A board of eligibility

The worst feature of a clean game.

In the national gathering at Iowa City this Spring -

Representatives from many of the colleges which have decided to participate in the Iowa for.

The main part of the collection received by the University consists of rocks and minerals from nearly every country of the world. During the last ten years has been making a collection of the rocks and minerals of the world. During the last ten years has been a resident of Iowa City and in his office he has been supplying the leading universities and colleges of America with materials for their teaching and research purposes. He has recently decided to retire from business whereupon he offered to the University the very many thousands of specimens which were still in his possession. The collection is valued at $10,000.

The coming convention is the third annual gathering of the Forensic Fraternity the first been in the University of Minnesota he started to participate. The annual gathering will lecture tonight at 8 o'clock at the Department of Fine Arts on the topic of "Growth and Development of Fine Arts in the United States of America." The lecture will be given by Professor Ewerhardt, Washington University.

"It is our hope that this building..." The state gave it to the girls. The idea of such a building was a large house, which would accommodate all the girls. This accommodation is so bad that all of the rooms in Iowa City are taken by boys and are reserved for their use, because they are generally considered to be less desirable than the large house with all the features of a home thus.

Many people have a false idea of forensics. In theaptured we have quite true that the chief use of the document is to communicate the girls. A woman's building at a University should be conducted as an office. It is not to be a nursery. University should be a prominent place for such restrictions. It should be properly equipped to accommodate the home life with few hard and fast rules, but with a general influence for good.

It ought not to be hard to secure this building. The state gives it to the girls. The Iowa State of the Iowa System is interested in and are doing much toward erecting the... The state, Federal government of women's clubs has appointed a committee consisting of Mrs. P.R. Hubbard of Ossian, Miss Shirley of Burlington, Mrs. J.G. Beardsley and of the home of Mrs. H.A. Towser of Council Bluffs. They are using their influence in the best way to promote the movement. But the building will not come unless the girls exert themselves for it. I would recommend that the women of the various clubs in the state form themselves into leagues in interest of the movement. Working hard, will surely bring a women's building to us.

The board should make a direct appeal to the legislature this coming session through the voters, through their members in Washington, and Friends so that finally everyone in the State of Iowa, who is interested in the women of Iowa will know that we want, need and demand a women's building in "The State of Iowa."
It's human nature to sit back and let things slide along as they ORGANIZE MORE and more. The University Committee is confronted with the problem of overman,ing the line during spring vacation. The line is still in good shape but its success is dependent upon the University Committee wanting a more complete organization along this line. The majority of the counties where the University Club is working very quietly and thoroughly. But in the case of the counties who haven't organized their clubs, it is nearly every case that the University Committee wants to get something started and not lack of interest because the big mass meeting last semester showed that every student in the University had his heart in the county club project. Accordingly it is the Greater University Committee's plan that all the counties who have not already organized their clubs shall do so during spring vacation. The reports of these new organizations indicate that the Greater University Committee and the University's power over the whole state club will be complete. This final county club organization is exceedingly important. It is the finishing touch that rounds out the whole club movement. Without organization over practically the whole state the county club project is insufficient. When the organization does include the whole state it is bound to do things.

The Missouri Valley Conference certainly needs very much BRIGHT PROSPECTS. Iowa took CONFERENCE a wise step in entering. It is organized on the right principles and seems due to exist without any unnecessary troubles that somehow marred the Big Nine Conference. The schools in the Missouri Valley Conference are all big, first class schools and it means that many great games of all kinds for Iowa to be a member of.

This is the thank of May 31 at Kansas City promises to be one of the best in the West this spring. Iowa is determined to be WISE TALKS BY THE OFFICE BOY heard from at this meet because it will be doing something to defeat the majority of the Missouri Valley Conference teams.

Big 8 U. S. I. BANQUET

ON WESTERN COAST

Invited to Spokane To Have Large Gathering

Alumni and former students of the State University of Iowa will have a large gathering at the University of Washington, March 21st. With between fifty and sixty loyal 'grads' of the University the city will be ideally suited for this meeting.

A letter written yesterday by Alumni Secretary Merle L. Ferguson from C. C. Lantry L. Oyg., who is employed in the large law firm of Merrill, Osvald & Merrill to Spokane. He will report on the fact, "the University of the Present" at the banquet. The alumni association organized in the fall in Spokane has been successful and the members anticipate that it will not only be of great value to the 'students' but also to the University students who will settle in Spokane as the future.

Mr. W. R. Pote has returned from his home at St. Louis, Iowa, where he

THE SPRING always calls for new clothes—the trees are in bloom, the grass is green, and the atmosphere is full of new life. People are always anxious to know who his tailor is. We will guarantee our work.

HON. JOE R. LANE

Among the University of Iowa most prominent alumni is Regent Joe R. Lane of Davenport, L. A., one of the leading attorneys in the State of Iowa and a well known power in state politics.

Joseph R. Lane was born in Davenport, Iowa, on the 6th of May, 1858, and was the son of Hon. James T. Lane. His college education was taken at Knox College, Galesburg, Illinois. After graduating from there he read law in his father's office for one year and then entered the Law Department of the State University from which he graduated in 1880. He then entered the firm of Davison & Lane, lawyers, one of the oldest firms in the state.

In 1883 he was elected to Congress as the Republican ticket in the ten and thirtieth, serving but one term and declining a re-election.

He was appointed by Governor A. B. Cummins to fill a vacancy on the Board of Regents and was reappointed at the expiration of his term. At present he is chairman of the Building Committee and is a member of the Executive Committee. He is also a delegate to the Senate for the Board of Regents.
