HUMAN EXPLAINS TEST FOR ICE

State Water Chemist Says Quality of Ice in Shown in Sediment

The tendency of ice to exclude foreign matter and bacteria during its formation often makes it possible to take pure ice from the polluted streams and points which are the rule in any densely populated region, according to J. J. Hinman of the University, Iowa's water chemist and bacteriologist.

HOSPITAL KISSES LONG FOR FRIENDS AND FUN

"Valentine's day isn't much fun for hospital kids," lamented one of the east wing cripples yesterday as he endeavored to raise the wis- dom with twoclumsily bandaged arms.

"Would be if you lived here," said the essential reply of one of the companions., It is a wheel chair. "Visions is going to be in the same room tonight," with a delighted emphasis upon the "this.» "My mamma works here," he explained to a vis- itor who had stopped to hear the discussion.

"I ain't got any friends any place in town, not near Carlos Rapids or any place," came from a small boy on the window sill.

"But we do have fun at nights, anyway," he added in an undertone.

"We take each other's shoes and stockings and hide them or else we have them up high where they can't be reached. That's after the ones are gone.

"OF THE West Wing..."
