The State University of Iowa hasn't won the state meet for three years. "DO THINGS!

"track team must"

The last two years we've haven't even made a showing that would rank us up to the state meet. The smaller state schools have been showing up in track athletics. And allittle down to one thing—the student body at Iowa is not interested in their track men. Don't get out and work as student body at Iowa is not interested in their track.

"He writes about our pictureque Slang, which he spells with capital "O" and refers to as being "milhonified in color, and without a rival in the history of speech."

I see that one of the wise guys across from me has been writing us up again and this time in a rather complimentary vein. He writes about our pictureque Slang, which he spells with capital "O" and refers to as being "milhonified in color, and without a rival in the history of speech."

I believe that true dope. I've never heard of any other nation that could bunch us on the glad stage; in fact I am told by well traveled genius of this country that we have all countries faxed to a fare you-well when it comes to flowers of speech, whether vernacular or plain, I guess the "American Language" is like the American people—the richest of the globe. We can rich in word painting because we get our colors from the other races, rich in opportunity because we are new and we extract the old (which gives the proper blend) and we are rich in materiality because we are producers and make scale of money and we spend it freely thus obtaining the best products of all the nations that we know of and we're willing to know all them, well, your new spring Derby is here and you can get the good colors all right, all right. Bull in.
