The work clock.

It is then seen that each athletic team has direct representation by a man elected by the boys. Each recognizes an Iowa team's position in the Mississippi Valley conference, the making of schedules and is fact practically controlling all decisions brought to the board. The board cannot be settled by popular vote as suggested in the communication but must be settled by a committee appointed to judge. Not in few years has there been a split vote between faculty and student. The board and the university as a matter of policy educated for the students been voted down.

"The author of the communication states that I am on record as opposed to any organized efforts to bring athletes to Iowa. As this is stated in false and I should be glad to have the record published. I have been opposed to illegitimate mixing of athletics, or what is known as `something else'. I believe our football team shall never have its rank interfered with by such inferior tramp."

The board is amused of one try to change the Iowa's position in the conference. If your college has been maintained always at a loss but the better and far from new the Iowa team has never paid out. Last year's $320 was lost on football. The student want basketball and the sport kept up. The larger and a conventional team could face Chicago this fall at a cost of $4. Not because the board thought there was the least hopes of winning but to provide the cheer. The board cleared the ice on the court last winter to encourage skating and expects to do the same this winter. The board bought some and a resulting rule in a freedom of last year to encourage the man through the summer. The board carried a certain-day men besides the team to the man of some time at some encouragement in the band and the freshman squad. The inter-collegiate track meet has been carried on the past two years at a loss of over $120 each year. The policy of encouragement of athletics has been to give the man opportunity in the way of expenses and equipment that our limited financial strength will permit. And it may be noticed that faculty members who are on the board are not over three thousand dollars in debt to the household that athlete might exist.
