After all, graft among the students of the university is not an uncommon thing. The question is sometimes asked, Why was such a decision reached? The answer is that the students have long wanted to have such a club. Moreover, the alumni association has been urged to have such a club formed.

First of all, Clifford Powell explained the nature of graft quite briefly. Then, talking on the subject of the history of the movement against graft, he pointed out that it is a movement that has been going on for a long time. He said that there are many causes that have contributed to the rise of this movement. It has been largely due to the efforts of reformers and other people who have been working to bring graft to an end.

The meeting was well attended and members of the club were elected.

Graft on Decline

The Iowa City Press-Republican, November 9, 1911

The recent development of the question of graft has brought about a change in the attitude of the people towards it. The change is partly due to the work of reformers and partly to the fact that the public has become more aware of the evil of graft.

The most important development in the movement against graft has been the formation of the Iowa City Graft Society. This society has been organized to bring graft to an end. The society has been able to secure the cooperation of many people, and has been able to make some real progress.

The society has been able to secure the cooperation of many people, and has been able to make some real progress.

The Iowa City Graft Society has been able to secure the cooperation of many people, and has been able to make some real progress.

The Iowa City Graft Society has been able to secure the cooperation of many people, and has been able to make some real progress.
THE DAILY IOWAN

Friday, November 18, 1938

GEORGE X. THOMPSON

The DAILY IOWAN of November 19, 1938, was issued by the University of Iowa as an independent newspaper to serve the needs and more nearly reflect the opinion of the student body to send in action whatever subject on which it thinks. If

This issue is being published as a result of the student body's request for action on various subjects concerning them. It is in the interest of the students and the university, and is an important development in the area of student leadership. It is hoped that this will be a positive step towards improvement.
A Nice Big New assorted line of Casserole Both oval and round now on sale, Bean Pota, Cantast Cups, Pudding Pans, Steins and Pitchers- SMITH & CILEK HARDWARE

Typical of Morganside: At present four of the Morganside College football men are confined to the St. Joseph hospital with typhoid fever, which makes the rest of the season look rather gloomy for the Mohawkets. The men confined are Vernon, left end; "Train," left guard; Knowles, halfback; and Fannin, center.

The athletic authorities at Morganside are unable to account for the fever. The football men have not been out at the same place, nor have they been eating in accordance with a regular outlined diet, so the remaining among the men cannot be accounted for in that manner. It is possible that they have gotten some water from somewhere while visiting some other institution.

Mortar and Pestle Club Initiates: The Mortar and Pestle club held its regular meeting Tuesday night at the pharmacy building. The first initiation of the year was held, Horsen, Schneider, Bryant and Nitt of the junior class being inducted in the rolls of the organization with due ceremony. G. O. Hinkle read a speech on the future coming of the organization, which was followed by a social discussion. At the business meeting seven members were elected.

Schecttel Lecture Tonight: Professor Gustav Schecttel will deliver the third of his series of lectures on "Appreciation of Music" at the normal science auditorium this evening at 11:15. The subject will be "A Polyphonic Music of Bach," from which Professor Schecttel will play two selections—an invention and a toccata—for illustrations and analysis.

Orchestra Organized: Tuesday evening the university orchestra organized for the ensuing year with about twenty members in its quota. The following officers were elected for the year: president, A. H. Fried; vice president, Walter Copag; secretary, L. E. Lyon; treasurer, Lloyd Phillips.

The orchestra is under new direction this year, but it is expected that with the material which is available, the organization will be just as good if not better than any former one has been.

To Lecture at Morganside: Professor T. H. Starch will lecture tomorrow before the students of Morganside college at seven o'clock.

See "Punch Drunk!" When in need of music. Embroidered from 2 to 9 pieces.

L. H. Shonker, of the pharmacology college and chemistry instructor of the iowa City high school, is in the hospital university quite seriously ill.

--- STUDENT DIRECTORY TO BE OUT TODAY ---

THIS YEAR'S STUDENT BOOK TO BE THE BEST EVER

Publication to Have Home and City Address, Telephone Number and Classification of Every Student.

Announcement was made yesterday that the new student directory would be finished Tuesday, and it would be put on sale at that date at the Iowa Book Stores, Whiteman's Pharmacy, the Arcade Book Store and at the University Book Store.

The book this year will contain the name, home address, local address, telephone number and classification of every student in the university. It will also contain the name, address, and telephone number of all the members of the faculty. The directory is gotten out in better style this year than last. No expense has been spared to make it a book that might be in the hands of every professor, student and resident of Iowa City. Upon the first issue last year it immediately sprang into favor, and it has become an indispensable addition to the university library.

The directory will be published under the auspices of the year by Frank C. Reed and Carl G. Stith. The demand was so great and the request so urgent that they have decided to continue its publication at the beginning of each semester. Its publication this year has been delayed somewhat on account of the necessity with which the students responded to the call for addresses and telephone numbers. There are yet a few who have neglected to comply with this request and so their names will appear without the correct information. Assistance from this the directory could be, and will be credited to its members.

--- ENGINEER MEETING ---

The Associated Students of Applied Science will meet Friday at 5:30 in the grammar's room, engineering building. Besides the reports of the St. Paul's day committee, other very important matters will be brought up and every engineer is urged to be present.

--- OTHER COLLEGES ---

Over 200 are enrolled in the archi- tectural college at the Illinois uni- versity.

A $2,000,000 library is planned at Harvard.

Minnesota has a model school with a total number of seventy-two students from the high school and other places. It is run on the same schedule as the university classes. A. A. smokers reach the classes and receive the book.

Minnesota has found a cure for smallpox which is used in all the world. It is transmitted in the warm air. It is very serious and the students are urged to keep their rooms well aired.

The greatest invention of the year has been the artificial language, which will be given an excellent brief this year.

Monmouth, by a degree of the student body, abolished having recently.
