Taking Time by the Forelock

Football Practice Has Begun Already.

Apost Twenty Men Lined Up Monday—Practice Will Be Kept Up Till June.

With the weather still a little chilly, the训练 players—only beginning to make their appearance and the outdoor schedule for football training is just going into effect. It would seem it be a little premature for anyone to get into the gridiron, but the football boys are keen. These days are the big gossip days, and anyone that holds the attention of the members of the gridiron, will be in charge of the whole team.

In the late afternoon light, the practice began. The Superintendent of Athletics, Mr. Rich, will be in charge of the team. Under his direction, the boys will be ready for the coming season.

Professor Guthrie's Lecture.

Opened Course Last Evening with Talk on Heat—Illustrated With Appropriate Experiments

A very interesting lecture was given last evening by Mr. Rich, the Superintendent of Athletics. He gave a very interesting talk on the development of the football team last evening. It was his intention to begin his discussion, the professor emphasized the importance of knowledge of football, for its proper understanding. He also described the recent development of the steam laboratory and the hospital wing. The lecture covered the development of the equipment that can be used in football. It was the first lecture of its kind in the school. The members of the football team were in attendance.

$10,000 More for Equipment

Will Help Very Materially in Fitting Up New Buildings—Representa-

tive Kovacs Offers Credit.

It has been decided that the fate of the football team will be decided earlier this year. The Board of Directors has approved a loan of $10,000 to purchase equipment. This loan will be used to purchase a new building to accommodate the team. The building will be erected near the old building that was destroyed by fire.

From the War Department.

Change of March Dates Up to Day—Incorporate Sheet Bandage—Practicing Hard for Entertain-

ement.

The War Department has announced a change of the March dates. The band will now practice on the 24th of the month instead of the 10th. This will give the band more time to prepare for the performance. The band is practicing hard for the upcoming performance.

$10,000 for New Building

The Board of Directors has approved a loan of $10,000 to purchase equipment. This loan will be used to purchase a new building to accommodate the team. The building will be erected near the old building that was destroyed by fire.

Professors' Lecture

Professor Guthrie gave the initial number of the public lectures offered by the Department last evening. The lectures were brief, beginning at seven and lasting less than an hour. The subject was the first in a series of lectures on the development of the football team. The professor emphasized the importance of knowledge of football, for its proper understanding. He also described the recent development of the steam laboratory and the hospital wing. The lecture covered the development of the equipment that can be used in football. It was the first lecture of its kind in the school. The members of the football team were in attendance.

The University of California has invited the University of Iowa to take part in the intercollegiate football game. The game will be held on the 24th of the month. The University of California will opposing the Iowa team. The team is practicing hard for this game.

The band is practicing hard for the upcoming performance. The band will now practice on the 24th of the month instead of the 10th. This will give the band more time to prepare for the performance. The band is practicing hard for the upcoming performance.
A COMMUNICATION PROJECT

If the efforts of local almost men with success, the Board of Commencement this year will be in Arts and Crafts exhibit, in which the whole state is supposed to be entered. So far the movement is in a rather indecisive stage, so that it is not altogether clear what the exact character of the exhibit may be, but in general it is supposed to comprise all sorts of hand work, either decorative or practical, including exhibits from the manual training schools of the state. It is the idea of the promoters that the material may be gathered through the assistance of the undem and of interested students here, who will be expected to inform the committee of whatever suitable material they may know is in the part of the state where their antiquarian efforts are most needed. The University has organized an exhibit, especially from the department of Fine Arts, and the College of Liberal Arts, whose exhibits might be obtained from inside the state, if it were decided to permit one of these foreign states.

The most serious problem the alumni have to solve is that of financing, as it will take several hundred dollars to make the exhibit complete. As it is known, the necessary funds may be raised if all the local alumni will contribute one dollar apiece, there being about three hundred alumni here in Iowa City. The alumni in some of the larger cities of the state would probably be interested; there have been already some encouraging requests from places who have heard of the project. So far, City Hall has volunteered to pick the matter in Dubuque and with Mr. A. H. Moore, of Burlington, has also offered her assistance.

Whether the plan will materialize or not depends on the cooperation of local alumni; if they desire the proposition unreservedly there would not be much difficulty in carrying it out. The alumni in Iowa City State Bank or Clinton and College Streets.

THE WAITING HABIT

Most men cherish the notion that some morning or other they are going to win out. They have the hero desire to strike; and they intend to get things rearranged. The waiting habit is all that stands between a lot of fine men and a lot of poor men, for who wouldn’t be pleased to win for able workers. Men would bolt for the front instead of sitting idly if they saw the losses of a revolution. If civilization is to be reconstructed with that patient stout—-a physically sound man beloved, through lack of knowledge, to idleness and its consequences, human-count for nothing unless backed with a resultful purpose to achieve. You may desire art so much to better yourself, but the mere desire means nothing to you anything. There must be action. Getting right down to business, what have you done to develop your abilities? Have you mastered the barriers of indolence and lackadaisical? Have you blazed the roads of inability? Have you acquired the power of knowledge, without which you’re as helpless as a child? Are you at the peak of your powers? And your employers, what do they get out of them besides a monthly bill? When have you made a steady effort to increase your value by increasing your effectiveness? If you were required to show cause why you shouldn’t be numbered with the dead ones, could you keep yourself from the morgue? It’s easy to find excuses for not getting out of the rut. But excuses won’t help the pay envelope, but it will show better relations between you and the man that makes promotions. The best papers are usually at the bottom of the ladder. His backache is today, but his throne is tomorrow. Can you leave the buses don’t even grapple to larger.

"See Me About a Position"

I get to have a personal talk with every Iowa City 1906 College man who may be in the market for a new or change in business, teaching, or technical work, on or after July 1st. If you call and see me at the St. James Hotel on Monday, Tuesday or Wednesday, April 10th, 15th or 20th, I can tell you frankly just what the prospects are of securing the sort of a position you want and are interested in filling. I can give you the full information concerning a great many of the best opportunities for your college men in all lines of work in the United States and several foreign countries. It will pay you to feel free to come and see me before deciding definitely what to do after graduation.

(Chicago Medical College)

DR. N. S. DAVIS, Dean.

This medical school is centrally located, convenient to large hospitals, offering abundance of clinical material. The laboratories and library contain the latest equipments, well-lighted and generously supplied with all modern appliances to aid in carrying on the most effective manner, the study of the various departments.

The full course consists of four years, eight months each, beginning October 1st.

The classes are divided into small sections, thus affording to students better opportunities, the advantages of individual instruction. This feature, as well as a graded curriculum characterizes the work in all departments.

The ability of the men who graduate from this school, in well that the character and thoroughness of the work given here, is evidenced by the success of our graduates in the examinations given by the different State Boards. Out of the 150 graduates of the class of 1902 who were examined before any State Board in the United States during the last year, only one failed.
