Gopher Giants Are Already On The Ground And Ready For The Fray

ALREADY ARE AT CEDAR RAPIDS

Some of the Men In Bad Condition Caption: Strathern Is Out

The Minneapolis football team arrived in Cedar Rapids yesterday direct from Chicago where Saturday it defeated the Northwestern team by a score of 17 to 0. The men are not in good condition. Strathern, the Captain, and in Saturday's game the big Gopher center. Strathern himself will not play Saturday. What is the reason of having already used up his last year limit and was not permitted to engage in the Northwestern game Saturday on that account. Brush, the right tackle who tips the team at 210 has received injuries that will enable him to occupy a place in the lineup and Right End Burgan who weighs 195 will fill in for him. Strathern, it seems, is not fit for the game. The lineup for its cricket baseball teams and Iowa will have to go some to win despite the fact that she has indications for a fast team here. In track, the schools are evenly matched.

Many Unique Skulls Are Found At Okoboji Cave By Dr. Ward

Dr. Duren J. H. Ward has just returned from Okoboji where he has been examining a cave recently discovered there. Dr. Ward found the cave to be filled with things of anthropological interest, in fact it is the most valuable addition to scientific knowledge that has been made of this variety for years. The State of Illinois has been notified of the discovery by Governor B. P. Shambaugh.

The impression shows the districting of the state from the earliest dates of '95 to 1904. The former you, your mother, and never when Iowa was still a part of Michigan.

Among the interesting data which will appeal to all Iowans is:

The first districting of Iowa was ordered by Governor of Massachusetts in 1846. This was the ter- torial day of 35.

The second was by Governor Dodge of the territory of Wisconsin. Governor Lucas ordered another important districting in 1838.

The ratio of senatorial representativeness in 1858—the first made under the present constitution—was one senator for every 40,000.

There has been no change since. According to local libraries, representativeness in 1858 was one for every 7,000. In 1894, it is one for every 18,000.

The number of senators in the state of Iowa is admitted to be 21. At the present time, it is 30.

The number of representatives has grown from 30 in 1846, to 100 in 1904.

This remarkable volume is the first instance of record on a monograph, showing all the districts and apportionments of any state in the union with illustrations showing each throughout a generation.

This work is a wonderful one, once a monograph, and it is destined to win even greater fame for Dr. Shambaugh than he now justly possesses, in the world of history and politics.

In all, the article is a contribution to the state history and has never been approached in merit and comprehensiveness, since Iowa was a state. This labor of love in behalf of her commonwealth will do much to be known to be pleased with the fact that he is a beneficent. His bride was none but the lady that the fact of the number of sub-
