The education department is appointing many positions for the June graduates of the university. Up to the present there have been filled for any month; we have accepted several students. Dr. Bolten is very busy in this work and is aiding in the best of the university. The object of presenting this program is to show the work that is taught and those things which work as the principal part of vocational education rather than to demonstrate specific features. Some numbers were expected to be present such as, agriculture, mechanics, and business, and are always present. A "sound side in politics" is said to be author's body.
