THE IOWA UNION

The union of the Moines Unions during the past month may be a class for rejoicing among those who wove to see a union take flesh.

Since the holiday season, the big diling room of the common

has been nearly filled; it seems

now that by a few weeks there

will be places enough for all who wish to come in.

The reading room Ventasm

is becoming more and more a

sooner to become a meetinghouse.

The statement of the fees has

unquestionably helped materially in the formation of the union, and

the membership, while not

large, is nevertheless still small but effectual from the increased interest it takes in the organization.

Our one thing is still lacking; but we

are informed that steps are already being taken to remedy this. This is the forming of all the literary organizations, with headquarters at the Union. There is yet an unity among the men who go there. There is no way of getting them together, of making them better acquainted. With a big general organization, the Union could be made the center of

student life. There are so many things which such an organization, if properly supported and managed, could do, that it is idle to muse on them. We hope and expect that some such plan as we have outlined will be taken up at once.

THE UNIVERSITY POSTOFFICE

The faculty exchange which Regis-

ter Rang has instituted brings to

the fact that at Moines and some other universities there is a general university postoffice, where any mail going to university men may be placed. The advantages of such a system are obvious. Not only is the universal accumulation of postage, but the lightness come benefit as well.
