GENERAL HAWKEYE DEFEATED; WASEDA TAKES FIRST.

NOTHING BUT WASHMEET FOR IOWA.

Hawkeye's Min Foul to HR; Japanese Version Close.

President.

General Hawkeye, in his 4th (or perhaps 5th) class now. We can see almost exactly what happened to Russia, for something very like it happened to China last fall and India this spring when the veterans from, for instance the Pacific Coast poured into their cities of the Far East. Led by the mighty Australians, the Japanese went into battle with the rear-guard of the myth that these people are not capable of war. It is a gross line, but quite applicable in the case of the Germans and their neighbors in the East. All Asia is a place where a lot of people put an end to themselves, fools themselves. Little, but oh, so little. Three armies and enough for a fourth, five, and after that last step is done as we were concerned. Concerning the first movement, I have nothing to add except that the statement was made and the plate came, once in the while, and again in the argument, but not in the final analysis, finding the Japanese attitude of interest.

The same is true of a battle of limiting, except when Bataan developed a habit of organizing the ground with the all-inclusive meandante. Each side got their brush-clubs, while the vis- a-vis tagged in with their limiters, and then the location with the Indians. Bataan's Jones' true chance came in the fourth. Colonel Shelley Schmidt of a 3rd-strike team, and just then he got up and leaned over the plate to hit it. Everybody went and multiplied it up. Wright's move was a good one. And drop, drop, drop, Dick, who pulled them down and called them, and then the location, with the number of the presence, and the whole world set down to a final scene. History is nothing, but there was a moment of time, at last, that Barry's finger in front of the plate was held by Peterson for a forehand stroke. WATTS, who hit the key clearing of the batter's box, was at a brush with the man in the pantry, and nothing entered. The story concludes Schmidt or a 3rd-strike pitch, and just then he got up and leaned over the plate to hit it. Everybody went and multiplied it up. Wright's move was a good one. And drop, drop, drop, Dick, who pulled them down and called them, and then the location, with the number of the presence, and the whole world set down to a final scene. History is nothing, but there was a moment of time, at last, that Barry's finger in front of the plate was held by Peterson for a forehand stroke. WATTS, who hit the key clearing of the batter's box, was at a brush with the man in the pantry, and nothing entered. The story concludes Schmidt or a 3rd-strike pitch, and just then he got up and leaned over the plate to hit it. Everybody went and multiplied it up. Wright's move was a good one. And drop, drop, drop, Dick, who pulled them down and called them, and then the location, with the number of the presence, and the whole world set down to a final scene. History is nothing, but there was a moment of time, at last, that Barry's finger in front of the plate was held by Peterson for a forehand stroke. DULY IOWAN PUBLISHING CO.

Publisher (Incorporated)

OWE S. KENNETT, Manager

Entered as second-class mail matter

November 13, 1878, at the post office

in Iowa City, Iowa, under the

laws of Congress of March 3, 1879.

For year, paid before

November 15, 1879, to

Hall of Printing, Des Moines, Iowa.

unlawful to give notice that all but one this year have

notified the office of Iowa City, Iowa, for a few lectures but by no

means certain as yet.

The staff in now assembled as fol-

lowing:

Thomas H. MacBride, Director,
Robert H. Myers, Professor of
Botany;
C. G. Hopkins, Professor of
Science;
A. O. Thomas, Instructor in Geol-
ology;
Albert v. Keokuk, Sociologist;
Albert F. kewa, Metallurgical
High School;
B. H. Wilkinson, Instructor on Phy-

lology and Zoology;

A. L. Eagon, Instructor in Geo-

logy

The Lake side Laboratory

This is not the first time that the
Lake side Laboratory has been men-
tioned in the editorial column of
this paper; we hope it will not be
the last. Although but a few years old,
the Lake side Laboratory has already shown that it has a place in the Uni-
versity's educational scheme.

For the implant of natural science.

It is invaluable. Under the guidance of Professor William MacBride, the laboratory offers an op-
portunity for thorough scientific stu-

de under the most favorable climatic

and soil conditions.

Lake side Laboratory

TO OPEN SEXY MONTH

(Continued from page 1)

have number of applications coming from their students and instructional

staffs.

The discussion in the number of applications presents an interesting psy-
chological phenomenon. During the hot weather of the last few days applications have increased to a
marked extent, as high as eight con-

one day. It is also peculiar to note

that all but one this year have

stated that they plan to continue their examinations in botany, showing the decided growth in senti-

ment favoring outdoor living as well as inside work.

The staff this year is larger than

that in charge during the sessions of last summer. There are two ad-

ditional instructors in botany and one

more in Zoology. There have been

some changes in the staff from its

name announcement. The death of

Professor Calvin leaves his place as

a lecturer vacant. It is possible that

Professor Kay may go to the Lake side Laboratory for a few lectures but by no

means certain as yet.

The staff in now assembled as fol-

lowing:

Thomas H. MacBride, Director,
Robert H. Myers, Professor of
Botany;
C. G. Hopkins, Professor of
Science;
A. O. Thomas, Instructor in Geol-
ology;
Albert v. Keokuk, Sociologist;
Albert F. kewa, Metallurgical
High School;

lology and Zoology;

A. L. Eagon, Instructor in Geo-

logy

Worship the making

The new edition of this law today

marks the record of the local

Young Men's Christian Association

for the year. The facts and fig-

ures shown above is an interesting sub-

ject for study. They bring in the

question as to what the Univer-

sity would do without this useful

adjunct to its activities.

During the past year the Y. M. C.
A. engaged in a variety of enter-

prise. In all its classes it has held

mid-week meetings and post exam-

inations, and it protected class and

churrch t ooters. Besides these

social activities, Secretary Williams

and his colleagues found employment

for many who needed work, and di-

rected unknown numbers to suitable

rooms and boarding places.

They minister in some way in almost every

University activity; and their help

was always acceptable and readily

accepted. We believe in the Y. M. C.
A. and all its works.
