Ball Game Will Be Used Next Week—Electric Lights Being Placed In Field.

Football practice will start tomorrow afternoon on Iowa field for the season 1908. The Conference rules permit the opening of Iowa and all games will begin the season's routine tomorrow under Coach Catlin and Griffith.

Strenuous is the adjective to be applied to the first week's program, according to the coaches. Signal practice will be given each day. The players will be put in at first stiffness is worn off and the players will probably use the goose green next week.

Afternoon the players have been kicking the football around on the parade ground just east of the Armory. About thirty have been out, including a large number of freshmen.

Trainer Tomp O'Brian returned to Iowa City in August and has been working on time preparing for the opening game. He is familiar with the majority of his labors ninety four out, complete in every detail, throughly mended and repaired. He has been about constant for the players. Of this sum twenty-four are brand new, and those that have been used care.

The band has been made by the sides and ground leather discs form protection for the knees. The un-

They buy their clothes here; that means all wool, perfect tailoring and correct style to begin with. MR. DONALD ROBERTSON
IOWA PROFESSOR ELECTED PRESIDENT

Society is Formed to Encourage College Education.

The Bohemian people of the United States, particularly in Iowa and a few other central western states, are being induced to abandon their ideas of seclusion from the remainder of the American people and to take advantage of the educational advantages being offered on every hand in order to be prepared for the final amalgamation, by the Council of Higher Education, which has upon it residents of Iowa and Nebraska. This Council using the funds at its disposal—not only to induce those with means to go to the universities and colleges, but is also lending the necessary money, without interest, to needy young people in order to allow them to enjoy a higher education. Already over two hundred Bohemians in Iowa, Nebeska, Minnesota and other states have been induced to take up university and college work and the expenses of about thirty-five have been paid within the past few years. The members of the executive committee of this "council" are as follows: Prof. B. Shimek; Iowa City, president; F. A. Kersch, Iowa City, secretary; Joseph Markou, Cedar Rapids, financial secretary; W. F. Severs, Cedar Rapids, treasurer; and M. W. House, of Cedar Rapids. Prof. F. W. Bonauka, of Ames, and Miss Isabella Hribek, of Lincoln, Neb.

It is a well known fact that the Bohemian colonies in America continue to hold themselves aloof from the remainder of the population and have retained many of the customs of the old country. The people are coming to associate more with other peoples and it is to prepare the Bohemians for this association that they are being urged by the "council" to have university and college educations, in order to take prominent places in the communities in which they live. A fund of $10,000 has been raised for the support of the enterprise, and Otto Kubin, a wealthy brewer of Chicago, has signified his intention of giving a permanent support to the fund.
