Work in special museum work is new thing and has sprung up only in recent years. There is a big field for new students this line of work. The university of Iowa was one of the first institutions in the United States to offer courses in this line.

As long experience in the giving of the Shakespearean drama.

While variables on the whole plays some serious and tragic situations as is well known. It was the differentiation of the minds of those different situations that marked the consummate skill of the Ben Gleason company of players. The old man, one hand, the two drechs, the Yorvoll, were entirely different and characteristic personages in their rendering of morning and music until the time the curtain for the first act was raised. The costumes were still further diversified and died not arrive until the beginning of the second act. Up to that time there was no change. It was that the pleasure which every one of us by the derived from the production of the "Comedy of Errors." Humorous enough in the reading was a veritable pleasure to accomplish anything.

HAWKEYE RUNNERS
STILL IMPROVING
Weight Rather High—Men Rounding Into Shape—Hinds Hard
On the Track

"Although a black cat ran across our path last night, we are still optimistic," said Captain Sunnser of the cross country team when interviewed last night. The course is very hard at present but the men are improving in spite of all odds and all are rounding into shape. The average weight of the squad is still rather high but is being gradually reduced.

The weights are: Sunner, 134; Mather, 142; Jones, 154; Mak, 125; Hyman, 130; Hartman, 150. Jones is the heaviest man in the squad. Thwing is reducing rapidly. Scanlon the substitute is doing excellent work and bids fair to equal any man on the team. The work is being pushed very hard this week in preparation for the meet which comes off a week from next Saturday.

The country roads over which the hardy Hawkeyes are putting forth their best efforts are very hard and result in sore feet. Very little is to be expected from this quarter, however, as the men are well advanced in the art of running, and are consequently well able to stand the knocks and bumps administered by unfavorable conditions.
