Happening troubles of his own at tight back but who rammed his way through 5 to 6 Iowa men to score another touchdown. The thousands who saw the game and everyone else who followed the contest will never forget.

Telephone reports reproduce the anticipation of a week Iowa line. The official signal brought good and bad news. For a brief period the Iowa eleven seemed in battering any part of the town line and this part more than made up for its weakness before the last quarter was played.

The game was spectacular. Time and again the ball was within the fifteen and ten-yard lines for the Hawkeyes. Time and again there were fumbles in the critical moments of first down and goal. It was Iowa's day, although the situation was precarious. It was spectacular.

The scoring:

Iowa—Pos. 0; F. Dick, 1, 1
Parsay, 0; Moyer, 9
Houghton, 0; Hanson, 1; Clements, 1; Trickey, 1; Kirk, 1; Gundersen, 2; Gumpf, 1; Duvall, 6.

Ames—Mottin 8, F, Dick, 1

The following is the same play:

Iowa Line: Scott, Trickey, 1; Kirk; F. Dick, 1; Dick, F; Dick; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall.

Score by Kick: Iowa kicked off to Iowa.

Quarter One:

Iowa turned the ball over, but regained it on a false start call.

Iowa Line: Scott, F. Dick, 1; Dick, 1; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall; Decker; Jones.

The following is the same play:

Iowa Line: Scott, F. Dick, 1; Dick, 1; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall; Decker; Jones.

Score by Kick: Iowa kicked off to Iowa.

Quarter Two:

Iowa Line: Scott, F. Dick, 1; Dick, 1; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall; Decker; Jones.

Score by Kick: Iowa kicked off to Iowa.

Quarter Three:

Iowa Line: Scott, F. Dick, 1; Dick, 1; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall; Decker; Jones.

Score by Kick: Iowa kicked off to Iowa.

Quarter Four:

Iowa Line: Scott, F. Dick, 1; Dick, 1; Houghton; Hanson; Clements; Trickey; Kirk; Gumpf; Duvall; Decker; Jones.

Score by Kick: Iowa kicked off to Iowa.
SERGEANT: Some of the best things in life are the simple things. One is a word which will stand upon its low fact.

The university is to be congratulated upon having a body of students, upon having them spare, upon the moment, when the death knell of the thing they are mostly vitally interested in has been sounded and will send the message as sent out by the associated talent of the college of applied science in their remembrancel. In order that these of you outside of the profession of engineering may appreciate that the arguments set out by the students are in concert with the sentiment of the profession and not trumped up phrases for mere argument, may I be allowed to quote an authority?

Mr. George C. Whipple, professor of sanitary engineering, Harvard University, consulting engineer, New York City, and probably the most eminent authority on sanitary engineering in the United States, in an address delivered before the International Congress of Hygiene and Demography, held at Washington, D. C., September 25, 1911, made the following statements concerning the training of engineers:

"Engineering is fast coming to be regarded as one of the learned professions, and the education required of one who enters this profession must be not only scientific and technical, but broad and humanitarian. It must not only know the underlying principles of the mechanical sciences, but if he is to become the director of great enterprises he must have the power to think logically and reach conclusions quickly, write clearly and speak forcibly—not to mention such moral qualities as honesty, method, and that something termed "personal magnetism." Some of these qualifications are inherent in the individual; some things which will have to be taught from the school to which you are going and to which you are coming."

This light in these statements coming from a leader of the engineering profession, how does the proposed and so-called co-ordination of the important schools of the state of Iowa appear? If the added sciences are being taught more and more and as graduate courses in our universities, and that the students are being led toward courses more than the usual period of four years.

Now in the light of these statements coming from a leader of the engineering profession, how does the proposed and so-called co-ordination of the important schools of the state of Iowa appear? If the added sciences are being taught more and more as graduate courses in our universities, and that the students are being led toward courses more than the usual period of four years?

In his address Mr. Whipple goes on to say in more detail:

"This need of an extended education is particularly true of engineering, for more than one of the other branches of engineering, it requires the aid of many sciences. Not only must the sanitary engineer be versed in mathematics and mechanics, but he must have a working knowledge of chemistry, bacteriology, microscopy, meteorology, geology, hygiene, preventative medicine, and statistics."

Now for the agreement of those of you who are not familiar with the curriculum of the college of applied science allow me to state that the students in sanitary engineering at the college are receiving instruction in chemistry, biology, bacteriology, hydraulics, and kindred subjects in other schools of the university under the personal direction of such men as Professors Kay, Moulton, and Stewart, and such important members of the faculty of the college.

Not only in this true of sanitary engineering, but it is true also of all branches of engineering whose students are receiving a considerable portion of their instruction from other departments of the university. Have these facts been considered in the issuance of this board's report? If they have, then the plan must be one of two things. Either the establishment at Ames of the department of science existing at the university and necessary in the development of engineering as a profession—or in the duplication of a major part of the university in another place—on the virtual abandonment of instruction in engineering of a university grade in the state of Iowa and the decrease in the development of a school of mechanical arts at Ames. As in the first alternative it seems to be out of the question in view of the fact that the excuse for the whole thing is the need for a reduction in duplication in instruction in the some institutions. As in the second scheme—and if recently quoted its statements of individual members, of the board are indicative of the attitude that the proposal to be adopted—the state of Iowa certainly does need a school of In...
AN APOLOGY

We wish to apologize to our many friends and customers that have visited our store in the past three weeks, on account of our inability to show the merchandise in a satisfactory manner. The facts are, in our crowded quarters we have been unable up to this time to display or put on sale our entire stock but at the time this notice is going to press everything is being placed on sale and we wish to advise you that less than 25% of the merchandise in the store at the time the fire occurred has been sold. The larger and better part of the stock remains on hand and this will be disposed of from day to day until January 1st. In other words, this entire stock will be closed out in the room in which we are now located and the next 60 days will see the greatest slaughter of prices ever witnessed in this community as absolutely everything in our stock must be sold and will be sold at a discount.

JOHN H. TAFT & CO.

PHI DELTA KAPPA HAS

FINE MEETING AT D. M.

Juniors Breakfasted at Wellington Hotel During Teachers' Convention

During the meeting of the junior's association at Des Moines, the Iowa chapter of Phi Delta Kappa met at the Wellington hotel. Nearly thirty members, including Mr. B. J. Brandt of Brown, and Hon. Henry Fahn of Des Moines, were present. For the first time the members in the field greets a member of the English faculty.

The Daily Illini, the student publication, has been severely criticized by the progressive club of the twin cities for taking partisan attitude in the campaign. The paper openly sup-ported Wm. B. McKinley for congress.

We breakfasted at the Wellington hotel. During the meeting of the state conference of education in this community, the store at the time the fire occurred to press everything is to be displayed at a single The intention to provide a discount for those members each year, is to offer all members of the fraternity who are in attendance at the convention, a special price on all stock. They are to be sold at a discount, but equally as important, is the need for a well-equipped store in conjunction with a university.

Who would attempt to say that the men that we can and should equip with the best possible education and general education that we can the engineers that you need of such a type for the institutions of our state? Why is it necessary for the taxpayers of this state to be burdened with the maintenance of colleges of medicine, law, or dentistry? Should it be said that since our sister state has institutions such as these, let us borrow our professional men from them? It is understood that the university is never an academy. It is the school of professional engineering equipped with a broad general education as well as an opportunity to those members each year, is to offer all members of the fraternity who are in attendance at the convention, a special price on all stock. They are to be sold at a discount, but equally as important, is the need for a well-equipped store in conjunction with a university.

"The Big Nine"

Is Iowa in a class with the "Big Nine" conference? This question has been definitely answered this year. The students are able to handle the athletic situation at Iowa, many student papers of colleges in the Missouri Valley conference to the eminence justifying it. A few years are the students of Iowa that were too big for the Missouri Valley conference, many people in the university and the tenets in the Missouri Valley raised a very cry against our leaving the conference and playing "Big Nine" teams, categorically. But Iowa got out just in time. This year has proven that Iowa is truly in the conferences to which she belongs. The Missouri Valley cannot hold up the necessary standard. This has been proven by the fact that Missouri wins. Nebraska and Tuesday Iowa handed a package in Ames, Iowa had a little hard back

BANHINDRA NATH TAGORE
To Lecture to Students

Noted Poet and Novelist is Visiting United States and is to Speak

Day Street

Habibindra Nath Tagore is a house-"name in India. Mr. Tagore, the foremost poet, novelist, and dramatist of India, is visiting in the United States and has just accepted an In-.. device. President J. B. Hillyer man of the university of Iowa to spend a day at the university be"fore his return home.

Mr. Tagore comes of the cultured and wealthy Tagore family of Calcutta. He is the grandson of Prithwi Nath Tagore. Mr. Rabindra Nath was a distinguished social and reli­gious reformer. Mr. Tagore, who is now visiting this country, is a versatile and remarkable genius. He is known as the editor, having edited successfully the following magazines: Bharati, Balak, Pushpanjali, and Nagarshantha, all of which was with Indian literature and philosoph­ies.

But Mr. Tagore is known more widely as a writer of short and short stories, as an essayist, a statesman and as a poet. Especially he is known as a poet. The simplicity of his style is frequently com­pared to that of Wordsworth. Some idea of this may be gathered from the following translation of one of his lyrics:

"I saw not aware of the moment How it crept through the veins of this life. What was the power that opened me out upon this vast Mystery like a bird in the forest in its strange exercise? Where in the secret turn of the light I felt it, I knew that I was no stranger in this world, that the inscrutable in my being, and his had taken up its arm in the form of my mother. Even so, it death the same unknown will appear as, ever known to us, and because I look this life I know will fay death as well."

The London Manchester Guardian commented on Mr. Tagore's visit to England, remarked that "this visit to England of the Indian poet and dramatist, Habibindra Na­th, has assumed a larger and wider interest among thoughtful people here than the appearance of any other visitor from the East in our generation."

At a recent banquet given in his honor by the literary and artistic world of London, Mr. H. B. Yeats, the poet of the Celtic renaissance, paid this tribute to him: "To take part in helping Mr. Habibindra Nath Tagore is one of the most important in my lifetime. I have been carrying about with me a book of translations in English prose of one hundred of his Bangali lyrics. I know of no man in my time who has done anything in the English language to equal these lyrics."

Mr. Tagore is de­veloping his energies to the spread of education in his country. He has established a model national school at his own home which is attended by Pantinmadura (ridge of poems). His purpose in visiting the United States is to make a close study of the educational system here.

The date of his visit to the university will be announced later.

One of the number of the local clubs will give the lecture, informal discussion following the lecture on the points and principles outlined. In this way it is expected that the lecture will be of great service and profit and stimulation to all the ad clubs in the United States. The ad men believe that it must be definitely applied to local problems and local conditions as they exist in each separate community.

Dispute Employer’s Liability

If the number of bills which are presented to the legislature upon any subject is an indication of the importance of the matter, certainly the question of employers’ liability for industrial accidents is a very important subject in the State of Iowa at the present time, as it is practically certain that there will be three different bills presented to the legislature upon this subject this winter. The Manufacturers’ Association are preparing a bill which will be presented, the majority report of the Employers’ Liability Commission subject to present a bill, and the minority report of the Industrial Commission will offer one.

In view of the great interest shown in this matter, the Iowa State Conference of Chapters and Corporations, which convenes at Cedar Rapids next week, has set aside Tuesday forenoon at eleven o’clock for a discussion of this most important subject. Mr. A. L. Trick, of Des Moines, will be chairman of the Conference, and the Honorable John T. Clarkson will make the introductory address. The Manufacturers’ Association are preparing a bill which will be presented, the majority report of the Employers’ Liability Commission subject to present a bill, and the minority report of the Industrial Commission will offer one.

Heating Plant

This lecture is one of a series prepared by the International Committee of the Associated Advertising Clubs of America. The remaining ten lectures have been purchased by the local ad men and will be given this winter.

All business men and students interested in the subject of advertising are given a hearty invitation to be present next Tuesday evening when the first lecture is scheduled.

One of the principal features of the evening will be the thorough, in-depth presentation of the subject to be held in the city. The evening will be held in the City Club at 7:30 p.m. All business men and students interested are invited to attend.

Manufacturers’ Association

The Manufacturers’ Association are preparing a bill which will be presented, the majority report of the Employers’ Liability Commission subject to present a bill, and the minority report of the Industrial Commission will offer one.
