NUMBER 25
Practically every student in the university at the present time spends some day to graduate, and we believe that every one of those who expect to graduate would rejoice if every student in the under classes stayed until all the examinations were ended and then the whole body leave together. We believe that the student who stays for the commencement week gets more of university life, but also he really appreciates what commencement means.

PETNIS

A larger number of men are out for tennis this year than ever before, and the coaches can accommodate more if a little crowding is done. Four new men have been opened within the last few weeks and more room is always necessary to play the number out. It is still unsatisfactory as Manager Van der Zee reports that he had great difficulty in getting a second man to represent Iowa in the state meet at Cedar Rapids. The chief trouble seems to be in the fact that those who are really eligible do not care to get into line for such a tournament and those who can play are ineligible. In such a case as in other sports when a new man may be very many men out, thus making any great victory impossible. Tennis is an outdoor game that requires skill and quickness but not great strength. Not only does not require skill and agility but it also develops them to a surprising degree. We believe that every man of the university who is interested in athletic sports has been rewarded to a certain extent. We believe that giving the university monogram to Board, among the visiting soloists is Rapel. Phone 235.

in a table which shows the number of physicians examined by state boards from 1905 to 1915, inclusive, there are only six states which have the lowest percentage of rejections that the highest. The percentage of rejections was 52 per cent in Mississippi, while the lowest rate of rejections was in Wisconsin. Wyoming, Indiana, Ohio, Delaware, and Iowa.

The report by the select on medical education also shows the number of colleges classified as A Plus to be twenty-seven, including the university of Iowa.

What Other Editors Think

Signing Over Funds

A movement has been started by a few students to sign over to the Board of Governors of the Minnesota Union their deposit fee refunds. For the purpose they were placed on the positive bulletin boards this morning, and will remain there from now until the end of the school year. The plan is a novel one and should meet with success. There is perhaps no way of giving to the Union that will be as easy for the student who finds this last month of the year the decidedly "lean" time of the whole year. For those whose post fees are daily depleted the solicitors will be inestimable. There are many who have been less hard on their "good-faith" money or who have made double deposits and thus have the major portion of the amount deposited for them the plan offers the easiest way of making a substantial cash contribution toward the building fund this spring. For hundred or two thousand suggestions to those who has been reduced in the past few weeks and more ------------------ ________________

TRACK

The careful and consistent training of the track men by Coach Jack
Watson was fully demonstrated to the student body and to every per-
son in the state of Iowa last Satur-
day in the state track and field meet.
Coach Jack Watson, in the same man-
ner as the new ruling places his
son's efforts to be at least twenty men try-
ing out for the places whereas there
will gradually come to the front un-
til Iowa will be one of the foremost
universities in athletics in the United
States.

COMMENCEMENT TIME.

There is a feeling of realismness
in the activities at present. University
and there are just three weeks of school. Many longings to go home
are heard every day on the street
by the campers and in the editorial
rooms. Yet the student body must
remember that there is yet a great
deal of work to be done. Final re-
views and examinations and then the
commencement time.

It is the commencement time of which we wish to write this morn-
ing. Mr. Watson stated that there
are just three weeks of school and
they are going to be and we know that the students are want-
ing to get away for the vacation
just as soon as possible but we wish to Yourn the student body
that we are not the one in the university that she or he is missing
something really worth A.|YCI 0.
they her not stay for the commence-
m ent time and that they will be of
very little to stay and help to gradu-
ate the seniors.

LOW SCHOOL
HOLDS EXERCISES

Class day exercises for the graduating class of the Iowa City high school were held in the high school auditorium at 7:30 last evening.

The program is an annual affair and much interest is taken in these final class exercises by both the high school students and the city as well.

The program consists of class songs, programs, etc. Several de- spectacles in the way of presentation of scenes from literary masterpieces, etc. also make last evening.

The program in full is as follows:

Song by the class—Written by Dorothy Paulus.

Demonstration in domestic science—Maxine Rogers, Ruth Airi.

Class poem—Florence White.

Our Past—Lochle Walshe.

Experience in English—Basil Brown, Hazel Shock.

Our Future—Miriam Chase.

Sing by the class—From "The Princess."

Maude pigott—Will Nagel.

PHI PSI TEAM DOWNS
SHOGO NU AGGREGATION

Sunday Tvinci No Hit Game in
Flat-Bottom.

League

Yesterday afternoon at Black Springs Psi Kappa Phi defeated Sigma Nu 4 to 1. Stevenson pitched罢了 attractive ball and Sigma Nu were unable to connect safely. Few hits were made on the part of Sigma Nu which may have won. Psi Psi chalked up two runs in the second and after Sigma Nu counted in the fourth, came back to the dish with two more catching the pitcher.

Batters: Fees and Cooper.

MANY COMMENCEMENTS
BULLETINS ARE ISSUED

(Continued from page one.)

The laboratories and the class rooms. Much has been said and written about the Bermuda expedition from the State university several years ago, but there has never been a complete report published of the work done by Professor A. E. Verrill.

At the present time, there is on the press a bulletin which will give in full the report made by Professor Verrill, upon the work done while in Bermuda Islands.

This bulletin contains the most complete Monograph of Star Fish that has ever been published. But the star fish do not make up the whole bulletin. In fact, it will cover the natural history of the Bermuda Islands, and is illustrated with twenty-eight plates.

2,690 in September.
