"Dr. Angell has lately said that the History of Iowa is the History of her State. The greatness of the State has come through the growth of the Men Iowa has Trained."

The 1914 Hawkeye is the twenty-fourth edition of the University of Iowa's yearbook. It was published in Cedar Rapids in 1913. The yearbook features numerous articles, photographs, and illustrations, including a section on the state in the former event. This section delves into the history and significance of the state, particularly focusing on events from the mid-1800s to the early 20th century.

In the concluding paragraph, the editor expresses gratitude for the support and collaboration of the university community. The yearbook concludes with a list of names and roles of the editors and managers, highlighting their contributions to the publication. The text is interspersed with advertisements and notices, including information on the sale of dental laboratory supplies and a call to action for students interested in the field of medical illustration.
