THE ALUMNI ARE COMING

UNDERSFALSSMEN SIGN TREATY

FRESHMEN AND SOPHOMORES ARBITRATE DIFFICULTIES

Scrap Next Year May Be With Freshman Social Will Be Peaceful Function

A joint committee of the undergraduates, with a design to avoid the many squalls of next Saturday afternoon to consider the question of assumption of the scrap next year, which is now being prepared for signatures, as a result of the scrap last year. The present year's scrap will be on the football field; that it will be confined to the middle half; that it will not be properly refereed, and that it will when the form of the preliminary, a problem is about six feet in diameter; and may be described as a small horse ball. The great object to get in this big upper class, the problems the ball, the host of all the squad will be provided the Freshmen want to subserve it for a couple of years.

The common rule of the agreement may be quoted literally. "We, the Sophomore class, recognize that there shall be no interference of any kind, person, in the performance of the Freshmen and Sophomores." The paper concludes with the statement that if the agreement is to restrict any of the land, the members of the committee will provide the Freshmen want to subserve it for a couple of years.

PROFESSOR POTTER'S LECTURE

Opened the Course Offered by Whitney Society, With Lecture by Professor

The first of the Monday afternoon lectures on the beginning of Greek literature, was given this afternoon by Professor Potter, who spoke on the Vedic Hymns. These old hymns are the oldest literary remains of any kind belonging to the family of languages in which English belongs. But the Hymns show a high degree of skill in composition and cannot, in the strictest sense, be considered creative. The great mass of Vedic verse is not written or recited but is in the form of a recitation or a prayer. The whole of Vedic literature is divided into two major portions, one consisting of Sanskrit literature and the other of Vedic literatures, both of which are the basis of the Vedic culture. The Hymns are four Vedas, and the Rig Veda is the most important one.

The study of comparative literature, the resemblance of the various Indo-European dialects, and the fact that they are for the most part common, more or less individualized parables of natural phenomena. The speaker described the more important Vedic deities and gave transcriptions of some of the chief deities used in the worship of the gods. Next week Professor Willer will lecture on them.

TODAY'S BULLETIN

3:30 p. m.—Sophomore Class Meeting. Important information.

7:00 p. m.—Dramatic Club Meeting. Room 3161 A.

7:30 p. m.—Meeting of the Newman Society. Kenyon Hall.

7:30 p. m.—Illustrated Lecture, "Here and There in Greece," by Professor Weller, L. A. Auditorium.

COTILLION DATE ANNOUNCED

Sub Committee Appointed—Davenport Orchestra Will Furnish Music. Function Will Be Large

The cotillion committee has definitively decided to hold the annual Sophomore Cotillion on Friday evening, December 14. This date was announced last evening, and immediately the cue suitte began preparations for the giving of the first big formal of the year. Owing to the fact that the Cotillion was given two years ago, before Christmass was so expected, the committee decided not to wait until after the holidays as was done last year. Another reason for the change is the fact that the festivities may now give a Pan Heliconic party the first Friday after Christmas, thus lengthening the date of the Cotillion in January, preceding.

Directly after the granting of the petition yesterday afternoon by the Board of Trustees, the first meeting of the committee began the selection of the patron and patronesse and the list is rapidly nearing completion. Sub-committees were appointed by chairman senator for dancing, discussions, deportment, music, etc. An agreement has been reached with a Davenport orchestra to furnish the music.

Hereafter one objection to the Armory for the Cotillion will be the inferior condition of the floor, but last Saturday a new electric apparatus was installed in the gymnasium for grazing the floor, and so it will be much improved this season. Because of the phenomenal increase in the number of students in the University this year, it is expected that the Cotillion will eclipse all previous records in attendance and the list of schools and colleges for the Cotillion.

The members of the committee are: H. B. Lowman, E. L. Schafer, W. T. Neilson, W. A. H. Brainard, E. C. Platter, of Council Bluffs, Phi Kappa Pi; G. G. Hix, of Dubuque, Alpha Epsilon Pi; W. A. Brainard, Phi Delta Theta; A. W. Reed, of Mason City, Phi Kappa Psi; W. T. Neilson, of Ottumwa, Phi Delta Theta. E. B. Smith, of Island Grove, Phi Delta Theta; H. M. Casper, of Whitman, Sigma Nu; R. S. Phillips, of Ottumwa, Delta Tau Delta; and C. S. Kirt, of Marshalltown, Sigma Alpha Epsilon.

The list of patrons and patronesse will be announced in a few days and also will further details of the party.

GRAD CLUB WILL HAVE PARTY.

Six of the last fourteen executive members of the Graduate Club met, and made an extremely desirable proposal that the cotillion be given by the club next Monday evening at the dome of Miss Lowman, on the campus.

A total of forty new graduate students have been given election to membership in the club. The year's work is to be devoted mainly to social, literary, and athletic events, and the club is expected to remain under their control.

Next week, a freshman, college of last year, will be in Northwestern for the Graduate Union against Bradley in Marigold.
DO IT NOW!

A letter has just been received from Richard C. Keller of Independence, Mo., where he is teaching, by principal of the Columbia heights high school. He reports that James E. Keely, Law '17, who left school last year on account of his health, is gradually recuperating at Boston, Ark.

Mr. Frank Leverett, of the U. S. Geographical Survey, visited Prairie City on Sunday. He left for Ames Monday evening where he will visit the State Agricultural college.

Mr. Paul F. Ringer visited Col. Cel. Rapids on Saturday and Sunday.

Miss Anna Corrsvash, a nurse, died at the home of her sister, Mrs. Will Dam Minnery, in Newton, Iowa.

Dr. Henry Wilcox, '02, of Worthington, Minn., spent a few hours in the city last week.

A new license to work will be issued to the student of the Engineering School.

The photographic class in shoe work has been divided because of lack of room and facilities for work in the engineering school. This is being a piece of work on the new lathe which is being run by Jack Hagen, the professor, for the benefit of the students. This special work by the students gives them some practical experience in model making.

Last summer a number of new wool lathes were purchased for the wood working department, but on account of the greatly increased demand, many more were needed. Instead of buying new ones, it was decided by the faculty to have them built, thus giving the students some practical experience in this line of work. The new lathes are used as models, and the pattern making division of the class is making a set of patterns from which the lathes will be cast. Several samples have been made and the test of these will be used as the model.

The model making and casting will not be done in the University as there is no blast furnaces in the machine shop. They will probably be cast in one of the machine shops of the city. The rough casings will be taken from the machine shop, where another division of the class, the woodworking division, will set and mount them in place.

The castings will be made in a few days and the students will have the opportunity of seeing what the engineers are really doing. As a present the finished work is very limited.

The first division has finished its work and the second division began last week.

Several other lathes have been ordered by the Engineering Society and will be cast. A perfect fit for the models will be made. A new lathe for general work will be received today at the engineering shop in place of a old one. While it is for general work, it is more especially for work in tool making. This machine is required as it is one of the best lathes made and will be a valuable addition to the shop. This lathe was purchased some time ago but have not yet arrived because of delay in shipment.

A new lathe for general metal work will be received at the engineering shop in a few days. This machine is required as it is one of the best lathes made and will be a valuable addition to the shop. This lathe was purchased some time ago but have not yet arrived because of delay in shipment.
