HAWKEYE MANAGERS BUSY ON ANNUAL

HUBBLE-CHIEF VINCENZ AND MANAGER REED GETTING PLANS COMPLETED

June Annual Will Be Representative, Each College Having Reserve at a Given Space. John Bruce is Head of Fund-Raising Applications.

The best Hawkeyes yet is the line set up by Editor-Chief Vincenzo and Manager Reed for this year's annual application. They are busy working toward the accomplishment of these projects.

During the summer vacation and since the beginning of school, they have been busy arranging the general plan of the book, allocating the space to be devoted to each department, preparing the various scripts, and arranging the general format of the book. They have been busy working on the general layout of the book, and the various sections and chapters, and have all been busy working on their assignments.

The general design of the book will be new and unique, with the various sections having been carefully arranged. The book will be a splendid collection of jokes for all to enjoy. It will be a fun read, with everyone sure to find something to laugh at.

It is expected that the book will be ready for distribution by the end of the school year. The editors have worked hard to ensure that the book will be a success and will be proud to present it to the students of the school.

The Hawkeye will be representative in every respect. The book will be a fun read, with everyone sure to find something to laugh at.

Cotter, Dodge. There will be a meeting of the Greater University Club at 8 p.m., with the purpose of discussing the plans for the annual meeting. The meeting will be held in the auditorium in the University Building.

The conference banquet will start January 11, when Wisconsin plays Illinois at Champaign. All college students are encouraged to attend this annual game. The conference banquet will be held on Saturday, February 13, and is expected to be the largest ever.

The conference banquet will be held at Chicago, and is expected to be the largest ever.

The conference banquet will be held at Chicago, and is expected to be the largest ever.

FIGURES SHOW
IOWA STRONG

Saturday's Score Does Not Show Up Relative Strength of Two Teams

Wisconsin, with its compensate offense, is still the big game of the week. Another way of getting at a definite answer to this question is through statistical presentation. Following are the figures showing the gains of both teams as measured in distances of punts and kick-offs and the differences the ball was carried after the kick-offs and during the game. The losses in yards and the yards penalized are also given.

<table>
<thead>
<tr>
<th>Iowa</th>
<th>Wisconsin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Punts 24 yds</td>
<td>Punts 10 yds</td>
</tr>
<tr>
<td>Carried back</td>
<td>Carried back</td>
</tr>
<tr>
<td>Field Kickoff</td>
<td>125</td>
</tr>
<tr>
<td>Ball carried</td>
<td>216</td>
</tr>
<tr>
<td>Total 452 yds</td>
<td>Total 352 yds</td>
</tr>
</tbody>
</table>

Lessons

Distance returned 60 yd. 85 yd.
Loss in play 24 22
Total 45 yd. 177 yd.

Subtracting losses from the gains gives Wisconsin credit for a total of 116 yards and Iowa 74, leaving a balance in favor of Wisconsin 42 yards.

Due to Hansen’s 15 carry-aways, Iowa for granted an additional 32 yards. The kick for Iowa being 32 yards.

That Iowa gained more conclusively is shown by the fact that Wisconsin was thrown for losses 32 yards as compared to Iowa’s 26.

PROFESSOR NUTTING

GIVES FINE LECTURE

Head of Zoology Department Addresses Harmonic Club on Heredity

Prof. Nutting yesterday gave a highly instructive lecture on the Progress of Zoology during the last century. Progress along the line of study of heredity and its practical aspects, experimental zoology, experimental physiology by zoological expeditions and systematic zoology was chronicled.

In 1900 Mendel’s law of heredity, which had been formulated 20 years earlier, was discovered. The law of heredity was not annealed at the time on account of the attention which was being given to Darwin’s law of natural selection. By this law it is possible to arrive at a pure type of animal or plant without long breeding.

Prof. Nutting gave an interesting and probable solution for the high life of living whom he said that we manufacture our own men simply by putting a fragment of meat into a suitable culture and letting it grow.

It was interesting to learn that the millions that are gambled away by our stock magnates and other similar Mosites, Curtis are founded on scientific research by the Prince of Mexico who has done perhaps more than any other man of our time in further investigation along the line of heredology.

Hawkey Pick Eleven

Coach Hersey yesterday announced his selection of an all-conference eleven. Trickey is given a place at left tackle, and Hansen a place at right guard. He agrees with Hick-er's selection, excepting Bagram at left tackle, Hoeffer, left end, and Tyrandon, full. Fleming gets the right end, and Ehrhardt the full back position.

Ehrhardt’s eleven is as follows: Trickey, Wis., tackle; Olsen, Wis., left guard; Des Jardens, Chicago, center; Reeder, Wis., right guard, Butler, Wis., right tackle; Curtis, Wis., right end; Gillette, Wis., quarterback; Van Riper, Wis., left half back; Ohlphart, Peru, left back; Tandberg, Wis., fullback.

When Hansen Has a Cold

When Hansen has a cold, he sings for dear Gold Coast. When "Rainbows" loudly brawls the band, Cap. Hansen has a cold; when the cheerers on every hand, and "Sparks from Heaven" all demand, the hero loses all his sand; but when upon the field they tread, in suits of gleaming gold, opposing Badger boys in red—Ah! Where is Hansen’s cold? Vanished is his modest dread. Exultant fills his soul, instead, and everybody knows he’s ash, all vestige of a cold.
