Shoelace at Noon

At the February Dinner meeting, Dr. Bas

ual Sinai spoke of the second of a series of lectures on the general subject of absorption. He created an

eration from the standpoint of the

at. As he has done considerable

work in this line, particularly

with absorption by plants in

and exposed place, Iowa was

well fitted to treat his subject, which

he did in a masterly manner.

The chief point that he made was that the study of absorption by plants laid

the foundation for the study of absorption in general. He showed how the study of animal absorption grew

from the study of plant absorption.

The last lecture in the series will be given by Dr. Person, head of the Department of Physical Chemistry on the

day of the festival celebration. The first Friday evening after the Christmas vacation. He will treat

of the subject from the standpoint of the plant kingdom.

This lecture will conclude the series on absorption.
