WHERE INTEREST CENTERS NOW.

MORE ABOUT THE HIGH SCHOOL MEET

OFFICIALS AND COMMITTEES ANNOUNCED.

The regular exercises of the University will be suspended on Friday, May 17, the occasion of the State High School meet. Young athletes will be coming in every day next week to get ready for the big contest. Every county possible will be extended to the visitors. It has been suggested that those who have friends among the high school boys should look to their welfare while having pains to make their stay as guests of the University a pleasant one. The faculties are planning to care for a considerable number of the visitors.

Miss Mary Rosendal of Des Moines an alumna of the local chapter of Delta Gamma has been elected Grand Vice-President of the fraternity.

FOR THE CORNELL TOURNAMENT

THREE MEN PICKED FOR COR- NELL TEAM.

Preliminary tournament yesterday Oliver, Sieg and Harwood chosen, fourth to be selected.

In the preliminary tennis tournament yesterday on the University courts the first three men for the four men to play Cornell were selected by Coach Burton. Captain Oliver, Sieg and Harwood were the three men chosen, the fourth place lying between Daniels, Darland and Barker.

Today’s matches will decide the final make up of the team which meets the Cornell team on Iowa the University courts tomorrow.

The contest with Cornell will consist of six matches, four in singles and two in doubles. If the Cornell team arrives in time Saturday morning the matches will start at 10 o’clock in the morning continuing through the afternoon.

A force of men will set to work this morning to put the courts in good condition for the match. The courts have heretofore been in wretched condition, handicapping the men greatly in the practice matches.

The matches today rendered as follows: Captain Oliver defeated Barker 6-2; 6-8; 6-4. Cassady defeated Daniels, 6-4; 6-7; 6-4; 6-2. Cassady defeated Darland 6-7; 7-5. Sieg defeated Darland 6-7; 7-5; 6-2. Sieg defeated Daniels 6-4; 6-4; 6-4.

The feature of the day’s play will be the match between Daniels and Sieg. Both players won a set and the third and deciding set went to 20 points to be settled after a close set 9-7 in Sieg’s favor.

The contest promises to be an exciting one and the dope is all coming in. The recent triumph of the West Des Moines high school in the city meet makes them a strong favorite. The West Des Moines aggregation getting 10 points to 9 points amassed by their three opponents Grove, last years champions, must be reckoned with, however. The West Grove high school has a weight man that seems slated to win first place in the weight events and there are several other schools Grinnell, for instance, that are liable to spring a few surprises.

As was done last week the matches of singles and doubles will be played, it being probable that only three men will be necessary, as the four men in each heat will qualify for the final heat. By thus eliminating the necessity for semi-finals the committee hopes to facilitate the running off of the meet and also to make it unnecessary for the second men to run an extra heat in order to participate in the final heat.

The broad 220 yard straight-away of Iowa Field is the only cinder track in the state which permits running the 220 yard dash and hurdles without a turn, a fact which insures better time in those events.

The drawing for the heats of the two dashes and the hurdle-race will take place at the rooms of the Triangle Club, Center of Clifton and Washington Sts. at half past seven on the evening before the meet.

On account of the lack of a proper stand for carriers where they would be entirely out of danger of the hammer-throw, it has been decided to admit no carriers to any events in the grounds on the day of the meet. This action of the committee will insure to the spectators in the stands an uninterrupted view of the back-stretch and the turns.

The committee in charge of the high school meet has selected the following list of officials who will be responsible for the conduct:

- Referee: A. L. Clark
- Official: E. R. Hall
- Announcer: O. L. Johnson

MORE TRACK TALK

Mr. Riley exercises his imagination again—Gossip about the men.

Coach Ware Gatlin and Captain Bill Riley were slowly coming down, the "Old Capitol" Building steps and although the huge books under their arms indicated freshening laws the attention of the two members of the track team seemed to be centered on a sheet of paper in Riley’s hands. The different Iowa reporter breathlessly settled up to see these two sources of all track "dope" and inquired what were Iowa’s chances in Saturday’s dual meet with Drake. "Well," said Captain Riley, as he folded the sheet of paper while the wrinkle of care vanished from his brow, "This is the tenth dope sheet I have figured out for the last week in class and according to this one we will skin Drake about six points." This was all the information the uninterested reporter could extract.

There is no doubt but what the Drake meet will be close but Iowa has a most excellent chance to win provided no accidents happen to the men of the squad between now and Saturday. Iowa is strong in the distance events both in the weights and jumps while the Iowa sprinters are on a bar with the Drake men. Drake has the advantage in the hurdle and Iowa has no pole vaulter at all.

But every point counts in a dual meet and if the Iowa men perform to the limit and if they go all in all in sight they should win out.

The meet will be especially important in the bearing it will have in the coming state meet. The Minnesota meet was held under very poor conditions and the records made there by the Iowa men will be taken as a criterion of what they really can do.

NOTICE.

Full cast of the Senior Play opens Saturday morning at ten o’clock.

HOMEOPATHISTS CHOOSE OFFICERS

WILL MEET IN DES MOINES NEXT YEAR.

Program was Finished Last Evening—Plan to Publish Journal.

The convention of Homeopathic physicians ended last evening and the alumni dispersed, to their respective homes. At a business meeting yesterday officers were elected as follows:

President: T. F. H. Strong of Sioux City.

First Vice-President: Dr. George Tucker, Davenport.

Second Vice-President: Dr. R. W. Homans, Webster City.

Treasurer: Dr. H. M. Royal, Des Moines.

Secretary: Dr. Gardner A. Hunton, Des Moines.

Legislative Committee: Dr. George Royal, Des Moines, Dr. C. H. Cogswell, Cedar Rapids. Dr. E. Becker, Iowa City. Dr. A. P. Hurner, Dr. W. R. M. Linn, Des Moines.

Socratogist, Dr. E. C. Brown, Cedar Rapids.

It was decided that a homeopathic journal shall be published in the interests of the profession in Iowa and at large, and Dr. Bywater, the retiring president, will name a committee to make arrangements.

The Guthrie County Club elected its officers yesterday, choosing C. E. Wolf president and W. L. Carberry secretary and treasurer.

KAPPA SIGS TAKE ANOTHER.

Phi Psi Unable to Hit Van Meter—Many Errors—Law Hit Hard.

Yesterday evening before a fair crowd of fans the Phi Psi and Kappa Sigs pulled off their scheduled game in the Pat-Hellenic League. The Phi Psi were unable to hit Van Meter, while the Kappa Sigs got to Law for nine hits, three of them two baggers.

Allen and Hawkins were the high batters of the day, Allen getting four singles in as many times up, and Hawkins getting a pair, hit by pitcher and two two-baggers in four times at bat.

Law struck out four men, gave three passes and hit two. Van Meter struck out six, gave no passes and hit two men.

Kappa Sigs, 8 to 2.

The summary is as follows:

Kappa Sigs

Player AB H FA PO SB E

Allen R F H 8 2 4 1

Hawkins R 4 1 0 0 0

Law L 1 1 0 0 0

Bunting 1 0 0 0 0 0

Home run 1 0 0 0 0 0

By the summary it is a mutual admission that Van Meter hit better than the Kappa Sigs. The Kappa Sigs pulled off one more bag in fourth. The Phi Psi failed to hit Van Meter at all and the game was over.

If you want to make money this summer

We have a proposition by which a good man can, in three months, make more than enough to defray his college expenses for the next year.

There is no outfit to buy and no catechism which you have to learn. All you need is your own gray matter and a little help from us to time from time.

If you will write us, we will gladly explain how we propose to make your next college year free from financial worry.
Wise Talks by the Office Boy.

Getting Ready to Move
Since the arrival of Mr. Dill, the University's new taxidermist an interesting line of work has been added to the many activities of the Science Building. In a basement room of that crowded department is the work shop, if one could say the studio, in which the stuffed and mounted specimens for the museum are prepared. The modern practice of taxidermy is not a craft, it has reached the dignity of an art, and the results it produces are judged by standards as severe as those applied to a painting or a piece of sculpture. The method of preparing mounted specimens has changed radically within the last twenty years. The modern taxidermist must have the training of an artist, and an intelligent command of processes that are as much technical as they are artistic. The preparation of a large mammal is quite a complex piece of business. The skeleton is mounted in the position which is desired to have the finished animal assume. Then modeling clay is taken and added to the bones as though it were flesh, building up the outlines of the body faithfully until an exact representation of the animal as it would appear when skinned is obtained. The next step is to make a plaster cast or mold from this imitation body. When the mold is dry it is removed and coated with shellac inside. The taxidermist goes to work with burlap and glue, and lines the inside of the con cave mould with many layers of the course material. When the glue has hardened the mould is removed and the stiffened burlap gives an exact replica of the animal's body, all ready for the fitting of the skin.

The work at present, however, is chiefly devoted to renovating and reconstructing the old specimens of the museum, preparatory to installing them in the new quarters this autumn. The museum must be remodeled throughout. New cases will be made, and the old modelling clay is taken, and as to conform to a general plan. All exhibits will be made in improved ways. A selection like this collection that have heretofore been kept separate will be classi-

I was reading about the freight our families last winter and how some merchants went to the south because they couldn't get the goods they had ordered on time. One fellow wrote a letter to the editor of his local paper and it was such a good description of a fright car that the editor put it in. The article said that a fright car was "like a bird, mighty scarce when you want 'em and usually lying the wrong way. They congregate in bunches on side-tracks, where some of the companies have large flock of these demoralized and guard them closely during the closed season. They resemble the ostrich for they take in everything and kick hard when pulled together. A well greased switch crew is about the only cave model with many layers of the course material. When the glue has hardened the mould is removed and the stiffened burlap gives an exact replica of the animal's body, all ready for the fitting of the skin.

The work at present, however, is chiefly devoted to renovating and reconstructing the old specimens of the museum, preparatory to installing them in the new quarters this autumn. The museum must be remodeled throughout. New cases will be made, and the old modelling clay is taken, and so as to conform to a general plan. All exhibits will be made in improved ways.
