ENGINEERS TO PLAY LEADING PART IN MOVEMENT FOR INDUSTRIAL EDUCATION.

Has approval of Engineers and Faculty—Work Under Industrial Department of V. M. C. A.—Fred Kings Start Work Here.

Under the direction of the F. M. C. A., Mr. Fred Kings of the collegiate industrial department has been in the city conferring with many students in regard to work along this line.

The idea of the movement is to secure cooperation between the men who will be industrial leaders, and the men with whom they will be associated in their work. The time has now come to study possibilities, and to see that arrangements are made so that the men will be able to take advantage of the work along these lines. Fred Kings, who spent the past year at Stewarts, is a native of Iowa, and an excellent man.

He will begin work here and there is no telling how far he will go in this work of organizing the interest of engineers in industrial education. Kings has the approval of the Engineers and the Faculty.

THE DEBATE.

To the Iowa student who is interested in making his university well known in other inter-collegiate activities than athletics, the Iowa presidential debate is one of particular interest. Three men who have worked since the opening of school on a difficult question will defend Iowa against Illinois. Mr. Newlin of the University is to be distinctly in Iowa's credit to win this debate, and a good audience and an at least a nominal display of interest and enthusiasm will be a help toward winning it.

LOVE AND GOLD

Who Doesn't Thrust for Them?

One man thirsts for Gold—one for Love.

These gripping human emotions make a cringling, bashful scene of one man—a master, a genius and a hero of the other.

But the girl, Ruth Gallon. What of her?

Hers was the most nerve-packing, vivid, thrilling experience of all. It was she who was practically buried alive—threatened on every side with certain death by rushing water, with fire, falling rocks, yet it was she who found the key to perfect happiness.

This key is the MASTER KEY—the only key in all the world that every human seeks. You can learn of this assumes happiness by seeing the sublime MASTER KEY serial now running.

"FIGURES OF SPEECH"

Some people put 2 and 2 together and make 5 out of it. That is "Gossip."

Some put 2 and 2 together and make 22 out of it. Occasionally that is "Finance."

Advertisements sometimes state that the value of their goods is higher than the price asked. This would sound like "Something for nothing," but we do not recall to mind that cruel proverb: "Nothing for nothing—and very little for a cent."

Advertisements with leading prices are sometimes misleading.

That, every one favours "Honest Advertising" is a fact too well-known to require an affidavit.

But some people are naturally more addicted to honesty than others—just as some have a better ear for music.

Christmas perplexities vanish in a House of Merchandise guided by honest endeavour, where one can find useful gifts of characteristic superiority; at lower prices, when compared with weak imitations elsewhere.
