FALL ENROLLMENT FEELS THE EFFECT OF THE WORLD WAR

Report from Registrar on Nov. 1 indicated decrease of 15.25 Per Cent.

The Work Related to the Study of Medicines is the Only Place With Increase.

A report just released by Registrar R. C. Dorne states that the report on Nov. 1 this year was approximately fifteen per cent less than that of a corresponding date last year. The increased summer session attains this year, however, makes the decrease for the year a little less than six per cent.

The total enrollment last year on Nov. 1 was 3,313, while this year's total enrollment showed at that time 3,230. The totals one year last reached 3,253 and it is a certainty that this year's report shown at this time will be appreciably enlarged before the end of the year.

Law College Affected Most. As is the custom in these colleges and departments in which non-students predominate, the law college is the largest. The decrease in law students has been more than fifteen per cent. The law college in the university, was tells from 26 to 18. Last year the center college class numbered 231, this year it is 17. The decrease in the second year class from 17 to 15 and the freshman in the freshman class is 27 this year where it was last year.

The only places which show an increase attendance this year are the colleges of medicine, the college of homeopathic medicine, and the music and art college. In the last college the attendance has increased from 163 to 168, the college of homeopathic medicine has 3 more than a year ago and the school of music and art, is advanced to 11 is shown in the table.

Largest College Loose 200. Liberal arts total of 1,495 last year has been cut down to 1,475. Here again decrease of men in the senior class, most of whom are eligible to military service, is particularly striking. The number of men in this class this year is less than half as large as it was a year ago, but there are 7 more women than there were last year.

The greatest loss in the college of dentistry was in the first year class. A total of 80 from 114 to 34 has been reduced. This college in the university, is last year and 30. The majority of these men are first-year men who have been dropped from the register in this last. Pharmacy's attendance had been diminished by over sixty per cent.

Commoner Smaller. In general, however, in liberal arts and most of the other departments it has been deducted that the senior class has droped only when, as will be the case last year but the fourth year particularly will not accent in enrollmen and 15 or are the respective losses (Continued on page 4).

E D U C A T O R S' M E E T I N G A P P R O A C H E S
President of University of Indiana To Address Students Here.

During the meeting of the American Educational Association, to be held at this University November 8 to 10, there will be thirty or forty of these distinguished educators from all over the country in attendance. One of the important meetings of the day will be held in the public but the University has arranged to have one of the outstanding dedications to students and faculty at a public loco.

"We are fortunate, Dean Beaches declared yesterday, "in securing for this purpose President W. H. Brain of the University of Indiana who will be on the subject of the "First Order in Defense," in the liberal arts section lecture at 7 o'clock, Thursday evening, November 8. The address will close promptly at 8."
FORGETTING THE DOG

One of the things that stood out in the talk by Captain Melville Sunday afternoon was the typical soldier's philosophy which he gave without any form of apology. "The man didn't care whether he lived or died, and that, I think, is all I have to say about the proposition," is an excerpt from his address which carries a world of meaning.

The institution of war has ever made the individual forget his own being. It is in that which the utilitarian attitude is in the matter of the group with whom he is fighting. Personal guilts and selfish attitudes are not in the mind of the good fighter.

Here from our gallery seat is an American university, the tendency of the war spirit to mould people in a common purpose has, for the most students, removed the thought of personal achievement through education.

The nation's theory in maintaining institutions of higher learning in this pestilential time is that it will create a group of educated persons to exploit the nation's resources during and after the war. The theory is mistaken; if, by fostering education, the country will be better equipped to cope with the war and better prepared for the reconstruction era after the war.

If it is duty to students to harmonize our ambitions with the interest of the nation.

WE LIKE IT

Students generally like this year's student directory better than any directory that has been issued in the last five or six years at least. It has the information that the people who do the selling, the catalog does, and in most cases is reliable.

The booklet is printed on paper suited to extensive handling, and the typographical errors in students' names and in the names of towns are less frequent than they have been in former directories. Although the work is attractive and the student body is interested in the people who are responsible for the work, it is against the spirit of the truest scholarship to think of it as an authentic and servile work.

BETTER SERVICE

In regard to the number of times this should be left at the editorial on the ground floor of the library, the editor says: "There were several items left at the building last year, and which, because none of the editors is present at that place during the day, should not be expected to be present and answer questions about them."

This year has been a great event in former years, there is a great deal of activity to describe to its magnitude. This year. The return of several hundred men from war service is almost enough in itself to make the occasion exceed all precedent, but when the students, faculty members, and alumni in service return about it to maintain their honored guests as royally as they can, something unusual must be expected.

In his summary, Dr. [Name] contributed by Dr. [Name] in his paper on the value of the colleges and their newspapers, the following morning he nervously looked over the Iowa, and his partners. He then met with the reporter that journalism was in the basement of liberal arts, and attempted to warn him away from such a tyro of journalism that was worn out, to prose before the council in journalism was offered in the University catalogues.

After much labor and sweating, he finished his copy and surrender it to the copy reader, who leaves the office with a feeling of relief and anticipations.
