NUMBER 162

COMPETITIVE DRILL HELD YESTERDAY

COMPANIES F AND C TIE FOR HONORS—MAJOR MUIR OF SPRINGFIELD JUDGE

Martin Wins Lilley Sabre—Philbrook Takes Coast Sword—Regiment Paraded Before Moving Picture Camera—Band Concert

The annual competitive drills of the cadet regiment were held on Iowa field yesterday afternoon before good sized crowd. Major Muir, of Springfield an officer of the regular army in charge of the militia of Illinois judged the events, and the dispatch with which he ran off the competition was very commendable. He arrived at three-forty eight in the afternoon and left on the nine-ten train in the evening, finishing the seven events in about two hours.

Field drill in close and extended order for the Coast Sword, Company F, Captain Philbrook, first; Company C, Captain Martin second.

Manual of arms for the Lilley Sabre, Company C, Captain Martin, first; Company F, Captain Philbrook, second.

Field drill for picked squads, Company F, Corporal Jones, first; Company E, Corporal Oliver, second.

Individual manual of arms, for the Junior medal, Lieutenant Hanna, Company C.

Manual of arms for the Sophomore medal, Sergeant, Townsan, Company B.

Manual of arms for the Freshman medal, Corporal Conn, Company B.

No second places are awarded in the individual manual of arms competitions.

The drill today which consisted of a parade before the movie camera in addition to the competitive will probably be the last formation before the final review on Governor's Day. No drill will be held Friday since that day is a legal holiday and all University work is suspended and it is unlikely that any other drills will be held in the interim. The band will give a concert on the Liberal Arts campus on Thursday of this week. The program will be published in a later Iowan.

It is not definitely known whether the day's maneuver which was planned for some Saturday will be held but it is thought unlikely. The time remaining before the close of school is so short that most of the cadets need every minute for their school work and consequently any interruption would be a serious handicap.

Governor Clarke is expected to review the regiment on Governor's Day and the prizes won in the competitive drills will be awarded as a part of the ceremonies on that day.

Princeton University will receive \$2,000,000 of the \$3,000,000 estate of Ferris Thompson, who died in Paris two months ago.

ROCKWOOD TELLS OF BIG DEMAND

Speech Last Night Was First of Series of Lectures on Important Professions

That the students in the University of Iowa may have full information concerning prospective professions to follow a series of lectures has been instituted. Last evening Professor E. W. Rockwood, head of the department of chemistry, told the students that the demand for chemists in the industrial world is a growing one, and not likely to be satisfied for sometime.

Professor Rockwood told the students that the exhaustion of the supply of cheap lands increases the cost of agricultural products, beef, mutton, pork and forest products. He pointed out that the supply of natural fuels and ores are decreasing, and other raw products used in manufacturing.

"In every civilized country chemists are at work solving the problem of decreasing the cost of manufacturing," said Professor Rockwood. "Sometimes this is done by utilizing the waste materials. For instance now a liquid fuel to supplement the gasoline in automobiles is called for, and it must be supplied by chemists. With a view to getting cheap alcohol, chemists have started successful factories where it is prepared from sawdust. In many manufacturing operations each step is controlled by chemical tests made on the material. For instance, artificial silk made by chemical processes from cellulose is very much cheaper than silk and requires a careful examination for its detection. Until recently indigo was obtained from a plant, but after years of patient experimentation the chemists were able to prepare it synthetically and thus release the land for the production of food stuffs."

PHILOS ELECT

The Philomathean society at their last business meeting elected the following officers:

For first term 1913-1914.
President, Clarence B. Isaac; vice-president, Bruce Mahan; recording secretary, Ralph Stribe; corresponding secretary, John J. Horsfall; treasurer, Henry A. Wolcott; critic, Leslie Farnham; sergeant-at-arms, Roscoe Patch.

For entire year 1913-1914:
Forensic counselor, Verne Foley; historian, Ival McPeak.

FIELD WORK CLOSED

The field geology class closed their work for this semester with a trip to North Liberty last Saturday. Nearly thirty have taken advantage of the course this year. The work has been conducted by Professors Trowbridge, Thomas, and Kay of the geology department.

DR. JESSUP SPEAKS

Dr. W. A. Jessup will deliver the commencement address before the seniors of the Kalona high school,

TRIANGLE CLUB ROOMS QUARTERS OF LUXURY

ANNUAL FUNCTION OF UNIVERSITY CLUB TAKES PLACE SATURDAY NIGHT

Over Seventy-Five Members Sit Down to Banquet Board in New Club Rooms—Dean W. C. Wilcox Toastmaster.

The new quarters of the Triangle club which now occupy the second floor of the new State Bank building where once was located the Coldren theater and a series of office rooms, were presented in all their newness and excellent finish last Saturday night at the annual banquet of the university club. Over seventy-five members of the organization at that time applauded the efforts of Prof. B. J. Lambert and his helpers who made the new quarters such a place of comfort and convenience.

The plan of moving which was first suggested was thought by many to be impossible this year. The efforts of Mr. Lambert and others, however, have resulted in quarters which surpassed expectations of even those most optimistic over the possibilities of changing.

The rooms as now situated consist of one immense club room about 70 by 30 feet in dimension, adjoined on the east by a spacious library room and on the south by billiard rooms with cloak rooms and a kitchen attached to the front and rear respectively. The new quarters are beautifully finished in neutral tints and everything occupying the rooms has been caused to blend with the general design of the club's new home.

Especially mention must be made of the electric light design in the main club room. It is the work of Prof. Ford and consists of a triangle of lights blazing out the symbol of the club. Likewise the fireplace irons are in the form of a triangle, having the same purpose in view. The fireplace itself is the final word of the big club room, being unsurpassed for excellent workmanship and design. The furniture is of fumed oak and matches the general scheme perfectly.

The Triangle club now boasts of about 100 members.

ANNUAL SPRING CONCERT

The University and Iowa City Choral society, under the direction of Prof. Gustav Schoettle, will give Mendelssohn's "Hymn of Praise—A Sacred Cantata" at the Methodist church on Tuesday evening, May 27, at 8:15 o'clock.

The famous organist, Clarence Eddy, has been secured for the occasion and will give a recital preceding the choral. The soloists are Mme. Dorothea North, soprano, and William Clare Hall, tenor, both of Chicago. It will be the musical event of the season.

Ticket \$1.00 each. On sale now at Wienke's Arcade Book store.

MARSHALL LAW HOLDS BANQUET

Given to Graduating Members of Law College—Interesting Toast Program

Last evening at the Burkley was held the fourth annual banquet of the Marshall Law Society, given in honor of the members of the graduating class of the Law school who were members of that organization.

The Marshall Law society is one of the younger societies of the university, and for that reason has not become so well known as the older societies. Previous to this year the society was of a dual character, combining both literary work and that of law. At the beginning of this year, however, a change was made in that respect, and the society is now devoted entirely to law work. Each Friday night a moot trial is held, and the members attending as well as those who part receive the greatest practical benefit. It is here that the embryo attorneys learn to handle themselves in exactly the manner that they will be required to do when they go out into the general practice of law.

The society is rapidly advancing to the front as one of the most active organizations in University activities and the banquet which was held last evening abounded in the spirit of good fellowship and the spirit of anticipation for greater things.

The members who graduate at this commencement are as follows: George Allen; William Byers; J. H. Johnson; Thos. Levitt; N. M. Monroe; Hiram Price; James Reaney; G. C. Richardson; Willard Russell.

Toasts were responded to as follows:

"Marshall Law"—Willard Russell
"Reminiscences"—Hiram Price
"The Undergrad"—J. F. Jamison
"Anticipations"—J. M. Gammon
"Goodbye, Marshall Law"—Thos. Levitt.

"Farewell Seniors"—Paul Balcar
Presentation of Diplomas—M. S. Turner.

Plans are already being laid for the next year and they will doubtless make a notable record during the coming years, and their achievements are to be watched with interest.

The young men composing the senior class of the Dunkirk, Ohio, high school will be dressed in blue overalls and blouses when they are graduated in a few weeks. This resolution is the result of a rule passed by the young women of the class that young men be attired in evening dress so as to be in harmony with what the ladies propose to wear.

SIoux INITIATION

The initiation of next year's Sioux braves takes place at Close Hall on Wednesday, May 28, from 5 till 7. Will all the juniors who can be present please notify Marjory Dyas before Wednesday noon?

MANY ENTRIES IN FOR BIG INTERSCHOLASTIC

FOURTEEN HIGH SCHOOLS REPRESENTED BY NINETY MEN ALREADY REGISTERED

Meet Promises to Be Best and Fastest Ever Held On Iowa Field—Much Interest Being Taken By Dopesters all Over State.

Manager Kellogg has the list of high school entries about completed at the present time. There may be a few more of state high schools in before the end of the week. Up to last evening there were fourteen high schools represented by eighty-nine athletes.

The meet this year promises to be one of the best ever held here. At least it will be one of the fastest, as there are many high school men over the state who have been making wonderful records. Hoyt of Greenfield seems to be the star athlete of the state although Dutton of Anamosa is making quite a record in the weights.

Every event will be fought to the limit for the places there is no doubt. This is the last meet of the year and Saturday will see a final reckoning between the athletes who have striven against each other in the Marion Central meet, the State meet at Des Moines, then there are a few who met at Mt. Vernon early in the spring when Cornell held her dual meet.

Following is the list of entries as they have been registered:

Anamosa: Lawrence Dutton, Carl Helberg, Hubert Metcalf.
Cedar Rapids: M. Arnett, C. Baxter, R. Farmer, Leo Franks, Ross Groves, F. Heaney, F. Houser, H. Lavell, B. Mokresh, J. Mokresh, J. Powers.

Columbus Junction: Sumner Darrow, Will Hull, Ralph Newton, Geo. Oakes, Charles Spaethe.

Davenport: Allen Benson, Borchardt, Boudinot, Dort, Kaufmann, Marsh, Rhodes, Roche and Stewart.

Denison: Hans Broderon, Leo Collins, Marshall Jones, Carl Kuehnie, John O'Connor, Charles Seeman, Ralph Eberg, Ronald Wygant.

Geenfield: Charles Hoyt, Lane.
Grinnell: Hastings, Nelson, Pottle.
Independence: Anderson, Dunlap, Diltz, Goen, Iekel, Irwin, Ives, Neilson, Moore, Riede, Smith.

Iowa City: Bailey, Cannon, Fiesler, Hixon, Jones, Jackson, Kanak, Kinney, Marner, Mathes, Mayer, Miller, Newberg, Powers, Scanlon and Wallen.

Laporte City: Briggs, Raige, Waige.

Moline: Benson, Ellis, Gripp, Honson, Hannah, Soderstrom, Stow, Wtatherhead.

Pomeroy: Taylor.

Valley Junction: Sloane.

Mason City: White Hayes, Wiggington, Baslow, Lee, Churchill and Meighan.

Manuel Kyhl has been pledged to Acacia.

Editor-in-Chief.

YOU CAN DO IT

Without doubt every student in the university knows that the institution has just passed through a period in its history which to a great extent, is to determine the greatness of its future. Every one of us realizes that if engineering and homeopathic medicine had been removed from the university, unquestionably movements would have been instigated for the removal of other parts of our school. We realize equally well that the failure to do this very thing, assures the possibility of this university continuing to develop into the greatest institution of its kind in the country. That this development is a possibility, all of us are glad to admit. It is already far in advance of all other educational institutions in the state, it will be therefore but one step further to make it rank well above its sister state universities.

We all realize the possibilities, but we are prone to let it go at that. Of course, we who are here realize what the University really is, and what it actually means to us, and that there is no other institution that will satisfy the demands of the student quite as well. But we are so confident of this fact that often we do not stop to think that the young men and women in the high schools of the state are not in a position to know what the university could mean to them. Since we are so confident ourselves that the University is the "only place," we unconsciously take it for granted that everyone else knows it as well, and we do not put forth a single effort to make the possibilities of the university realities. How easily we students could increase the attendance at the university to about four thousand, this very next year, if we only stopped long enough in our work, some time during the summer months, to tell some high schooler we know of the good things we have here for him, and to show him that he is making a serious mistake by going to any other college in the state for the same work that he can get here! Now what little effort it would take for each of us to spend enough during the summer to get one more freshman here next fall! At most it would take but a few hours work, and what would be the result? Nearer five thousand than four thousand students would be here next fall, and the fondest hopes of the friends of Old Gold would be realized. We would have an institution that would rank well with the greatest universities in the country, for it is merely numbers that we lack, nothing else.

Let us stop a moment to think how little will be the effort and then join hand in hand, throw our shoulders to the wheel with a will, and boost for the best educational institution in the west; and we will have occasion in future years to point to the University of Iowa, THE GREATEST EDUCATIONAL INSTITUTION IN THE UNITED STATES, and proudly state that it is partly of our making, that we have had a hand in making it what it is.

Are you going to be a parasite this summer and loaf . . . or work from the chin down for two dollars a day? Would you rather work from the chin up and make five times this amount? This article will show you a way **IT WILL ALSO HELD YOU ORGANIZE THAT BRAIN POWER WHICH YOU HAVE BEEN DEVELOPING ALL YEAR AND TURN THE SAME INTO MENTAL DYNAMITE.** This will stir up the desert and help you find the gold mine, both of which are located under your hat.

GENTLEMEN

If you have any desire to make for yourself from \$350 to \$1000 clear this summer. If you have ambition to develop leadership in dealing with men, making them come your way and think as you think, feel as you feel and act as you want them to act. Then consider and investigate my proposition.

I have given contracts to 200 hundred men in the last thirty days. I still have considerable desirable territory open but this will not last long. **WILL YOU BE ONE OF A HUNDRED MEN WHO WILL MAKE OVER FIVE HUNDRED MEN FROM IOWA WHO WILL MAKE OVER \$50 dollars THIS SUMMER.**

I do not want you to sell books or any other dead proposition where you have to create your own demand and sell your talk or use the sympathy (working through college) arrouser, and persuade the people to do a charitable act and buy something they do not want and will never use. . . . Because these kind of propositions have been all that is usually presented to the student for summer work you are just prejudiced against canvassing for you know that it is next to impossible to make any money with them. Any men who could make \$150 selling books can easily make a \$1000 with my proposition.

I DO NOT WANT YOU TO PEDDLE OR CANVASS, I WANT YOU AS A REPRESENTATIVE OF THE HOUSE TO DRIVE THROUGH THE COUNTRY AND TAKE ORDERS FOR SIME SEED CORN DRYERS YOU HAVE NO DELIVERING OR COLLECTING TO MAKE—Delivery is made at a future date as the company directs. The demand for this proposition is already created. Every one is preaching to the farmer to take better care of his seed and to pick it early. He is picking it early and knows he must insure strong sure seed but to hang it up so that it will dry quickly and evenly is a tedious, bothersome and much disliked job. **AS SOON AS HE SEES THE SIME DRYER HE SEES ITS UTILITY TO HIM AND THE LOW PRICE CAUSES HIM TO BUY ALMOST ON SIGHT.** With it his children will take care of his seed corn. **YOU WILL BE PRESENTING A PROPOSITION FOR WHICH THERE HAS LONG BEEN A WANT.** It is a necessity of great convenience and will make him money. You will help increase the corn twenty-five per cent.

It is just as easy to make big money with this proposition and be happy as it is to barely exist and be discouraged with a dead line.

We pay you thirty per cent commission and give you a ten per cent bonus. Half of commission advanced on the order the other half when the delivery is made. We guarantee prompt delivery and you can look up our standing to make you feel sure of a square deal 50 per cent commission of you deliver. Our contract is simple with no "ifs" or red tape. The men say it is the best they have ever seen. You can get a commission on orders coming from your territory.

The Sime seed corn dryer is a new proposition more simple and cheaper than any other on the market. Each one hold two hundred ears. Average sale to farmer is for six dryers which cost him \$8.50.

THIRTY FIVE SALES A WEEK MEANS ABOUT ONE HUNDRED AND TEN DOLLARS IN COMMISSION \$110.00 AND OUR good men will do this right along.

Come in and see me immediately if this proposition looks good to you. The territory is going fast.

You may have another proposition or contracted and have been stung for an outfit. I am willing that you try it out and mine too. It won't take you but a few days to see what the seed corn dryer will make you. Surely your company can not object to trying both and taking the one that will make you the most money.

It takes no capital to handle our proposition.

Senator Beveridge and many other men say much of their success is due to the development they received selling goods during their summer vacation. It helped them get in to the **CITY OF BIG THINGS** which under every man's hat.

OTHER COLLEGES

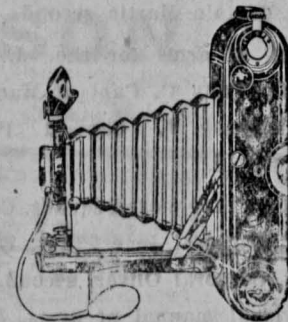

The freshmen of Illinois university have this year inaugurated the custom of holding an annual celebration for burning their caps.

Princeton University students have organized a water polo league consisting of four teams. The experiment is successful and teams will be organized next year.

Honorary senior fraternities and societies at Cornell University have declared themselves against social clubs. Resolutions were passed bidding the active members of the organizations to join any social club and asked those belonging at present to resign.

Cornell University claims the title to the Greater Athletic University according to reports made of recent investigations into the comparative number of athletic championships won by different universities and colleges. Cornell has thirteen and Yale is second with nine.

Missouri University will hold its commencement exercises in a tent this year because of lack of space in its auditorium for all the students. A tent 60 by 120 feet has been secured which will be provided with canvas seats. 2,500 people can easily be seated in the tent.

MAKING BIG PLANS FOR MOTOR RACES

Track Will Be In the Best of Condi-
tion—Some Fast Machines
Here

With the motor races at the Iowa City Speedway only three more days away, interest in this exciting event is beginning to center strongly. The association which has these races in charge announces that they have a brilliant program fixed up for Friday afternoon, May 30, and promise a day of thrilling sport for all who attend.

Although the recent rains have hindered work on the track somewhat, there is no doubt but what the saucer shaped oval will be in the pink of condition by Decoration Day. Teams are kept going on it from morning to night and the almost constant practice by the racers for the past few days has sufficed to

pack it wonderfully. In point of entries thus far, the list has not been completed. It is known positively however, that there will be at least a dozen contestants for the motorcycle prizes, and about seven automobile entries, among whom are Guy Fink, Guy Knease and J. S. Wilson, of this city; Charles Waite of West Liberty, an unknown entry from Washington, Iowa; and Paul Buck and R. B. Ristine from Cedar Rapids.

For the big free for all auto event Knease and his Cole is doped as a probable, winner although Waite with his big Moon and Fink with his 40 horse power Great Western may give him a close run for the first place. In the light car event, Wilson and his E. M. F. is the favorite, with Buck and his Hudson 30 as a close second.

ADVERTISE IN THE IOWAN

HYMN OF PRAISE TO BE GIVEN TONIGHT

CHORAL SOCIETY PRODUCTION
TO BE PRESENTED AT METH-
ODIST CHURCH

Clarence Eddy, William Clare Hall and Mme. Dorothea North to Assist the Big Chorus in the Evening's Program.

The University and Iowa City Choral society presents its spring offering at the Methodist church this evening. The first part of the program will be an organ recital by Clarence Eddy, the famous organist, and the latter part the rendition of Mendelssohn's "Hymn of Praise" by the chorus, under the direction of Gustav Schoettle. Mme. North, soprano, and William Clare Hall, tenor, will assist in the production. Following is the program:

- Organ Recital by Mr. Clarence Eddy
1. Festival Prelude and Fugue on Old Hundred—Clarence Eddy.
 2. "In Springtime"—Alfred Collins.
 3. Variations de Concert—Joseph Bonnet. (Directed to Clarence Eddy.)
 4. "Le Secret d'Amour—Oscar Klein. (Arranged by Clarence Eddy.)
 5. Toccata in F Major—Thomas Crawford.

Part II

- Sacred Cantata—Mendelssohn.
1. Chorus — "All Men, All Things."
 2. Soprano Solo and Women's Chorus—"Praise Thou the Lord."
 3. Tenor Solo, "He Counteth All Your Sorrows" — Recitative "Sing Ye Praise."
 4. Chorus—"All Ye That Cried Unto the Lord."
 5. Soprano and Tenor duet and Chorus—"I Waited for the Lord."
 6. Tenor Solo and Tenor Duet—"My Song Shall be Always Thy Mercy."
 8. Chorus—"Ye Nations Offer to the Lord."

The University and Iowa City Choral society is organized with the following officers:

- President—W. I. Pratt.
Secretary—Frank Sueppel.
Treasurer—Willard J. Welch.
Executive Committee—the President, Secretary, Treasurer and Director, Clark F. Ansley, George Sueppel, and Charles H. Weller.
Director—Gustav Schoettle.

gone and the film has gone with him. Two thousand feet of pictures were taken, showing the buildings and students at work.

The picture taking started in the morning when several stunts were staged such as "The Arrival of a 'Freshie'" and other arranged for the occasion. In the afternoon the work of getting the reel, "A Trip through the S. U. I. Campus" started in earnest. The engineers were the first to respond to the call of the camera. They started the picture with true Iowa "pep".

Old South Hall, that is rapidly being torn down was the next to receive the attention of the machine. From there the machine went to the front of the liberal arts building,

then to natural science. At both places the students were invited to leave class and come out to show themselves. The same process was

gone through with at the dental building, the law building and the was also caught in the reel.

Next the camera went down to the University hospital and snapped the nurses. Backing up, the homeopathic nurses and the chemistry students were grouped between the two buildings so that both could be taken in one panorama. Close hall was next put on the film.

Here the machine took a jump that does not show in the film. Next to the hospital, according to the film is the university dam. Nevertheless a fine picture of the old Iowa river was taken from the west bank. Coming back to the university, the medics were taken near the anatomy building.

The final view was on the athletic field. First the cadets staged a regimental review. Next the companies were caught in the competitive drills. Finally the track men lined up and did some classy work in front of the machine.

The idea of a moving picture of the activities at Iowa is the idea of H. M. Harwood of the publicity bureau. The bureau expects to use the film in advertising the university to prospective students in the state. Thomas A. Brown was instrumental in bringing the picture man here. The films taken will be shown at Englert's Friday, Saturday and Sunday.

"Movieisms"

The nurses at the university hospital had a hard time getting into the film. It was a busy day at the hospital.

The chemistry students staged a miniature scrap for the benefit of the camera.

"Buster" Brown was the big man yesterday. He was anywhere and everywhere seeing that everything went off smoothly.

The camera stopped in the middle of the cadet dress parade. Somebody said that the cadets broke the machine. This was a mistake, the film caught was all.

The students and professors showed the right spirit everywhere. Not one person objected to getting out for the camera.

This will be one of the biggest advertisements that the university ever had, it will show Iowa in its true light, said a university official when the picture was being taken.

Sanitary towels, cups, and soap will be placed in all the buildings of Indiana University, and it will be the duty of the student council to see that they are properly used. This was the decision reached by the student council. The towels and soap will be furnished free by the university but the authorities say that it would cost too much to furnish the entire student body with drinking cups.

NOTICE

The person who took the rain coat from the rack in the Liberal Arts building is known. He will return coat to rack today and avoid trouble.

ARE YOU GOING TO SUMMER SCHOOL?

JUNE 16--JULY 26

The Twentieth Century call for efficiency with the watchwords of "Economy of time" and "Full utilization of plant" has been heard by the colleges, with the result that we have in this country over six hundred summer schools with an attendance of over 130,000 students.

Many of the old fashioned summer schools resemble chautauquas, others were for students who had flunked. In either case the session lacked the tone and spirit of the regular session. Today this is all changed. The heads of the departments are in charge and the courses are so arranged as to co-ordinate with those of the regular year or with the succeeding summer. The summer students are drawn from the class of young men and women who wish to make every minute count; undergraduates who wish to take extra courses or to shorten the time for graduation; graduate students, who wish to take advantage of unusual opportunities to do research work; special students who feel the need of some special courses in order to increase their efficiency.

The summer session today attracts about all of the serious minded students who do not have to spend the summer in earning money for the next year's return.

Are you going to join the army of S. U. I. summer school students?
