State Board MEETS: COLLEGE COMBINED

TWO MEDICAL SCHOOLS PRACTICALLY COMBINED

State Board of Health Information to Be Established by Iowa House of Representatives

The Archaeological Institute of Iowa has inaugurated a series of illustrated lantern lectures on subjects involving the various fields of archæological importance. This institute is intended to preserve and promote the interest of the many localities interested in the study of this science. This interest is increasing rapidly, and it is well known that the archaeologist is a protected profession. The lectures will be given on the first and third Mondays of each month.

The lectures will be given in the Lecture Room of the University of Iowa, beginning at 8:30 p.m. The lectures will be given by Dr. John D. Clark, who has made a study of the subject for many years, and who is well acquainted with the conditions of the archæological field in the United States.

STATE BOARD MEETS: COLLEGE COMBINED

This board will be composed of three members, to be appointed by the Governor, and will meet quarterly to consider and report on matters of health and hygiene.

TWO MEDICAL SCHOOLS PRACTICALLY COMBINED

The two medical schools in the State of Iowa have been practically combined, and the State Board of Health Information will be in charge of the educational work of both.

during the last two months. Appropriations for the year next coming are based on the strength of this board. The present board consists of three members, and will meet quarterly to consider and report on matters of health and hygiene.

The final selections for next year's graduating classes were made recently by the State Board of Health Information, and the names of the graduates were announced at the last session of the legislature.
