Volume XIII

STATE NEWSPAPERS ASKING FOR FACTS

TO IMPORTANT DEVELOPMENTS SINCE THE DATES OF THE LAST ISSUE

PUBLIC DEEDS IN IOWA

State Board of Control released the list of public deeds Having been recorded in the State records. Many questions of 'Exclusion cannot be made

NEWSPAPERS DISTURBED

Newspapers of state are now in a state of disturbance. They have been asked to state their views on the current issues involving the good faith of the state board. The state board has been asked to clarify its position on the current controversy involving the state board and the fact that a student has been expelled from school and has gone to work.

In an endeavor to buy and girls

The vocational bureau of which Mr. Bloomfield is head, represents the state board of control to discuss important issues and utilizes the ability of every boy and girl as an agent of the state. The problem of vocational education is now being discussed by all who are interested.

The telegram was received in one of the largest vocational centers of the state. The telegram received in the boys and girls who drop out of school and go to work, thus aiding in the citizens' vocational army, many of whom have become disillusioned.

In the view of the legislation involved in this state and the fact that a committee on vocational guidance has been appointed by the Iowa state teachers association, the university is expected to be interested in the subject.

Mr. Bloomfield will visit four cities while in Iowa. Bloomfield, Iowa State, and Bloomfield City.

THEOLOGICAL

Two noted women to appear here in April

Miss Blanchard and Miss Taft to be guests of State University Women for two days. Miss Leslie Blanchard, a national secretary for university women, and Miss Taft, a respected authority on the subject of music, will be visiting the state university.

The many friends of Dr. King and those interested in the work of the Iowa Union State University Women.

Highly Honored By Forrest Deardorff.

Dr. Bloomfield will address the state board in an endeavor to buy and girls.

The first announcement of the resignation of President Bowman was made in the state papers. It is not known what the exact nature of this resignation was, but it is believed to be due to the fact that President Bowman has been considering his withdrawal from the institution.

The story of the college of the state board, its work, and its organization is being made known by the department of psychology. (Continued on page 4)

IN ALL MY PROGRESSING, as a whole.

In order that attention may be focused on special charges, and for the purpose of clarifying or refuting them, the following statement has been distributed among the friends of the university. The Report and Register wishes to ask a few pointed questions of the men who are in possession.

Is it a fact that Mr. Trevor, at that time chairman of the board, demanded of President Bowman that Mr. Whitlow be named as head of the medical department? Mr. Trevor at that time served as attorney for the William Street.

Is it a fact that Mr. Boyt, member of the executive committee of the board, went to Dr. Bowman and informed him the importance of doing as Mr. Trevor demanded, and when Mr. Bowman finally and definitely refused that Mr. Boyd told Mr. Trevor, "I will not ask you for a place in the papers."

SEEK THE LIGHT

Now is the time for teachers at the state university to ask what they should do to carry on one of the best known deans of the university. The thought is excessively significant of the present situation here at the university. We believe that this same man would also quit his present time for students to work. We feel that it is necessary at this time for the students of the state university of Iowa to show what is in them. Despite the fact that there is internal unrest in the educational system of the state, it is no means effects the immediate interest of the student body. Nor is it true that the loyalty of the student body of the university was in such demand. We urge every student to thorough- ly study the facts of his situation and the tallies of this important educational question; to ask all items of interest to shape his notice. There is no service in the university pub- lic but who is vitally interested and should keep up on the progress of the situation.

Now is the situation at the present time so one can tell. Many and persistent rumors are afloat, but a careful investigating of these proves mostly of them to be false. We must always bear in mind at a critical time, like the present, there are always those who will eagerly light upon the most mundane inference and make out of it that which best suits their fancy, in fact, we have cause to feel that there are those who contrive of possible con- nections that might arise, and then so play upon their irrational notions that they are believed to be true. The most dangerous per- son one can have is the one who so wags the facts that they bear little resemblance to the truth. The one who knows the facts to express himself at a time like this. In due time facts will be given out and then will be the non-resident state board.

President Bowman's vigorous letter of resignation charges bad faith on the part of the state board and he furnishes his allegations with speci- fic recitals of fact which will cer- tainly vindicate his action in the public eye. The one who is really true to himself, loyal in his university and faithful to those who are working for his best interests, is open and fair about his work, and seeking self-defining details, and when receiv- ing them thoroughly sifting out all that he feels to be of untruth in any

TO THE STUDENT BODY

Just at this time, with the con- cern in state educational affairs de- manding the attention of every stu- dent in the university, we would be glad to have those who wish to be informed take advantage of the columns. We are endeavoring to represent the sentiment of the student body in all questions of in- terest, especially the one which is now paramount. But there may be some who differ with us in opinion, or there may be those who feel that we have overemphasized points in the discussion. The columns of the Daily Iowan will honor any ar- ticles which merit publication. Any anonymous articles are thrown into the waste basket regardless of mer- its.

THE BOWMAN RESIGNATION

Regrettable as are the circum- stances which have caused the resigna- tion of President John G. Bov- man, president of the Iowa state uni- versity, it is difficult to see how he could do otherwise and retain his self respect. No man is big enough and unless good reasons are given for the position of president of a great educational institution will ever content to stand as a mere of- ficial figure head. If President Bowman is qualified for the place he knows by the time this has been made public that a prac- tice of free splitting has been going on between faculty members of the medical department and pre- viously that of president Bowman's posi- tion in the matter was first under- taken. Later an attempt was made to reason this action and the matter is still pending—the handling of the whole affair evidencing a shifty and misleading policy by our state board. President Bowman has emphatically opposed, which is contrary to the better sen- timent of the medical fraternity we have always acknowledged as the ethical standards of any house of professional education.

The records of the state board show that President Bowman's posi- tion in the matter was first under- taken. THE IOWA STUDENT LOVES A BOOSTER

CSYLOLOGICAL TESTS ARE NOW COMPLETED

(Continued from page one)

in the university. The psychology laboratory has been equipped with an elaborate collection of instruments, which are used in the measurement of mental talent. Most of these instruments are new and have been designed by the laboratory, and built here, from time to time by the laboratory mechanism. When new instruments it has been necessary to devise new methods, and during the past few years a corps of research men have been at work making actual measurement for the purpose of developing tests and interpreting them.

The work is to be a great step toward the help of vocational training.

Making a liberal allowance for the innovatory which naturally would accompany the re-telling of these tales and for the tendency toward unconventionality which accompanies the employ- ment of the imagination, we feel quite certain that the "old palmy days" were more rigorous and less serious in character or more entertaining; but these are personal points.

Certain elements of these measures can be introduced into the public schools for the purpose of discovering mental talent. Now this can be used in a conservatory and in public school music as methods of training the minds of pupils, but also as a musical purpose, for the purpose of finding out just what natural talents the pupil has or does not have, what kind of music is best suited for him, and what are his particular needs.

The Iowa Student Loves a Succotash

The music loving student at the band concert was caught during a grand pause with the work "HAM AND EGGS" on his lips—

We might add in passing that we hope to be exempt from all adherence to rules laid down by the English department. We're not writing for credit. If necessary, we are sure that the business manager will see that all highbrows get a measured copy of the Iowa.
A. H. FORD DELIVERS AN
INTERESTING LECTURE

The electrical engineering stu-
dents listened with interest to the
lecture last evening, delivered by Prof.
A. H. Ford before the A. I. E. E. moity. He dwelled on the subject of "Modern Filtration Environments for
Automotives."

The discussion dealt with the
phenomenal development of the auto-
mobile during the last few years, and the
progressive engineering devices which had aided materially in this
development. Prof. Ford pointed out that the use of electricity in
gasoline automobiles might be an
agency to limit the mixed gases in the
car engines. This is a use still
unestablished, spark plugs and in-
jection oil being a common fea-
ture on all automobiles.

From the early use in ignition sys-
tems, electricity has been steadily
increased and is now used by other
functions in the operation of au-
tomobiles. Electric lights, tail-
lights, cranking systems, and steer-
ing devices have all contributed to the
features introduced. Prof. Ford pro-
ced that the day was not far dis-
tant when the gasoline engine as a prima
engine would be discarded altogether,
and electric motors substituted, thus making the automobile a totally electrical affair instead of partially so at present.

Professor Ford's lecture was illu-
minated with occasional bits of
humor, and was among the most en-
tertaining yet delivered before the
society. A good many of electrical
students were in attendance, further
augmented by a group of automobile
enthusiasts from the L. A. college.
The society aims to make the lectures
technical in nature as far as possi-
ble and students from other colleges
and finding them increasingly
interesting, will be attended by a
practical manipulation of such electroni-
ic machinery as they have occasion to use.

The talks are given on the second
every other day evening of each
month in room 21, physics building at
7:30 p.m.

APRILHEIM NOTICE

The regular meeting of the Alumni
will be held tonight at 1 o'clock.

ALL UNIVERSITY
REUNIONS PLANNED

Letters Are Being Sent Out to Five
Thousand Alumni Regarding
Regarding Class Reunions

That settlement of the alumni is
in favor of all-university class re-
unions at commencement time is
confirmed by the preparations now
being made for the annual class re-
inivions to be held June 14-17.

The lectures which are now being
sent out to the alumni advance the
4th formal classes generally favor one
big reunion of classes from all the
colleges, liberal arts, engineering, medica-
]ce, dentistry, and students.

The regulations that are so far
been arranged are unanimous in
advocating the plan, so that pre-
sents are good for an ungraded
and series of reunions in spring.

Calls for class reunions have al-
ready been sent out by Miss Maude
Trewin of the class of 1904, Arthur A.
Fenn of the class of 1911, W. W. Mercer of
the class of 1908, and others will be sent in the near future. In all
all of these students and students and are to be invited to re-
turn in reunions of their classes, and to be invited to return in reunions
of their classes, and to show that this number is expected to
return.

A TREAT FOR BIRD LOVERS

To those who heard Mr. Henry
Oldy's enunciation of bird music on the occasion of his former
his former visit here, the announce-
ment of his lecture of "Bird Pro-
tection and Bird Music" will be most
welcome. Mr. Oldy took a promine-
cent part in securing effective na-
tional legislation against the im-
portation of the plumage of birds,
probably the most important move
for bird protection of the present
century. He says he has numerous
additions of his previous lectures on
bird songs, and his lecture will be a
rare musical treat as no one has
turned to reunions of their classes, and to show that this number is expected to
return.
