**WRESTLING SQUAD IS WORKING AGAIN**

Light Exercise After Contest Is Or- der of the Day for Iowa Men in Good Condition

The wrestling squad is putting in extra work this week in getting ready for the intercollegiate meet which will probably be held at Chicago instead of at Nebraska this year. The line-up of exercise which every man to the men this week has been rather light, owing to the circumstances after the match at Nebraska last Saturday, but beginning next week there will be strenuous work.

Just what the prospects for the Hawkeyes, men and artists in the intercollegiate tournament cannot be determined, but the information coming from the other universities in the conference the Iowa men have an even break. Every man on the squad is in good condition at the present time and with several weeks more practice should be able to meet anything in collegiate circles and hold his own.

No definite data has been set for the home wrestling tournament but it was announced yesterday that it would be held sometime after the intercollegiate gymnastic meet on March 7. At this time the champion ship of the university will be decided.

**OTHER COLLEGES**

Over $40,000 was loaned last week by students who are working their way through the university of Illinois.

The Minnesota Glee Club is making arrangements for a concert tour to be made during Easter vacation.

Michigan’s varsity baseball captain has resigned owing to scholastic difficulties.

**EXTENSION BUREAU IS MAKING MORE PLANS**

Several large cities in the state to be visited each week during March

Lectures sent to many cities over the state—Institutes to be given over the state during March. Amount of Work increasing

The extensive journey of the university of Illinois extension bureau during the month of March. Three more county institutes are to be put on during the month, and the influence and favor of the university to be further extended over the state.

Monticello, Guthrie Center, and Woodford are such to be visited by Fred Kingman and Holliston and their able associates, who will present programs at these county seats similar to those that have been given over the state during the past few weeks.

Vinton is to be featured by the institute on Thursday, Friday, and Saturday of this week.

Besides the institutes the department is carrying on other work over the state by publishing lecturers before the various county institutes in the large cities. W. H. Harwood, alumni secretary, goes to Muscatine on Friday night to speak before the Brotherhood of the Methodist church on "Why They Like Iowa," using some new slides at Oakdale and prince winning babies at the state fair which have never before been shown in this section.

On next Monday Prof. E. H. Hitt- man goes to Grinnell where he will speak before the Grinnell Civic League on "Civic Progress," following the first week in March, the exact time has not yet been set. Prof. P. S. Pierce will speak before the Thursday School of St. John’s Medical Episcopal church at Davenport on "The Church and the Labor Problem."

This lecture is to be given prior to the opening of the extension bureau.

Besides these lectures and institutes which have already been arranged for many others of a similar nature are under consideration. The fame of the work of the department has spread so widely over the state that they will soon be unable to supply the demand for their work.

The Register of the university of Illinois reports 7785 students enrolled for second semester work. This is the largest number ever enrolled there.

A ball of the university of Indiana are co-operating with the students in a campaign for a new gymnasium.

The annual "Washington" banquet of the alumni association of Chicago university was held last night.

WHY BALDHEADED MEN SLEEP IN CHURCH

RAFF PEERE GIVES INTERESTING
LECTURE BEFORE A. L. E.
YESTERDAY EVENING

In the small section of the American Institute of Electrical Engineers last evening on the subject "Modern Electrical Concerts," the lecture was given by Ralph Eyyes, a senior electrical and was illustrated with several stereopticon pictures. One interesting picture was shown by Mr. Eyyes in the course of the talk. He brought to light a new reason why bald headed men go to sleep more readily in church than do their wives or children. It had been discovered that a glaring light in front of one eye has a tendency to cause considerable drowsiness. Thus the women churchgoers with a big hat down over their eyes are not subjected to the glare of light from the organist's eyes, on the other hand, the old man of the household with his bold plate and outre spectacles catches the full ray of the lights and consequently is soon into slumber. Thus is refuted the ancient theory that the only reason bald headed men go to sleep in church is because their heads are unable to withstand the glare of light from the organist's eyes. In the old days people either keep the services by heart or else ask on par for them—either case not expecting better lighting than the old tailor dip.

In modern times the audience has come more and more to take an important part in the service, and their illuminations have become necessary. The refinements of modern electric lighting are the only things that will adequately satisfy this need. At this point Mr. Eyyes took up the fine points in arranging electric lights for satisfactory church illumination and pointed out many defects in existing lighting in some types of churches. The last lecture before the A. L. E. will be given by one of the society members of the electrical department. Marked interest has been shown in the talks of late and audiences have been steadily increasing. Membership in the society has increased this year until it has been said to be the largest of the student professional clubs in the engineering college.
