STATE GEOLOGIST TO ISSUE REPORT

Professor Geo. F. Kay, state professor of geology, announced yesterday that a report will soon be issued in cooperation with the United States Geological Survey on "Underground Water Resources of Iowa."

The forthcoming volume will furnish data which will be of great value to the state officials, representatives of industry and other corporations, and to private citizens who are seeking information with reference to the water supply of their respective localities.

The farmer will have complete information concerning the shallow water sources under cultivated land, and he will be fully in the possession of the possibility of boring an artesian well on his farm.

The Iowa Geological Survey has spent twenty years in gathering data relative to the groups of water--those near the surface and those at a much greater depth. A sufficient amount of information has been gathered to make a satisfactory forecast in nearly all parts of the state relating to the location of which artesian wells can be found, their presence, quality and availability for specific uses. The report will be 400 pages and will be ready for distribution in a few weeks.

A recent report from the University of Wisconsin states that Helen Bruckner, a student at the University of Wisconsin, has been drowned in Lake Mendota. The body was recovered by the local police and an inquest was held. The cause of death has not been determined.

TOKY-O OUT FOR CIVIL SERVICE

Bruckner's acceptance of the position at the University of Wisconsin is expected to be a great loss to this institution. He has been a valuable member of the faculty and his absence will be felt sorely.
