SCRAMBLE BEGUN ON IOWA FIELD

COACHES SEND MEN THROUGH THE LINE.

Four or Five Teams in Regular Work - New Rules Made Marked. Changes.

For the past two nights, Chautauqua has been held by the Iowa field, and now the regular honor. All those present had an important part in the building of the "variety" team.

Couch Chautauqua calls the men to the field to put on the new rules and gives his opinion on new rules, and football tactics in general. The freshman team is making a good showing, and will be an important factor in the building of the "variety" team.

from Ames.

For the benefit of those who are acquainted with the history of the game, it is evident that counselors of old have abandoned the idea of putting the ball on the field, and have taken up the new method of putting the ball on the court. This new method has been in favor for several years, and is now becoming popular. The old rule that the ball must be in the air at the time of the kick is now abandoned, and the ball may be put on the field in any way that seems to be the most practical. The new method is said to be more favorable for the development of the game.

LARGE PRIZES FOR ESSAYS

$1,000 TO BE DISTRIBUTED AMONG STUDENTS.

Must Write on Economic Subject - One Prize at Least. Should Come to Iowa.

Prices aggregating $1,000 are offered by the Merchants Marine league of the United States, at Cleveland, Ohio, for the four best essays on "How to Build Up Our Shipping in the Foreign Trade," only students in high schools, technological schools, colleges, and universities in the United States being eligible to compete. There will be four prizes; one of $400, one of $300, one of $100, and one of $50. Students desiring to compete for these prizes must send in a well composed, well organized, and a climate similar to that of the eastern states, and there is reason to believe that its work will be even better than last year.

The first assembly of the three new classes was installed in Miss Fisher's classes. It is an A. B. Class, and the advantages of the new method are evident. The new chairmen have thrown much light upon the new method, and it is evident that the new method is the most practical.

THE FIRST ASSEMBLY.

Regent Lake Addresses Students: Room 10 Crowded to Limit.

The first assembly of the year continued yesterday morning, at 9:45, in the regular hour. The new chairman of the building committee, Professor Terry McClintock, introduced Regent Lake, of Davenport, who is in the new chairman of the building committee. Professor Terry McClintock is a native of Iowa, and is well known for his work in the building committee.

The probable matters for the coming year were discussed, and the students present were all in favor of the new method. The assembly was well attended, and the students present were all in favor of the new method.
PROFESSOR KOELHER DEFENDS DLC GOLD.

SUCCESSFULLY REPEALS A PROPOSED INCREASE IN THE PRICE OF BREAD.

Robert Koehler, of the Department of Economics, has successfully argued that the proposal to increase the price of bread is unjustified.

Koehler presented evidence showing that the proposed increase would not benefit the state of Iowa.

"We have been told that the price of bread is too low," Koehler said. "But after careful analysis, we have found that the current price is adequate."

CORRECT STYLES

Men who buy fall clothes are usually very particular about style. They study the "trend of fashion" almost as carefully as do women. They must invest thousands of dollars in clothes to suit men who dress with care. That our styles for fall are correct is demonstrated by the usually large business already done since their first showing—spite of weather such as we usually expect in midsummer.

But we are equally careful in choosing the fabrics and seeing that the tailoring is done skillfully. It’s a different story from store to store. Some have smart patterns and sell them at a popular price. Good furnish, however, must be made from good material and by tailors who know how.

THE GOLDEN EAGLE
STEAM LABORATORY TO BE BUILT
BOARD OF REGENTS AUTHORIZES CONSTRUCTION OF ENGINEERING QUADRA
Will Be Placed in Engineering Quadrangle—Will Contain All Kinds of Engines.

Among other business transacted at the last meeting, the board of regents left the contract for the new Steam Engineering Laboratory, to be erected in the Engineering quadrangle. The contract price for the building is $17,775. It will be constructed of pressed brick, with a floored roof. It will be double fire, dimensions, and will be one of six similar buildings to be built in the interest of the quadrangle, for the accommodation of the various shops and laboratories of the Applied Science colleges.

During the summer, Professor Ohle, head of the steam engineering department, visited the leading universities on the east, getting the latest ideas in regard to steam laboratory construction and equipment. These will be carried out in the new laboratory, so that, when it is fully equipped, it will be one of the most modern laboratories to be found anywhere.

The building will be one story in height. It will contain representative types of all modern engines, boilers, turbines, etc., and will also be studied here. It is expected that the most up-to-date ideas that may be made relative to the cost of manufacturing these steam engines will be provided with steam from the heating plant, which is situated in the engineering quadrangle. The building will be made so as to be as efficient, from an energy point of view, as the power plant, the amount of power required for the production of a certain amount of power, etc. One very important feature will be the opportunity to experiment with the various types of engines, turbines, since this type of power-producing apparatus is one of the greatest, if not the greatest, in the engineering world.

In one end of the building will be the first of the various new ideas and for the men who, while making their experiments, will be able to watch the entire process of building, from the manufacture of the parts to their assembly and installation.

THE DAILY IOWAN is published daily (except Sunday) on the campus of the State University of Iowa, Iowa City, Iowa, by H. M. Giffin, Proprietor, and is owned by the students of the State University. Subscription price: 50 cents per year, 1 dollar for two years. Single copies of the morning edition, 2 cents.

Entered as second-class matter, November 19, 1912, at the postoffice at Iowa City, Iowa, under Act of Congress of March 3, 1879.

THE COUNCIL OF NINE.

In the selection of students by the board of student delegates, and in connection with the official action from the President, published today, there will be created within the University a council of nine representatives. This council of nine representative men and women from the student body in all the colleges will be an organization of considerable importance. To them, as students may apply for aid in securing an immediate action by the faculty in matters concerning our immediate welfare. From them the faculty may get information and advice concerning the stand students will likely take upon questions of importance, which the faculties must decide. Herefore such cooperation between students and the administration has been wanting. The board of student delegates, which is representative of all the organizations in the student body, but the council of nine will supplement the work of the board in such a way as to have the necessary number of delegates in offices which pertain to University life. Let the students accept this invitation to be concerned in the suffering and the joy of all students and women are elected on this board. Men and women that are always busy and have plenty to do. Students that will stand for a square deal. Such must be the council of nine.

MORE MEDIC MENTION.

Dr. Jopson opened the first surgical clinic of the school year with a large number of cases, Monday and Tuesday. During the two days more than twenty serious operations were performed.

Dr. Peters, ex-'04, of Fertile, Iowa, was on the town with a permit for the hospital, as also were Dr. Dillem, of Manchester, and Dr. Jordan of Washington, Iowa.

Miss Gertrude Mitchell, of Newport, Oregon, entered our freshman medical class this year. Miss Mor- ris is a graduate of the first class of the Medical Department of the University of Oregon.

Mason City boasts of three of the best baseball teams in the State. Drs. Quail, Albert and Brain. Dr. Lashbrook, of the same class, is located at Parkersburg.

The first meeting of the Methodist Council was held last night. The following program was given: Monday, Tuesday—"My Summer Vacation." Mr. Giffin.

THE DAILY IOWAN

THE DAILY IOWAN

OFFICIAL NOTICE.

In accordance with the following resolution adopted at the close of the last academic year, by the board of student delegates, each senior class and the women of the University are currently requested, as at an early moment, to select delegates who will be thoroughly representative of the entire University, and serve as judicious committees.

"Resolved: That, for the purpose of establishing a more effective means of communication between the faculty and the student body, there be created a council within the limits of student delegates small enough to accomplish committee work with dispatch, yet large enough to stand representative of all the colleges of the University. This end would be attained by a council of nine—such counsel to consist of the class de-legates of the senior classes of each of the nine colleges, and include, in honorary membership, the President of the University."
