

The problem of military preparedness as it applies to China is receiving a lot of thought from committees now working in that country. A Chinese student who is doing graduate work in engineering at the State University of Iowa.

The plan of preparations which Professor Hawkeyes are finding that the men of the country who want to be prepared and put them in charge of trained officers. When a man has been a member of a body, a public building constructed, or other work of the kind undertaken, the soldiers would be available.

They would spend eight hours a day at such work and two hours a day in military training.

NO SLEEP WITHOUT DREAMS

Most Intense Dreams We Have We Do Not Remember—

There is no such thing as dreamless sleep, declares Prof. Carl E. Sehafer, head of the department of psychology at the State University. In most cases the mind in a state of dream consciousness at all times in the state of sleep.

"It is only the exceptional dream that is wholly free from the light or disturbed sleep. Sleep-walking occurs only in deep sleep, and, while awakened in the act, the sleep-walker has no recollection of his actions. One case in which sleepwalking has occurred in a man who has been conscious of his actions is reported in the story of the man who was taken to the river to take a swim while asleep once. Only when he awoke did he recollect what he had been doing." 

Professor Sehafer has conclusively proved the fact that the man who says he does not dream in error, the psychologist declares.

which constitute but ten per cent of the population who want the independence. He showed that the Filipinos are facing three problems—uncertainty, they have numerous factions which cannot be satisfied; they may be induced by Japan; most of the population has not yet submitted to the customs of servitude to which they had become accustomed while under the Spanish rule. By comparing the case at issue with historical parallels in the case of Mexico, Davao and China, he proved that the Filipinos are incapable of self-government. Independence would mean destruction financially and industrially as is evidenced by the fact that they have no imports, which is their chief agricultural product. Finally, they as a race, have not shown sufficient intellectual and political ability to cope with so great a problem as independence.

The novelty of this debate was that it was not excited by faculty members, but by undergraduates. Victor Pole, a varsity debater, with the help of Adolph Wickman, carried the burden of the work. Judge Baldwin of the Circuit Court of Chicago, Judge Reman, Ohio, Justice of the Superior Court of Cook county, and Attorney General of Chicago acted as judges, while Professor Horace Pelz acted as chairman.

Entered at the post office at Iowa City, Iowa, as second class matter.

The Northwestern debate

The Northwestern debating team, composed of Carl Marcus and Clifford Northcott, which debated Iowa, suffered defeat in the debate held be- fore a fairly large crowd in Pikes Hall last night. The question at issue was: "Resolved, that the United States grant the Philippines independence within four years." According to Mr. Lantore, "the clash was as good a one as has been held here for a long time," but the decision did not surprise him.

Study pane of the Northwestern team was composed of Carl Marcus and Clifford Northcott. Mr. Marcus began the argument by quoting the percentage of educated people in the Philippines as 1.6 per cent. He said that the Filipinos are facing three problems—uncertainty, they have numerous factions which cannot be satisfied, they may be induced by Japan; most of the population has not yet submitted to the customs of servitude to which they had become accustomed while under the Spanish rule. By comparing the case at issue with historical parallels in the case of Mexico, Davao and China, he proved that the Filipinos are incapable of self-government.
