Hawks' Overweight Cyclones Over Ten Pounds to the Man

With a light signal drill on Iowa field yesterday afternoon the Hawkeye star finished the final practice of the season with perhaps the poorest of form in several years. The Hawkeyes weight of the 227 pounds. Their size was a reflection of the dominance over the other players on the team. Their size contrasted sharply with the weight of the Cyclones which make up the bulk of the Iowa team. The Hawkeyes were 227 pounds to the man and the Cyclones were 187 pounds. The Cyclones never gave the Hawkeyes a chance to make a play.

The Iowa Press sent a reporter to the field yesterday afternoon to watch the practice. He found the Hawkeyes with a marked advantage in size. The Cyclones were weighted 227 pounds to the man. Their size was a reflection of the dominance over the other players on the team. Their size contrasted sharply with the weight of the Cyclones which make up the bulk of the Iowa team. WELCOME, ALL.
Alumni, friends and visit-
ers, the present student body is
right glad to welcome you to Iowa’s homecoming.
This is the first winter homecoming.
The weather, therefore, a peculiar sit-
uation.
There isn’t much to say about it.
We’re just right pleased to have you
all back.
The city is yours.

DEATH OF PENNIES NOT FELT HERE YET

W. M. McKeen of Engleit Theatre Boys Scarcity of Coins is Not Felt Here.

The fourths which has driven in several cities as a result of the war tax on theatre tickets has not been felt as yet in this city. W. M. McKeen, manager of the Engleit Theatre said yesterday after the start of the tax that "Iowa Fights." "The children of university professors are not superior mentally to those of other classes of people," was the statement made by Dr. Ren·

goton, director of the elementary school. According to the current examination it has been proved in this school that the child from the farm has just as good an opportunity to get good grades as the one who is reared in a psychological or social.

There are one hundred and fifteen students enrolled in the six grades which make up the elementary school. This school stands as a labor

for University students who are taking courses in supervision so as to become principals or superintendents. The idea is to discover the best possible source of and the best methods of teaching these students.

The striking feature of the school to the visitor is the building-like atmo-

sphere. The little people are made to feel that an unaccustomed atmo-

sphere is not foreign to them.

In the words of a professor of education, "The disciplinary power

is more in use but is not so

alarming."

It is interesting to the observer who is accustomed to the odd and

strange methods of questions and an-

swers to hear people of ten years real
discuss a topic intelligently. Each

child conducts himself as though he was a member of a business firm

whose brain was the class work

assigned.

The world is a stage and all men merely players.

We Cater to Your Tastes

Have you ever considered why it is that the cigars and tobacco you get at our store always have their original flavor?

There is a reason...It does not just happen. It is not enough that we purchase fine stock. This is essential. But in addition to making good selections it is necessary to keep the stock in proper order that it shall retain its flavor...This we do. It requires the right amount of air, moisture and temperature. It has become a science with us. Every known and approved device to keep our stock fresh and sweet has been installed.

Most every cigar smoker knows the disappointments that come from lighting up a cigar which is too dry. It not only has lost its flavor, but its wrapper often breaks and falls away. Again, if the stock is too damp the tobacco takes on a bitter taste and is soggy—spoilmg the pleasure of the smoke.

The same thing applies to smoking tobacco, it requires knowing and expert handling to keep it just right.

Let us cater to your taste.

Money Back if we fail to thank you.

MIKE MALONE

"The Home of Good Tailoring."
James A. Gallagher

Age 20

Weight is not always a desirable thing in football, but Gallagher has the ability to make the most of his 190 pounds. He is a capable ball carrier and has shown great ability in the field of kicking, and general offensive work.

Raymond Justin

Age 20

Justin recently moved to Iowa City from Grinnell, Iowa. During his residence in the Wolverine capital, he played football three years with his home high school. He is primarily a quarterback, but the reverse is also true, good men agitating for this position made the hard choice. Justin is only a sophomore and there seems little doubt that he will win the gridiron this year.

Frank Peterson

Weight 160

Age 21

To possess no Interscholastic football experience and make the eleven in the first year out is a fact not often accomplished. This is the record of Frank Peterson who will play at left halfback in the contest this afternoon. Absorbing all the Coach's remarks, watching the regulars, constantly learning and improving. "Pete" started his first game against the Great Lakes Training School on November 13th and gave a consistent exhibition both on offense and defense. He never comes to move ahead until the white lines, picks the openings in the defense with ease, and if he is loosely stepped by Ames this afternoon, it will be the same line which has done so this season.

Albert P. Jenkins

Weight 150

Age 21

Human beings are as prone to publicity that it is seldom only one pushes to the front through forces of circumstances or particular ability, that heender the same of his own superiority over his fellows. It is very easy to make yourself believe that, whatever you accomplish, you are comparatively nothing in the universe; especially when everyone is so outward effort. Commanding respect on the gridiron, a dangerous forward on the basketball floor, possessing a frank and friendly personality, Albert Jenkins is a student of whom any university would feel proud.

Harry Hunkelman

Weight 170

Age 21

It is in accordance with the inherent vanity of the human heart that most of us must tell the world about our exploits in various ways. Some are more adventitious than others. The Iowa often reaches the ears of out- of-door devotees by devotional routes. However then and when we come in contact with an individual who does much. Harry Hunsaker is a man who is seldom heard but is always playing football all the time. His voice is not obvious above the roar of the game, excepting on occasions. Right to the last; but due observation will generally find him under­ scalling the play. "Harry" first appeared on Iowa Field last year and worked until he made the varsity. He is seldom working over school, and has been working over school, and Hawkeye lines.

Glen J. Greenwood

Weight 190

Age 21

It is too often the case, that stars of the freshman eleven do not mater­ nize when actually competing for varsity positions. Either do not return to school, or they do not appear so well when compared with the first class football men of the university. One exception to this rule is Glen Greenwood. No sooner had the Webster City star stepped onto Iowa Field in his freshman year, than Parley bottled him in as a varsity candidate. When he appeared for practice this fall, he displayed the same superiority, and from the first, the right side of the Hawkeye line has been strength­ ened by his presence. Greenwood has played a steady game of foot­ ball throughout the season, and he is a good man and tackle, and the big lines are already being predicted as one of the greatest of Iowa's gridiron stars.

Earle McIlhenny

Age 21

Earle McIlhenny came to the University of Iowa from Philadelphia, Montana. Aside from playing some independent football, he had no experience and did not expect to make the varsity in his first effort. His position in the team, however, was as the end in a single contest, he still stayed out for practice and was a consistent and earnest worker up to the final game. McIlhenny weighs 175 pounds, and with his constant effort should make a valuable lin­ man next season.

P. H. Belding

Weight 150

Age 21

Early in the season, Belding at­ drew the attention of Coach Jones through his speed which was particu­ larly noticeable on the running ten­ sers of the slow varsity squad. He was placed at left half for a time, but his total lack of previous experience in football at length caused his re­ moval. Building never ceased in his efforts, however, and to the last prac­ tice he was out on the field, still trying to make the team. He is Junor dent and with one more year in school, should make a strong bid for varsity honors.

Friedrich E. Eggn

Age 140

Eggn is one of the youngest men who are trying out for varsity hon­ ors. Coming from Missouri Valley he played two years of high school, but his honors have produced telling you otherwise. New and then, however, is a solitary individ­ ual who observes his fellows as well as they are observed. Such is Herbert Jenkins. The Hawkeye quar­ terback first won fame for himself in the Montana. Aside from playing some independent football, he had no experience and did not expect to make the varsity in his first effort. His position in the team, however, was as the end in a single contest, he still stayed out for practice and was a consistent and earnest worker up to the final game. McIlhenny weighs 175 pounds, and with his constant effort should make a valuable lin­ man next season.

AHMUT G. PYLE
Weight 170
Age 22

It required just one exhibition to demonstrate Arthur Pyle's permanent position on the 1917 Hawkeyes. On the twelfth of October Iowa placed the University of Nebraska, The weight of speed of the Huskers necessitated crimson substitutions on the part of their adversaries. Pyle was one of these substitutes; and from that performance, he never left the regular squad. "He has demonstrated that he has the stuff," said Coach Jones as he sent the sophomore to the varsity, and Pyle has repeated that demonstration many times since. He plays right end on offense and fullback when the opposition has possession of the ball. His ability to run and the ability of the offense to move the ball, is one of the deciding factors in today's contest.

FREDERICK K. LOHMAN
Weight 160
Age 23

When VonLackum was substituted for Lohman, and then the basket ball captain broke a bone in his foot, Frederick Lohman received his first opportunity to show what he had. As a first string substitute, however, he has been used weakly, playing about the middle of the line, and sometimes even at fullback. Lohman is busy with the fullback when the 'opposition has possession of the ball, and has sustained a great deal of punishment. He was for many times since, and is another star of the varsity. He never ceased to play football, and can be relied upon to furnish a steady linemen for Iowa during the past couple of seasons.

J. EARL O'DONNELL
Weight 170
Age 23

When the championship of the first week of practice was awarded to the football material, a general call went through the University. VanLackum was battling strong competition in the backfield, and despite his brilliant performance, he is ranked as a first stringer. This surprise judges him a dangerous man, and if given an opportunity, he, the All-American, must turn back a powerful plunger.

LAWRENCE A. BLOCK
Weight 164
Age 19

It is not often that a man, relegated to the second string after an outstanding performance on the varsity, fights his way back up to a berth on the regular, but that is the record of Lawrence Block this season. Early in the year, he played as an end. The IowaPrep star was light for this position, and moreover his passes were not too accurate, although his work was not at all creditable. However, the weight and moving ability of Gallagher combined, at length sent the lighter man to the second string. Right here the sophomore athlete demonstrated that he was no quitter. He never ceased to improve himself, and on November 17th, Jones decided to start him at left guard against Northwestern. In the face of the veteran Kelsey, Block has two more years to play football, and can be relied upon to furnish a steady linemen for Iowa during the past couple of seasons.

NOTED EXPLORERS ARE GRADUATES FOR S. U. I.

Former Professor Called Upon To Charter Material Science Club
From Polar Regions.

Rudolph Martin Anderson, the famous Arctic explorer, was called upon by Prof. C. C. Nutting of the State University to aid in soliciting and collecting funds for a material science club that was to be started under Professor Nutting. Now they work as Iowa's most noted explorers of all time and among the leaders of the entire world in this field. Work back at the center of work either or better are being done in the same type by student Professor Nutting. Now they work as Iowa's most noted explorers of all time and among the leaders of the entire world in this field. IOWA SEWAGE PLANTS ARE BEING NEGLECTED

University Inspector of Sewage Systems Finds Small Percent in Good Condition.

In 2,500 cities, towns, and villages of Iowa, there are about 500 water works plants, 110 sewage treatment plants, and 10 sewage treatment plants. According to R. H. Innes, associate professor of hydraulics and sanitary engineering who was employed last summer by the state board of health to inspect water works, sewers, and sewage treatment plants of the state.

"Of the thirty-seven plants visited during the summer only three can be said to have been in good condition," the report declared. "All three of those plants had features which were creating immediate attention, but in general they gave excellent results. The other thirty-four plants were either not being operated properly or were not properly worked over as to make first-class operation impossible." "Professor Danfalk suggests two possible means of relieving the state's water works plants. Either a representative from the state board of health must be permitted to visit all sewage treatment plants and supervise their operators or some one must be in each town and city having a sewage treatment plant must himself himself in the plant and see to it that a competent man is in charge."

"If no local man can be found who can take full charge, then an expert from outside should be engaged to supervise the operation of the plant," Professor Danfalk says. "All professional engineers having knowledge of sewage works can be secured in this way. One competent sanitary engineer could be engaged to do this work by several areas."

"The expert might place a local man in direct charge and himself supervise the operation of the plant by making an occasional visit to it at the critical times of the year."

"It would appear that there is no practical way of avoiding the future cost of pres-ent repairs is taken into account," he concludes.

"The only way to save this for the only Iowa.

WHERE HAS THE MONEY GONE?"

Face to face with a new month and nothing on bank books, Bills, BILLS!

That is the situation that confronts many men and women in Iowa City the first of every month, and most of them make good money, too. The reason is that they do not keep an accurate account of every purchase—and an accurate account of to whom, for what and how much money has been paid. There is no charge for this service.

If you wear our Good Shoes
Thirty years serving the Students of IOWA

STEWART'S

If you are looking for a pair of good shoes, look no further than Stewart's. We have been serving the students of Iowa for over thirty years and we guarantee satisfaction. Our shoes are comfortable and durable, and we believe in giving our customers the best value for their money.

Illustrations and Descriptions:

**Skin Ames Shave Yourself**

Every shaving appliance that is any good can be found here. Gillette, Auto Strop, Ever Ready, Gem, Jr., Durham Duplex, at prices from $1.00 to $6.50. Following Blades in stock: Gillette, Auto Strop, Ever Ready, Gem Jr., Enders, O. V. K., Kent Kutler, Clark's Durham Duplex, Star.

**YOU'LL NOT BE PINCHED**

If you are looking for a good pair of shoes, Stewart's has you covered. We carry a wide selection of styles and sizes to fit any taste and need. Our shoes are designed to be comfortable and durable, so you can wear them all day long without any discomfort.

**Auto Strop Razor**

A sharp razor is essential for a close shave. At Stewart's, we carry a variety of Auto Strops to suit your needs. Whether you prefer a single or double edge blade, we have the perfect razor for you. Our razors are designed to provide a smooth and comfortable shave every time.

**The Blu Hardware**

We carry a wide selection of hardware items to help you with all your DIY projects. From nails and bolts to tools and equipment, we have everything you need to complete your projects. Our hardware is top quality, so you can trust it to do the job.

**Smith & Cilek**

We offer a wide selection of furniture to suit any taste and need. Whether you are looking for a new couch, dining table, or bed, we have what you need. Our furniture is made from high-quality materials, so you can expect it to last for years to come.

NEWMAN CLUB

There will be a meeting of the Newman Club at K. C. Hall immediately after nine o'clock mass Sunday morning. Important. Come.

**REPORTS FROM BOTH CAMP POINT TO A HARD Fought Crusade**

There is little to choose. Johnson is rather an erratic factor. Some days he is sticking the ends with speed and picking the openings with skill; at other times he gives a rugged exhibition, carelessly watching the defense, as if against Peterson, on the other hand, is wiser than appearance and speed, but he is not so fast, nor is he possessed of equal experience. Summarized, there is little to choose.

The fullback position is accorded to Iowa without dispute. Vanderlin is a player with a quick eye and a quick line. He is also fast and circles the ends with success, but he is opposed to a man who is no mean rival for any fullback. Moreover, he is considerably outweighed which is essential in this position. Vanderlin does the passing for Cardinal, but Iowa has only an average kicker, there is nothing sensational about him, and Iowa is not known to gain many yards in the exchange of punts. At any rate, there is a real battle, and in both men were in condition, there would be small difference.

But Iowa and Alabama hold sway at this position, and they are in the opinion of the style of play, and versatility. Both the Cyclones exploit is a game of balance. Throughout the career, Alabama has carried three vandy sports football, basketball, and baseball. Swift low and light, he received a consistent hammering from his opponents, which is in all likelihood told. Although he played his best game in his first year, and has shown undeniably destined. It is highly probable that the Cyclones exploit will not end, and apparently not to say that he is dying, he is far from the end, and given by his gridiron career, will do double his

at his best this season. In view of the circumstances. Davis. The equal of Ballinger under normal conditions should have an easy superiority. Iowa’s offense as. Ames defense. From a rather superficial survey there, it is concluded that Iowa has the advantage to the backfield in which there is little difference between the two.

As a matter of conjecture, the same remarks apply as did last year at this time. Iowa has an evasion of which appears able to accomplish something on almost anything while Ames has a defense which has not scored heavily.

Assuming that Ames has but 14 points scored in the two games equally divided between Kansas and Kansas State, while Iowa has scored for 62 points, not including the Nebraska contest.

Generally speaking, a powerful offense is desirable in a strong defense, and this fact is what gives Iowa a slight advantage this afternoon. But that edge is so small that any little break in the game will swing it over to the other side. Today’s contest is destined to be close... down in line, in Iowa. Iowa fullback believes his favorite will be a winner in their champs... Iowa. *Fight.* We expect that it will be a problem. All Iowa backs had it Gold to win.

**BY F. W. RUSSELL**

Ames, Iowa: November 22, 1917—Special—Captain Waldahl takes his position along with his mates is the agone against Iowa, although three members of the reserves were

listed on the varsity by Coach Major

this morning. Waldahl will take Pelton and his position at left half. Waldahl will play right back and instead of Pelton slipped into Shanes backfield shover shows the other evening and they are said as good as that the same mate gives a permanent position.

Just what can be expected of this combination is yet a gamble but prob-

ably the Cyclones are a team that is worth watching closely. It is possible that Iowa will outscore the University, but there is little doubt that Ames is capable of scoring.
