EIGHTHUNIVERSITY MEN AND WOMEN ELECTED TO HONORARY FRATERNITY

Wesleyan Dean Speaks On Effect of Radiation and X-Ray Upon Development and Growth—Gives Interesting View of Episodes Problem

SIGMA XI ELECTION

Charles Allen, Bellmore, N. Y.
G. C. Aigle, Iowa City; J. B. Booth, Iowa City; E. B. Bond, University City, Ill.; M. Vrooman, J. W. How-

Corner; F. I, Iowa; Karl G. Grole.

Cedar Rapids; Miss Helen M. Moore, Iowa City; Carl Manor.

Walter Scott, Walter, Iowa; City; Carl A. Johnson, Burlington, Ia.; D. R. Bilt, Canton, S. D.; C. W. Williams, University City, Ia.; R. H. Sylvester, Iowa City; G. S. Carpenter, Waskon, F. H.

Gouldner, Iowa City; A. A. Frazee, Downtown, F. R. Mon-

Ingham, Des Moines.

Charles R. Goodwin, Des Moines, who has been the medical college of the University of Wisconsin, delivered the annual address of the Iowa chapter of the Sigma Xi, the national honorary scientific fraternity. Dr. Goodwin gave for his subject, "The Effect of the X-Rays and Radiation on Growth." The members of the local chapter, many physicians from over the state who were present at the meeting, were present in the society room.

The score against North Georgia university, the team which previously defeated the Corn, will be the next game of the season, according to Miss Louise of Wisconsin, delivered the annual address of the Sigma Xi, the national honorary scientific fraternity.

Barron, secretary of Sigma Xi, delivered the annual address of the Sigma Xi, the national honorary scientific fraternity. Dr. Goodwin gave for his subject, "The Effect of the X-Rays and Radiation on Growth." The members of the local chapter, many physicians from over the state who were present at the meeting, were present in the society room.

CARL FLESCHE

WORLD FAMOUS VIOLINIST

Theatre Guild production of the big fun festival "The Runaways" to make its initial bid for local favor at the Englert Theatre. The presentation is on Thursday, Friday, Saturday and Sunday nights and the usual matinees.

The most class theatromakers are assured of finding pleasure. In the clever work of Harlee Dewey and Mabel Rogers in this up-to-date musical comedy. This classy team is on the job. From an economical viewpoint the show is a bargain and it is advertised as "a charming bazaarian who spread his horizons. How their happiness is accompanied by a well meaning mother, a plain friend, a background of friendship, and an Irish father, form the main comedy incidents in this unusually funny musical comedy.

Dewey is given splendid opportunities to display his ability as an emotional dancer, and his rendition of "Bamboozle Hippo," as adapted by the American Porgy Ballet of ten medley dancers, sets a standard which will be hard to equal.

Don't Miss the Opening Night

In a small cordial, I would not want to express the results of my efforts to those who have considered the methods of cancer treatment. Together with his discussion of the X-rays, a description of these rays was included by the editor.

"X-rays, like X-raying," said the speaker, "have been found to exist practically everywhere on the earth, instead of being somehow in nature. The air in this room is not habitats of disease. Scientists like to experience the presence of X-rays from other objects.

The X-rays are similar in nature to the X-rays discovered by Rontgen. The physiological and pathological action of the X-rays of radiation and the X-rays are so similar that we may treat of their effects without attempting to "delineate," in general belief, and the "T" rays of radiation like the X-rays, cause inflammation and alteration of all those tissues of the body that are subject to their action. The effects on the hair and nails are similar to those on the skin. The cause, explained, was the X-rays, which have a history of the body being very susceptible to the rays. The bone marrow is another portion of the body where rapid multiplication of cells is going on and consequently is most affected by the action of the rays.

In taking up the treatment of the cancer by radiation and X-rays, the doctor said, "In charity, this has been estimated that from one-fourth to one-eighth of the patients are rendered free from pain for periods of years. It may be readily seen how much needed help a reliable plan for this terrible outcome. We have already seen that repeated exposure to the X-rays may cause cancer.

"In cancer we find that certain cells of the body become subject to growth and proliferation normally, when a lesion grows and invade other tissues of the body." It was explained that if proper rays were used in a specific way the rays would act upon the diseased tissue of the body. The X-rays would be deployed. This difficulty in the use of these rays is in the difficulty of exposing the cancer cells sufficiently to destroy the poison.
DELTA SIGMA DELTA IS 
NEW DENTAL FRATERNITY
