NEW BIBLE CLASSES WILL BE STARTED

HEBRaIN DISCUSS IMPORTANCE OF THE WORK.

Many College Men in the United States are being called into the ranks of Bible Study.

(Pro. Henry L. Hauptman)

Perhaps one of the strangest facts is the growing of the tide of college men in the United States and Canada in the study of the Bible. More college men are today meeting in groups of from 8 to 12 men led by a fellow student, studying the same course of Bible Study.

The classes are given by the students, and are led by some able man. From this study, men are trained in a normal class, with special preparation for the ministry and the teaching profession.

The classes are not for the serious theological, but are simply studies in which every man is trained in a normal class, and given the opportunity of the study under the direction of the class leader. The classes are given by the students, and are led by some able man. From this study, men are trained in a normal class, on physics.

The group leaders are in no way required to attend.

To meet this need at Iowa City, D. B. Iron and E. R. Thompson of the University of Iowa and the University of Chicago have organized the First Sunday School class, in charge of Mr. J. W. T. M. and his helper E. R. Thompson. The following is an extract prepared by Mr. J. W. T. M.

The group leaders are in no way required to attend.

The following is an extract from a letter from the University of Iowa, where Professor Webster has just delivered the same course of lectures lately on physics.

"I want to tell you that Professor Webster's lectures on physics were a first-rate. His experimental work on sound from very unusual. None of his work on vision and organic light is any way better than those of the most distinguished scientists. He is not only an able chemist but a good mathematician. Is not the power of his experimental work on sound from very unusual. None of his work on vision and organic light is any way better than those of the most distinguished scientists. He is not only an able chemist but a good mathematician.

Webster's Writings Articles:

The First Sunday School class, in charge of Mr. J. W. T. M. and his helper E. R. Thompson, will be held in the Masonic Temple at 6 p. m. the last Sunday in every month. The members will be instructed in the principles of physics as laid down in the works of the great physicists, and will be instructed in the principles of physics as laid down in the works of the great physicists.
