AN EPIDEMIC OF BASKET BALL

TWO GAMES FRIDAY, ONE YESTERDAY.

Faculty Win from Baseball Five. L. A. Freshmen from Medicine, and Grinnell M. F. from Iowa City.

The basket ball season is getting stronger as its end approaches. All sports and classes of men are being matched together for friendly contests, and some very shrewd plays are being given to the game. Last Saturday the game at the Armory, Friday this week-between the faculty team and the baseball nine, was held to have been one of the most spectacular ever seen here. The faculty team was composed of Landgren, R. J. Lamberti, Ruskell, Dale, and Brown, and their opponents were Kellogg, W. Keeler, Horner, Kent, and Page. The match was uneventful. A faculty team won in a score of 28 to 26. The game was played at 4:15. In the armory. Both teams were free in spectators, and were well attended.

Iowa Cityans Defeated.

Friday evening in the high school gymnasium one of the finest basket ball battles of the season was fought. The Iowa City high school five, in brilliant form almost stopped the Grinnell team's mad rush for the state high school pennant, in being unable to play extra times because of the weather.

The game was played before a hushed house and the two teams were saved back and forth, one being ahead and then the other. The first half ended with the score 12 to 11, in favor of the Congregationalists, but as one was able at the close of the first half to predator who would be the winner.

The second half was as close as the first, and as fast as one team would give the adversary, the other would give in kind, and up the pitiful ladder until the rivals were neck and neck again. The game actually ended with the score 22 to 21 in favor of the Congregationalists, but as one was able at the close of the second half to predator who would be the winner.

A new building that is to be started as soon as the state of the grounds permits, is the botanical greenhouse. This will be erected at the northwest corner of the present science building.

ALUMNUS OUT SOON.

Professor Shimer, Mrs. Berryhill, and Miss Sadie Jacobson Among the Contributors.

The Alumnae for March will appear with the following articles. Professor Shimer has prepared an article for this issue on Julian B. Rogers, who was graduated in 1892, and who is one of the University's prominent women students, having done some notable work in research and writing in the field of botany. Mrs. James G. Berryhill of Des Moines, class of 1907, contributes an article on "Education for Women" and Miss Sadie Jacobson has written an "Article Women of Iowa," both of which articles appear in the March number.

The Iowa Committee of selection will meet here Thursday, March 21, to select the Iowa Rhodes scholar out of the students who passed the examinations held in January. The committee is composed of President Leon Leon, Miss Bell Smith, and King.

Miss Zoe Prindler is visiting her father and mother here.

BUILDING SEASON ABOUT TO OPEN

High Water Delays Placing of McKinley—New Greenhouses to be Started Next Month.

With the approach of spring has risen, activity about the University's new buildings. Last week the first formal floor was laid in the new Hospital wing, and broom sweeping will be begun immediately if the weather will permit. In the new science building the plastering is complete on the second and third floors, and the men are at work in the rooming room. In the first room, the plastering will be started during the first of April. The concrete floor is done in the museum rooms, and the interior of the big building begins to look as though it were approaching completion.

High water continues to delay the work of placing the turbine wheels in place. Two wheels and one drum are in daily operation, furnishing current for the daylight hours, at night, the load is switched back to the steam plant. It is very possible that spring may keep the river in such a state that the two other wheels cannot be set before next spring.

A new building that is to be started as soon as the state of the grounds permits, is the botanical greenhouse. This will be erected at the northwest corner of the present science building.

OUR SOLDIERS OFF TO WAR

PETITION PASSES THE ENGINEERING FACULTY.

Battalion Will Begin March on May 23rd—Big Battle Takes Place on May 25th.

The petition of the University council for a two days'מוט of absences was granted last evening by the faculty of the engineering department. To Liberal arts faculty gave their consent a couple of weeks ago, so that the month's battle of march in a sure thing. The suspense is now over, because the ban for the march will be issued shortly.

The date of the march has been set for Thursday, Friday, and Saturday, May 24th, 25th, and 26th. The entire battalion, with full equipment, tents, tents, etc., will use the University campus Thursday morning, May 25th, and will march up on the side of the river to a point eleven or twelve miles north. Troops will be sent wherever they happen to be, at the end of the first days march. The same rule will be followed on the final day, so that small party of weary miles have been traversed, the boys of theblue and gray will cross the river and march back toward the city.

On Saturday, May 25th, the third day out, a battle will be fought among the bands and regiments of the city north of the city. There will be an extraordinary amount of imaginary blood shed and the hospital corps will be kept busy carrying off the 'wounded men,' but Colonel Weeks promises to bring the entire battalion back safe and sound.

The battalion will arrive here again some time Sunday and there we doubt not will be countless yarns spun for some time to come by our soldiers who have undergone the privations and trials of war—have fought the blizzard and the gunsmoke, the mountains and the streams. There will be tales of surviving the torturous country round for provisions when in the direst starvation, perhaps.

The three days troops will be the greatest benefit to our university solders, and they should profit greatly by this practical experience.

Professor Calvin a Delegate.

A meeting of the National Association of Science Teachers will be held in Lawrence, Kansas, March 20 and 21. This University is a member of the association, and will be represented at the meeting by Professor Calvin. The principal business to be considered is in relation to the Military drill now before Congress, which would seriously damage the application from the U. S. Treasury for the benefit of state institutions where it is taught.

A Unique Idea.

Hypnotism and novels were the main features of the Midwinter social last Thursday evening. The evening and Philanthropists halls were thrown together, and artistically draped with green bunting. In the early part of the evening the cars were entertain-

ed with a violin solo by Mr. Cm, some

vocal selections by Mr. Rogers, and a flute piece by C. P. Schenck. Follow-

ing the musical program was an

ablation of hypnosis by Mr. C. B. Hartley, who persuaded the subjects of his manipulations that they were
dogs, monkeys, steam calzepes, etc.,
to the delight of the audience.

There was no question as to the gen-

erality of the hypnotic state in-
duced.

After the foregoing displays of art

and science, the gathering devoted its attention to the refreshments of the evening.

TEACHING POSITIONS.

As is known to many Iowa resi 
dents, the State University each year 
opens a large number of posi 
tions for men and women who are 
fitted to teach in the public schools and other 
educational institutions of Iowa and other 
western states. The present indications are that this year there will be a very large call for young men and women who are fitted to fill 
such positions. The new certificate of 
fitness will be given to those who meet the 
requirements of the State Board of 
Examiners.
