave Th amet societies gave their annual reception to the new students last evening.

A short program consisting of vocal solos by Miss Murray, and Messes Jackson and Rodgers, and a piano solo by Miss Buffum was given. Everybody enjoyed a trip around the world, Mr. Swagger being the best journeyman and world trolley, was awarded the prize. Light refreshments were served during the evening.

PHOTO-ACTIVES

Department of Physics New Has All Three Floors in Old North Hall Now Called "Hall of Physics"

The changes and improvements in physics hall to which reference was made in last night's Iowan consist of an almost complete remodeling of the interior of the building.

The old lecture room has been divided into three small rooms which will be used, one for the other two for the office and private laboratory of Professor Veblen. The second floor contains the new lecture room which will seat almost two hundred and a recitation room with seating capacity for thirty-five. Back of the lecture room which is fitted up for stere-optican work, is the apparatus and preparation room.

In the southeast corner of this floor is a dark room for photographic work. The remainder of the space of the room is devoted to a laboratory for elementary experimental purposes for use by the first year students, in dimensions 53 x 38.2

On the first floor besides the rooms already mentioned, are a library room, a building room, and educational laboratories. The basement, arrangement has been changed, the electrical apparatus, engine and machinery being located in this part of the building. Altogether the department of physics seems to have more room and to be better equipped than any other in the university with the possible exception of that of chemistry.

Hand Book

The committee of the Y. M. C. A. is hard at work on this new hand book. There is a great deal of minute detail work involved in getting up a hand book and the committee seldom gets credit for the labor which they do. But it is usual their faults are more likely to be spoken of than their virtues. If the Iowan may be allowed a word of advice, it would be, that a multitude of other sins can be overlooked so long as the committee avoids that of procrastination and gets out the hand book early.

This book hands the new students should have, is a book of love done by the Y. M. C. A. for the good of the student body and interest in the reading and as a help to their work. The editor has added a few lines of advice, probably the best line in the whole book with its compliments.

Miss Louise Brockett, '04, will soon arrive for a visit with old friends. She will be the guest of Miss Blanche Spinney.

A State College Press Association has been organized by the editors of the college papers in the state of Kansas.

Polygons holds the first meeting of the year this evening at the home of Miss Martin.

THE FIRST ASSEMBLY

The First of the Assemblies a Success The Committee Gives the Object of These Meetings

The first of the university assembles was held this evening. The standing room was at a premium. It may have been due to the novelty, a freshman asked a senior the other day what it cost a charge to keep I. H. V. The President then read the announcement to register at once and not forget the certificate for vaccination, to advise those intending to touch to select their courses, and to make the meeting of the Philosophical Club this evening. The President then had a reading to the students of the assemblies in place of his announced address.

Miss Mabel Swisher will entertain the Delta Gammas at a six o'clock dinner tomorrow evening at her home on Summit street.

Bradley, L.'04, has entered into partnership with J. V. Samis, doctors.

Baconian have elected as officers for the coming year: C. E. Sea­ shore, president and C. L. Van Etta, secretary. The resignation of the opposition developed for the secretaryship.

The freshmen have perfected a temporary organization with Alford Verrey as chairman. They will meet Thursday afternoon at 4:30 for the election of officers.

Professor Loos is acting as dean in the absence of Dean Cur­ rier, and is pleasently receiving vaccination certificates.

More than seventy former editors were present at a recent dinner given by the Harvard Alumni to celebrate its 50th anniversary.

Hesperia will entertain the freshmen girls tonight in the president's reception at the home of Mrs. Cannon on Summit street for the second time.

Miss Florence Seely, C.'03, has been visiting university friends. She teaches at Livingston, Montana this year.
Where will the women drill.
That is the question. As soon as they fully realize the lack we hope they can do what the men have not been able to do, build a gymnasium.

Forty men daily practicing on Iowa field, and that too with enthusiasm and determination to win promises to make another 1900 team.

Once more woman has invaded the sacred precincts of the college of law.

Rain, registration, vacæ ation, what a trio to greet the freshmen.

Special Notices
If your shoes come from Stewart's they are "shoe-like" right.

Prof B. Shimek of the department of Botany, is in the northern part of the state on business.

Iowa Fobs at A. M. Greer's.
