Known Notable Expansion

The department of home economics at the beginning of its 1938-9 year of work, shows a remarkable expansion in all courses.

To meet the needs of those students who took up the work in home economics when the department was first established, and for the benefit of those who have since chosen this line of study, five new courses have been added this year. Home-hold management is now a part of the regular upperclass schedule, and a seminar is open to seniors who are specializing in home economics. Exact figures of the registration in the home economics departments have not yet been compiled, but a comparison of the size of this year’s classes with those of last year shows a large increase in the number of students regularly enrolled.
