LAWS OF AWARDS BY UNIVERSITY IN HEAD AT COMMENCEMENT EXERCISES

As a part of the commencement exercises of the university, the prizes offered by the friends of the university were read and the fortunate recipient of each was announced for this year. The following is a list of the prizes and the persons receiving them:

The Elder Daughters Prize—The older daughters of the university, for a prize of $50, for a speech in English composition. Awarded to Miss Esther F. Smith.

The Old English Prize—The early English Text Society at London of the society of the Old English for a prize for excellence in Old English. Awarded to Miss Anne Elizabeth Lindholm.

The Thomas J. Cox Prize in English—Mr. Arthur C. and E. Ll. B. of the engineering class of 1911 and the law class of 1893, have established an annual prize of $100 in memory of his father, to be known as the Thomas J. Cox prize in English. The prize is awarded for a term of 50 years, with the institution of degree in engineering in the college of applied science. Awarded to Forrest Allen Richards for his thesis, "The Influence of the Oxygen in the Turbulent Engine Indicator Attachment."

The Journal of the American Pharmaceutical Association Prize—A prize of $10 is offered by Assistant Professor Cooper to the senior student attaining the highest rank in practical pharmacy. Awarded to Miss Libby Tennis Dyke.

Nutting Prize in Iowa Pharmaceutical Association—Membership in the Iowa Pharmaceutical Association is offered by Assistant Professor Cooper to the senior student attaining the highest rank in practical pharmacy. Awarded to Herbert Martin Fredrick Doden.

Kuever Prize in Iowa Pharmaceutical Association—Membership in the Iowa Pharmaceutical Association is offered by Dean Tuttle to the member of the graduating class for the year who in competitive examination is rated highest in knowledge and deportment of organic drugs. Awarded to Herbert Martin Fredrick Doden.

Max Mayer Prize—An annual prize of $5 for excellence in scholarship, in athletics and in all-round ability. Awarded to Leon Gibson Dick.

Bryan Prize—An annual prize of $5 has been established by Hon. C. J. A. Curwin, be being held in the natural science faculty, following the class day exercises upon the campus.

At the conclusion of the exercises the individuals who gave funds to support the exhibition, the members of the state board of education, and the exhibitors of the equipment will be given an opportunity to see the exhibit in its complete form.

The exhibit represents a scene almost typical of the state. In looking at it without getting the glass barrier between you and the beautiful quality of the display, you'll have missed it. The island is mostly birds, and great to be out in the open.

PRESENTATION AND ACCEPTANCE BY PROF. NUTTING NOTTING AND PRESS MACHINE

Result of idea conceived when Prof. Nutting visited Laysan Twelve Years Ago—Prof. and Mrs. Corwin Crellin, Des Moines, 12 years ago last month, at the University, owned Laysan Island, a coral atoll, attained almost entirely in Mid-Pacific, about 1,000 miles west, and a little north of Honolulu, in company with a party of naturalists and students, the late Prof. E. E. Abbott, studying the aquatic resources of the Hawaiian Islands, under the auspices of the U. S. B. and I. Laboratories.

During the study of the Hawaiian groups of islands, the party visited the Laysan Island. The day before the party arrived, the first boat had left, and the vessel that did not follow the other boats. However, some Japanese fishermen coming out to the Abali Wisconsin, and one of the ablest and most skillful of the party was taken, and thus, combining and photographing the marvellous bird life.

It was during this trip, on the last boat's trip, that Professor Nutting conceived the idea that a Cyclorama of the island with all of its birds, would be a great thing for the state University of Iowa. Since that day, twelve years ago, Professor Nutting has been ceaselessly laboring to make the Cyclorama a reality, and in 1918, the favorable attention of the State University of Iowa.

This Laysan Island exhibit, the unique dream of twelve years ago, has been realized, and we are all sure of the ability of Professor Nutting to complete the exhibit.

I am glad to present the Cyclorama to the University, as a part of the commencement exercises of the University of Iowa, and to the students of the University, as a living record of our past and present work.

DEAN GUTHRIE IS HONORED BY ALUMNI

Presented With Cup As Token of Appreciation—Has Many Students

Dean Guthrie, of the college of medicine, was completely surprised yesterday noon, immediately following the annual alumni dinner, when he was presented with a beautiful loving cup, by his former students. This was the most important feature of the alumni dinner.

Following is the presentation speech, in part made by Dr. E. R. Kornoff of Boise City:

"I come to you and remember a normal degree of embarrassment at this time. Nevertheless, I want to express my extreme pleasure in being here today. To return after thirty years and have a small part in the commencement program of the university, is a great pleasure; a privilege which I greatly appreciate and a pleasure that is genuine and sincere. I find it hard to express my feelings, my surprise and my satisfaction in the wonderful change the years have brought. The growth of the university, its training ability and varying, is greatly pleasing. I am greatly pleased.

"The first thing I want to acknowledge is our debt to the Board of Education of the state of Iowa, our debt to President Macbride of Chicago, our debt to the members of the university faculty. At the conclusion of the exercises, and the credit of Professor Nutting is not for the place, his long years of special training, his intimate knowledge of the work of the university, perfectly qualify him for the position that he now holds.

"I want to thank Dean Guthrie in the name of all of us. I believe him as a student, as a fellow, big in stature; big in heart, big in character, the artist, and keeping the faith of the University to do good.

"To have a friend, one must be one, and Guthrie became very popular with the fellows of his class. He was our Class President.

"Standing as a student, the dedication of the faculty, and he was named valedictorian of his class, of 1918, a post he filled, big in stature, big in cordiality; big in all the qualities of a strong and vigorous man.

"The last of our beloved and much loved Dean Guthrie, I believe him as a student, as a fellow, big in stature; big in heart, big in character, the artist, and keeping the faith of the University to do good.

In response to the presentation speech, Dr. Guthrie said in part:

RESPONSE BY DOCTOR GUTHRIE

Ladies and gentlemen, you have been kind enough to extend to me the very greatest honor by inviting me to address the very best of my Alma Mater...
