The Autograph Kodaks

You can now date and title your negatives, permanently, and

almost instantly at the time you make them.

Touch a spring and a little-door opens in the back of the Ko-
dak, with pencil or stylus on the red paper of the “Auto-
graphic Film Cartridge, appear from 2 to 5 seconds, close
door. When the pictures are made you can have the writ-
ing appear upon them or not, just as you choose. By turning
the winding key slightly and advancing the pointer to the
width of the slit you can have the writing appear on the picture itself if you wish.

Any picture that is worth taking is worth a date or title. The

placs of interest you visit, the autographs of friends you photo-

graph, interesting facts about the children; their age at the
time the picture was taken—all these things add to the value of a pic-
ture. The careful amateur photographer can improve the quality

of his work by noting, by means of the Autographic Kodak, the

light conditions, step and exposure for every negative.
