THIRTY-FIVE BIG COUNTY REUNIONS

Proves Great Success

State Aided to the Strengths of the University— More Effective Work Accomplished Than Ever Before.

Thirty-five monster meetings to see the university held in each of the counties of Iowa during the two weeks of vacation. This breaks all records ever before made. The University Committee worked with the alumni bodies and the result showed more than ever hoped was to be gained in this way. The alumni bodies have taken the work almost complete. The public school of the county is a very fine organization and the services of the men graduates and students have been invaluable.

This year's vacation started very early for the university, Mr. B. J. Hamel, President, was present on the first day, whereafter the meetings were held at the正常先后顺序。
consisted with a certain institution bearing the name of this state. His name recalls a period not more than a decade is the past. That man is Ralph McGinnis, earnest and noble-minded and reaching hand of the navy of the United States. At the command of the lieutenant whose name honors this state, he drew commodious attention to the name of Iowa. In fact, the End and the ship he commanded were always spoken of in union. He was a great man, we mean in whom all Iowa has felt a close relationship through one of her native sons. His death is the signal for regret; his life a monument permaneuntly in the extreme and a tribute well bidding the man.

Friday Night Assistant Professor L. N. Pease of the physical-chemistry department, delivered a lecture on "Absorption and Osmosis," from the standpoint of the physico-chemical law for the basingean society. He treated the various kinds of membranes with reference to special solutions. Dr. Pease was preceded by the lecture by a botanist, Professor Simkens, and a biologist, Professor Hesser, each of whom discussed his absorption from his respective viewpoint. The lecture Friday night closed the series on the general subject of absorption. The series was in all respects a very successful one.
