THE CORAL UNION

Organization and Plans for the Year Being Perftect

A goodly number of persons interested in the chorus work long before the coming year, assembled last Tuesday evening in the assembly room of the Hall of Liberal Arts. The preliminary reorganization of the chorus was announced. The object of the chorus is primarily the preparation of a body of choristers to present at some time during the year one of the world famous oratorios. 

Secondly the forming of a musical organization that shall constitute the center about which the music lovers of the town and university may gather. The organization is made up from the city and university and it is hoped that it may draw closer together the many who are musically inclined in each. Each year at the May Festival held by the chorus the oratorio St. Paul by Mendelssohn was given, with the assistance of the Chicago Symphony Orchestra, and was probably the greatest musical treat ever engaged in this city. 

During the ensuing year the chorus will study Mendelssohn Elijah and prepare for it presentations during the whole of the year. The union hopes in the course of a year to have some well known musical treat and to give a series of "Chamber Concerts." To these concerts all members of choral organization will have exceptional opportunities for being present at little of any expense.

The rehearsals are held upon Tuesday evenings beginning promptly at seven o'clock and lasting just one hour.

The next regular meeting, Tuesday at seven o'clock, after a few minutes for the election of the board of trustees of the organization, will be devoted to the consideration of the business of the day.
The plan which is being proposed of organizing cross country runs for the benefit of trackmen is a good one and will no doubt result in good track work. The idea should be taken up with a will and an enthusiasm by everyone. New men in track work can here find an opportunity to learn for themselves and become some of the best track men. The race for the Class Trophy cup in these runs will no doubt be keen. Every one who can should enter this new athletic feature with enthusiasm for in doing so they help both the university and themselves. A meeting will be held Tuesday in Miss Call's room.

Military Drill

The military department of the university is larger and more effective than ever, this year, yet there is a tendency on the part of some to try to evade by every possible means to get out of drill. They exhaust every excuse and complain in the category but the only thing that is the matter is that they are indifferent. The requirements are such, however, that try as they may they can't evade the duty. With very few exceptions every one must don a military suit and shoulder a musket. All of this fault-finding and complaint does no good-only detracts from the benefit of the work.

It is the duty of every one to get all out of this military training that is possible. The state furnishes us with opportunities to become educated and to become good citizens. It asks in return that we so train ourselves as to be able to help the state in time of need. The state and the nation demands a supply of men who know something of military affairs. To have this is the utmost importance for in time of emergency the need is great. Therefore, it is a duty and a privilege for us as students of the state university and as citizens to will ingly and with enthusiasm, hold of this military work.

Besides if we go at it in the right spirit it is a pleasure. Go at it with the spirit of its purpose.

The knowledge of military tactics is invaluable to us but besides the drill in itself is of great benefit. It affords us a recreation and an exercise of great value, The fact, that the requirements are being made more stringent, rendering it practically impossible for a man to graduate without having passed the required amount of military work is a good thing.
